

**Q Can I view completed samples of the “Problem-solving Board” that CFISD uses in middle school?**

**A** The samples provided below show two different student responses to the same assignment. In both cases, the same “Frugal Frank” story problem appears at the top of the graphic organizer.

- For [Sample A](#), the student chose to use “draw a picture” as the problem-solving strategy.
- For [Sample B](#), the student chose to use “make a table or list” as the problem-solving strategy.
