

## Second Grade Math Vocabulary

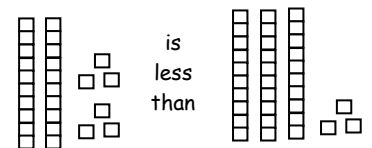

1. Greater than- a larger amount shown by the symbol ">"

Thirty-three is greater than twenty-six.

2. Less than- a smaller amount shown by the symbol "<"

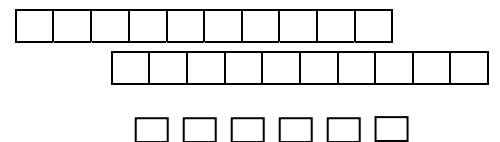

Twenty-six is less than thirty-three.

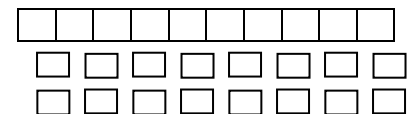

3. Regroup- use place value to think of a number in a different way to make addition and subtraction easier

26

Trade is another name for re-group. =2 tens 6 ones

=1 ten 16 ones

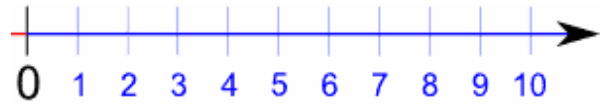

4. Fact family- a group of facts that share the same numbers

Fact families help me to know my facts.

$3 + 2 = 5$ $2 + 3 = 5$ $5 - 2 = 3$ $5 - 3 = 2$
--

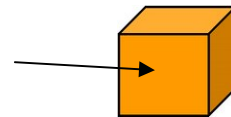

5. Number line-a straight line marked at equal spaces to show numbers

I draw a number line to put numbers in order.

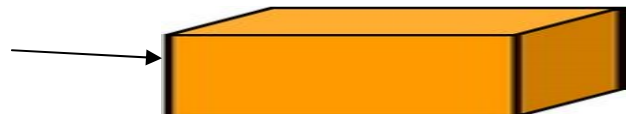

6. Face-any of the individual flat surfaces of a solid object

A cube has six square faces.

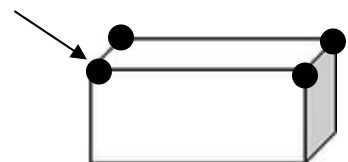

7. Edge-the line where two faces meet on a solid object

To help count the edges I make a slash mark on each edge.

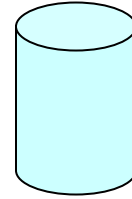

8. Vertex-a point where two or more edges meet at a corner

To help count the vertices I dot the corners.

9. Cylinder-a three-dimensional solid with two circular bases that are equal distance apart.

A soda can is shaped like a cylinder.

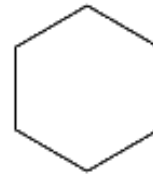

10. Pentagon - a 5-sided polygon (a flat shape with straight sides)

Home plate is in the shape of a pentagon.

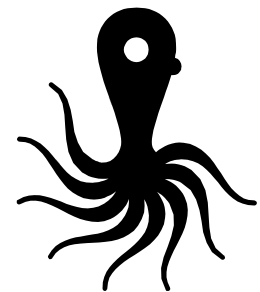

11. Hexagon - a 6-sided polygon (a flat shape with straight sides).

The "x" in hexagon is like the "x" in six.

12. Octagon - an 8-sided polygon (a flat shape with straight sides).

The 8 legs of an octopus help me remember that an octagon has 8 sides.

13. Minute- a unit of time equal to 60 seconds.

It takes a few minutes to tie my shoe.

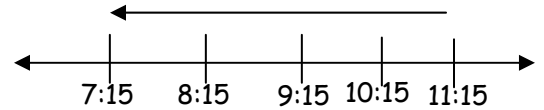

14. Second- a unit of time.

I can clap my hands in a second.

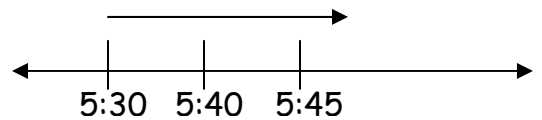

15. Earlier-to occur before a given time

We eat breakfast earlier than lunch.

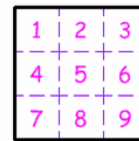

16. Later-to occur after a given time

Eating dinner at 5:45 is later than eating dinner at 5:30.

17. Area-the number of square units needed to cover a surface

These two shapes have the same area (9)

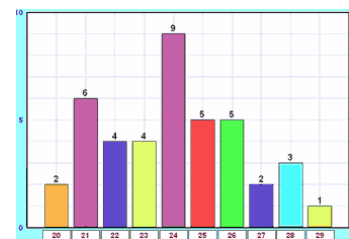

18. Capacity- the amount a container can hold

The capacity of a swimming pool is more than the capacity of a cup.

19. Bar graph-a graph in which the values are shown using rectangular bars

When I label a bar graph I always put my numbers on top of the bars.

20. More likely- greater chance that an event will happen

The spinner is more likely to land on red because there are more red spaces.
