General Registration Information

High schools in Cypress-Fairbanks operate on a semester system (seven classes per day). One year’s work will provide one Carnegie credit in each course or a maximum total of seven credits per regular school year. Additional credits may be earned in summer school, correspondence, credit-by-exam, or college courses taken for dual credit.

New Students

A senior high school student new to the school district should report to the registrars’ office with the following documents.

1. A birth certificate
2. Immunization records as follows:
   A validated document of immunization, which has been issued by a public health clinic or one signed by a licensed physician*, must include the following.

<table>
<thead>
<tr>
<th>Vaccination</th>
<th>Requirement</th>
</tr>
</thead>
<tbody>
<tr>
<td>Polio</td>
<td>3 doses with one dose on or after the 4th birthday</td>
</tr>
<tr>
<td>DTP/DtaP</td>
<td>For 8-12th grades; 3 doses with one dose on or after the 4th birthday</td>
</tr>
<tr>
<td>TDAP booster</td>
<td>1 dose for 8th-12th graders; booster needed every 10 years</td>
</tr>
<tr>
<td>MMR (Measles, Mumps, Rubella)</td>
<td>2 doses; 1st dose on or after the 1st birthday</td>
</tr>
<tr>
<td>Hepatitis B</td>
<td>3 doses</td>
</tr>
<tr>
<td>Varicella (chicken Pox)</td>
<td>2 doses; with 1st dose on or after the 1st birthday or parent/physician statement of chicken pox illness</td>
</tr>
<tr>
<td>Quadrivalent Meningococcal</td>
<td>For 7-12th grades; 1 dose on or after 10th birthday</td>
</tr>
<tr>
<td>Hepatitis A</td>
<td>7-9th grades; 2 doses; 1st dose on or after 1st birthday</td>
</tr>
</tbody>
</table>

   Proof of DT booster and/or second measles vaccine must be presented to the school nurse at the beginning of the semester in which they are due. Parents and students will be notified when vaccines are due.

   *Immunization records from a previous school are also acceptable.

   Please note: Immunization requirements differ for younger children. Parents of elementary school-age children should consult with the elementary school nurse.

   *Parents can check for immunization updates at: [http://www.dshs.state.tx.us/immunize/school/default.shtm](http://www.dshs.state.tx.us/immunize/school/default.shtm)

3. Social Security number
4. Proof of residency in the district (lease agreement, proof of home ownership, etc.)
5. A copy of his/her STAAR Confidential Student Report for the most recent test administration (students enrolling from another Texas school)
6. Parents should provide copies of academic documents from previous years beginning with 7th grade. (High school credit toward graduation may be earned beginning in 7th grade for certain courses.)
7. Transfer Students
   - Students Transferring from Accredited Private Schools - Credit for courses transferred from an accredited private school are awarded based on the official transcript.
   - Students Transferring from Unaccredited Private Schools
     Middle school course placement shall be determined through a review of course descriptions, student work products, or through the administration of a credit-by-exam or comparable assessment.
     High school course credit: Credit for a high school credit course shall be determined through a credit-by-exam. The passing standard on a credit-by-exam for a course shall be determined through a review of course descriptions, and/or through student work products.
   - Students Transferring from Home Schools - According to the Texas Commissioner of Education, students transferring from home school should be afforded the same treatment as students transferring from unaccredited private schools. Please reference the information above for unaccredited private schools.

Returning Students

Students who have already registered but must have a schedule change due to the situations listed below must call the school office no later than August 1 to make an appointment to discuss a change due to

- attendance in summer school;
- completion of a correspondence course; or
- failure to complete the prerequisites for a new course.
Course Offerings
This publication lists the high school course offerings with grade placement, credit(s), prerequisites, and some brief information on each course. It serves as an overview of students' requirements for graduation including course descriptions. This bulletin also outlines procedures for changing courses and possible consequences of changes.

A wide variety of electives are found among the courses offered. Career and Technical skills preparation courses are offered to junior and senior students who are at least 16 years old. These courses are two to three hours daily with all or part of the instruction given on campus. Students participating in courses which involve off-campus instruction (practicums) must provide their own transportation.

