JANUARY 2023

This month we discuss: Cybersecurity Trends You Can Expect In 2023

INTERNET OF THINGS (IoT)

CYBERSECURITY THREATS MULTIPLYING

2023 PREDICTIONS

Cyber Threats are Growing.
In 2023, Do Not Underinvest in Cybersecurity

It's that time of year again when we try to predict what's ahead of us in terms of cybersecurity. 2022 has already become a record-breaker for the sheer volume of phishing scams, cyberattacks, data breaches and crypto heists. There was also a rise in hacktivism cases where state-sponsored cyber legions disrupted critical infrastructure and services, defaced websites, launched DDoS attacks and stole information.

It's not hard to imagine that 2023 will top records in cybercrime. Click on the buttons above to learn about cybersecurity trends we can expect in 2023.

Today, it's no longer good enough for employers or employees to simply think of cybersecurity as an issue for the IT department to take care of. In fact, developing an awareness of the threats and taking basic precautions to ensure safety should be a fundamental part of everyone's job description in 2023!
