Lines of Longitude	<ul style="list-style-type: none"> <li>• Run north and south.</li> <li>• Called meridians.</li> <li>• The prime meridian is the starting point for the lines of longitude and splits the western and eastern hemispheres in half.</li> </ul>
Finding Latitude and Longitude	<ul style="list-style-type: none"> <li>• To find the location of a place, first trace your finger along the line of latitude, and then trace your finger along the line of longitude.</li> </ul>

- Use the map below to answer the questions.
  - Which state is located at 32° N and 92° W?
  - What is the approximate latitude and longitude of El Paso?

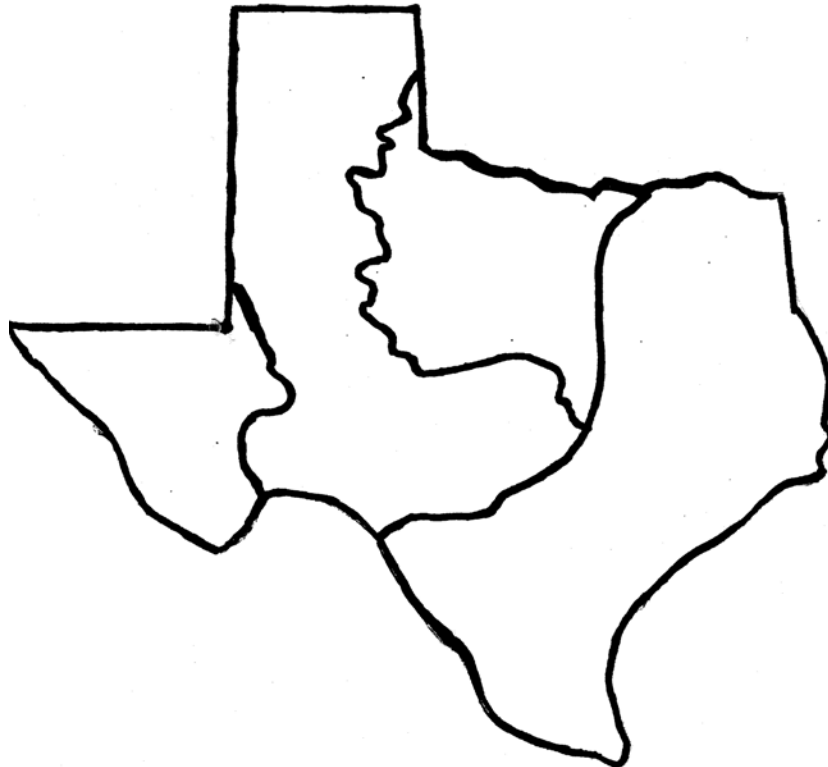

## Maps Scale

- Map Scale – measures distance on a map
- Use the map to answer the questions.
  - About how many miles is it from Phoenix to Houston?
  - Is Denver, Dallas, or San Francisco the closest city to Phoenix?
  - Which two cities are closest to one another, St. Louis to Denver or Boston to Chicago?

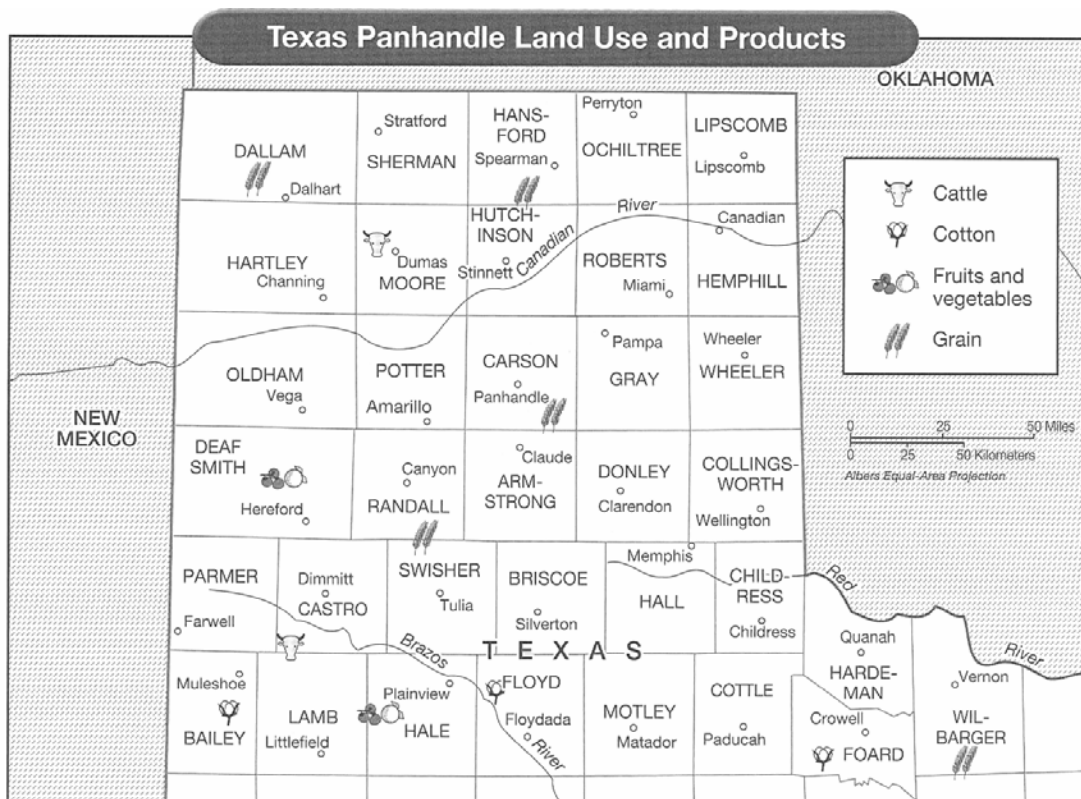

## Natural Regions of Texas

- Label the natural regions of Texas.

## Land Use and Resource Maps

- Use the map below to answer the questions.
  - Which product is grown in Bailey County?
  - Which resource is grown in the most counties?

## Read a Time Line

- A time line is a diagram that lists events that took place during a certain time period.
- Decade – a period of ten years
- Century – a period of one hundred years
- Use the time line below to answer the questions.
  - What year did Christopher Columbus return to Spain?
  - How many years does this time line cover?
  - Which men explored for Spain?