Special Education
Students experiencing difficulties in school may be referred for services in special education. Before a student can receive special education and/or related services for the first time, an initial evaluation must be conducted. Decisions regarding the provision of special education services are made by an Individual Education Plan (IEP) committee. If a student is determined to be eligible for services in accordance with the Texas Education Agency guidelines, an individualized education plan is developed. Instruction that is designed to meet a student's unique educational needs may be provided in a variety of settings. Instructional settings may include (a) general education classroom with accommodations, (b) general education classroom with support, (c) resource classroom, (d) self-contained classroom, or (e) a separate campus. Related services necessary for the student to benefit from special education may also be provided.

Grade Classification Standards

</tr>
<tr>
<td>12th</td>
<td>3 years of attendance and 17 credits or early graduation plan</td>
</tr>
</tbody>
</table>

Course Selection and Request for Changes
Students will select courses for the next school year during the spring semester. A decision of this nature should be considered with parental aid. Factors to be considered in selecting courses are the

- requirements for graduation;
- significance of the course to the student's overall program and educational/career goals;
- purpose of the course; or
- possible prerequisite(s) for other courses.

All requests for changes must be submitted in writing by the last day of the spring semester. The following guidelines will be used in honoring changes/requests made after that date.

1. Changes will be made during the first two weeks (first 10 days) of a semester for the following reasons. The student
   - does not meet prerequisite(s) for the course;
   - does not meet grade placement requirement of the course;
   - already has credit in the course;
   - is placed in an inappropriate level; or
   - has not met requirement for K-level, AP, or HORIZONS placement.

2. After consultation with the teacher, students may withdraw from band, dance, JROTC, or athletics at any time, but in each case, they will be assigned to a regular physical education class.

3. No course changes are allowed after the second week (first 10 days) of each semester.

Note: Schedule changes after the second week of either semester will be according to district policy (i.e. they are primarily AP to K-level or K-to L-level changes). No other course changes are allowed; course changes may raise eligibility issues.
Consequences of Changes

If a student withdraws from a course during the first two weeks of either semester for the reasons listed on page 5, the course will not be shown on the student's record. A student withdrawing from a course after the first two weeks will receive no credit for the course. The student's record will show a "WD" for the semester in which the withdrawal is made. The course will count as one attempted with no credit or grade points allowed. This course will also be calculated in the grade point average and affect class rank.

“K” (Accelerated) and Advanced Placement Courses

K-level (accelerated level) courses are offered in English, mathematics, science, foreign language, social studies, gifted/talented education, and computer science. Advanced Placement (AP) courses, which prepare students to take College Board exams to earn college credit, are available for students who desire to participate in a rigorous, challenging curriculum. To encourage enrollment in upper-level courses, the district allows students in some third and fourth courses in a sequence to elect to take the course on a pass/fail basis.

HORIZONS is the name of the program for students identified as gifted/talented. The courses are designed to meet the unique needs of gifted students in CFISD. Parents may refer their children to be tested for the gifted program annually through the Open Referral Period beginning October 1 and ending the last school day in November. If you need more information about gifted students and the gifted program, please visit the HORIZONS website. Parents who feel that their child is demonstrating characteristics of gifted behavior would need to contact the director of instruction at the campus during the Open Referral Period to refer students for testing.

*Non-transferable to a 4-year institution; not awarded advanced grade points*
Advanced Classes Entry/Exit Criteria

K-level classes have a more rigorous and in-depth content focus than L-level classes. Classes often move at a faster pace, include different types of assignments, and require additional outside reading. These classes are designed to challenge students beyond grade-level academic courses and prepare them for success in future advanced coursework. Students may require additional encouragement and support from both family and campus staff to be successful in advanced classes. Students enrolled in advanced classes in English, math, science, or social studies should have an interest in and an aptitude for the subject.

