

CYPRESS-FAIRBANKS LEARNING MANAGEMENT SYSTEM DIRECTIONS FOR RUNNING CFLMS IN COMPATIBILITY VIEW

WHY DOES CFLMS NOT LOOK RIGHT?

Sometimes CFLMS or another website you're visiting doesn't look right. It shows up as a jumble of out-of-place menus, images, and text boxes. What's going on? One possible explanation: The site might have been designed for an earlier version of Internet Explorer.

If Internet Explorer recognizes that the webpage isn't compatible, you'll see the Compatibility View button on the Address bar. **Try clicking it.**

In Compatibility View, websites will be displayed as if you were viewing them in a previous version of Internet Explorer, which will often correct display problems. You don't need to click the button for a site after you've done it once—the next time you visit the site, Internet Explorer 9 will automatically show it in Compatibility View.

If you ever want to go back to browsing with Internet Explorer 9 on that site, just click the Compatibility View button again.

HOW DO I USE COMPATIBILITY VIEW?

Click on the link below to watch a video tutorial to learn how to use Compatibility View in Internet Explorer 9:
