Animation I
2-D

(1 Credit)

In this course, students will explore the history, principles, and design of animation.

They will combine graphics, images, and sound together to create 2 dimensional animated movies.

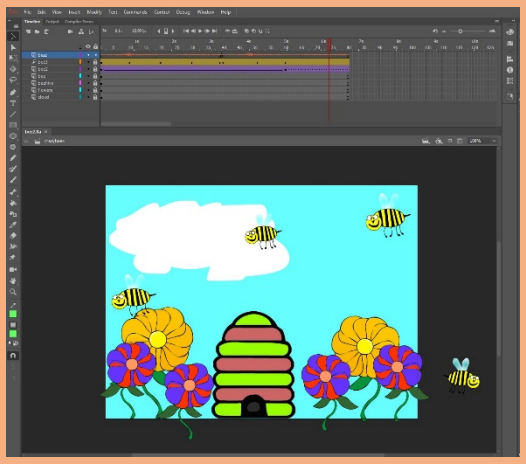
We will learn a variety of techniques including rotoscope, tweening, and frame by frame animating.

Scripting and programming will also be utilized.

Students will learn how to storyboard and create flipbooks and thaumatropes.

We will utilize the features in Adobe Animate to create animations.

Students will have the opportunity to take the Adobe Animation Certification Exam.

Grades 10 – 12


Lab supplies and fee may be required