Advanced Classes Entry/Exit Criteria*

Eligibility for Entry into K-level or Advanced Placement (AP) Classes

Students who were scheduled in K-level courses the previous year will be able to continue in the K-level course sequence if they maintained a 75+ average for the second semester.

Students are eligible for first time entry into a K-level or Advanced Placement (AP) class if

1. the student earns a grade of 85+ yearly average in the previous on-level/L-level class in the same subject or;
2. the student earns Masters Grade Level on STAAR (9th graders) or Masters Grade Level on the End-of-Course exam (10th-12th graders) for the corresponding subject (see chart); and
3. the student has parent permission to take the K-level or AP class.

Removal from K-level or AP Class

1. Students who receive an average of 74 or lower for the semester will be removed from the K-level class and placed in an appropriate L-level class for the following semester, if an L-level class is available. Students who receive an average of 74 or lower for the semester will be removed from the AP class and placed in the appropriate L-level class for the following semester, if an L-level class is available. An average of 74 or lower does not meet the entry criteria for a K-level class. No grade adjustments are made to semester averages.

2. If a student makes a 69 or lower for any grading period, he/she will be placed in an appropriate L-level class for the remainder of the school year, if an L-level class is available.

3. A student making below an 80 average at the end of the third week of a grading period in a K-level class may, upon his/her request and parent approval, be placed in an appropriate L-level class for the remainder of the school year. A student making below an 80 average at the end of the third week, the sixth week, or the grading period in an AP class may, upon his/her request and parent approval, be placed in either a K-level or L-level for the remainder of the school year. The student must meet entry requirements to qualify for placement in K-level (75+ average). No grade adjustments are made when a student drops from an AP class to a K-level class.

4. A student may, upon his/her request and with parent approval, transfer from a K-level or AP class to an appropriate L-level or K-level class at the end of any grading period.

*The K-level entry/exit criteria apply to all HORIZONS students in HORIZONS/K-level cluster classes.

Grade Adjustments

When a student changes from a K-level to an L-level course, grade adjustment points will be added to the student’s current three-week average (during any grading period) or final average in the first and third grading periods only. No adjustment will be made in grades earned in previous grading periods, nor will adjustments be made in semester averages. Adjustments will not be made to a failing grade that would make that grade higher than 69. A detailed explanation of the K- to L-level grade adjustments is available through the counselors’ office.

Please note: Grade adjustments will not be made to grades of “B” or higher.
First Time K-level Eligibility through STAAR/EOC Scores

Other Learning Opportunities

High school counselors can provide information, answer questions, and in some instances, help students enroll in courses outside the regular school day. The following options are available to Cypress-Fairbanks ISD students.

Credit-by-Exam without Prior Instruction (Original Credit)

In accordance with the Texas Education Code, Cypress-Fairbanks I.S.D. will administer examinations for specified courses to eligible students. Credit-by-exam will serve primarily as the vehicle for students to be given credit for a course they have not yet taken formally. The passing standard is a grade of 80+. The passing grade and credit earned (L-level) on the credit-by-exam will be placed on the student’s transcript and used in GPA and class rank calculations. Students wishing to exercise this option should see their counselor for an application. The exams are scheduled periodically throughout the school year.

Credit-by-Exam with Prior Instruction

Students who have engaged in study in a curriculum that cannot be matched exactly with required TEKS of a course may consider credit-by-exam. These students may have studied in a foreign country, a non-accredited school, home school, or want credit for summer enrichment courses both in and out of state. The passing standard is a grade of 70+. The passing grade and credit earned (L-level) on the credit-by-exam will be placed on the student’s transcript and used in GPA and class rank calculations. A fee of $31.00 is charged for each credit-by-exam with prior instruction. For more information, see your counselor. Students may not take credit-by-exam during the semester they are enrolled in the same course.

Articulation Agreements

The Cypress-Fairbanks Independent School District and area community colleges, including the Lone Star College System and the Houston Community College System, have entered into agreements to award credit for specified course work in high school. Students who successfully complete designated high school courses, meet certain college requirements, including grade average, and subsequently enroll in a specified program, may receive college hours or advanced standing. This allows students the opportunity to take higher-level courses on the college level. A current list of approved courses is available on the Lone Star College website.

Summer School

Original credit and make-up credit courses are offered each summer. Students meeting certain criteria may take some courses for original credit prior to the year that the course is required. Courses are offered in English, math, science, social studies, physical education, health, and art. All summer school courses, whether taken in or out-of-district, will earn L-level grade points only. (See summer school brochure for more information.)

On-line Courses / Texas Virtual School Network

The Texas Virtual School Network (TxVSN) offers on-line courses for students in grades 9-12. Online courses selected by a CFISD student must be consistent with the student’s high school graduation plan and must meet standards that are of equivalent rigor as the district’s standards for the same course provided in a traditional classroom setting. Students taking courses through TxVSN must be aware of the following:

- Fees may vary by the course and the providing district and are the responsibility of the student.
- All courses taken through TxVSN will appear on the transcript and will count in the GPA.
- Students may take one TxVSN course per semester.
- Students interested in participating in a TxVSN course should contact his/her counselor.
- The high school counselor registers and approves all TxVSN course enrollments.
- More information is available about Texas Virtual program at www.txvsn.org or at EHDE (board policy)
High School Course Work – Dual High School/College Credit

Cypress-Fairbanks ISD and Lone Star College have entered into an agreement allowing students who meet specified criteria to earn both high school credit and college credit for specific high school courses. Please see your counselor for dual credit eligibility requirements and course availability.

Note:
- Tuition is waived by Lone Star College
- Students are responsible for required fees.
- Students taking dual credit courses in the summer after their sophomore year must take the grade 11 dual credit course as a prerequisite to enrolling in the subsequent grade 12 dual credit course.

Approval for additional courses
- To take dual credit English III during the summer after the sophomore year, students must have passed the English II End-of-Course (EOC) assessment.
- Students taking dual credit U.S. History during the summer after the sophomore year will take the U.S. History End-of-Course (EOC) assessment the next December.

Note:
- Students taking dual credit courses in the summer at the Lone Star College Campus must purchase or rent the associated college textbook(s) and pay additional on campus fees.
- Online and mini-semester courses offered at Lone Star College are not an approved dual credit option.

College Course Work – Dual High School/College Credit

Cypress-Fairbanks ISD and Lone Star College-Cy Fair have entered into an agreement allowing students who meet specified criteria to earn both high school credit and college credit for specific high school courses.

A high school student may earn dual credit toward high school graduation and college credit through successful completion of approved college courses. A student will be awarded credit toward graduation only if he/she obtains prior approval from the appropriate district and/or campus personnel.

A student who meets the following criteria is eligible to apply for the opportunity to earn high school credit through college courses:

1. The student must have an overall average for all courses of at least 80, or the student must have an average of at least 80 in the last course taken in the general subject-area of the college-level course.
2. The student must have successfully completed prerequisite courses as identified by district guidelines.
3. The student must have acceptable scores on college placement exams or alternative assessments. The Director of Advanced Academics, campus counselors, and College & Career Specialists will have this information as well as an updated list of dual credit courses.
4. The student must have completed a Lone Star College admissions application and received prior approval from a member of the campus dual credit team.
5. The student must have received approval for college admission through the exceptional admissions process completing all enrollment paperwork required by the college.

Specific requirements and procedures are available in the campus College & Career Center or the campus Counseling office.

• Students taking dual credit courses in the summer after their sophomore year must take the grade 11 dual credit course as a prerequisite to enrolling in the subsequent grade 12 dual credit course.
Advanced Courses on a Pass/Fail Basis

Students in grades eleven and twelve are eligible to earn up to two credits on a pass/fail basis, one as a junior and one as a senior. Any student who wishes to take courses in addition to the 26 required for graduation with the Foundation + Endorsement High School Program or the 22 credits required to accomplish the Foundation High School Program may take such courses on a pass/fail basis. Only certain courses, as designated by district policy, can be taken as pass/fail. The student must declare intent to take such a course on a pass/fail basis within the first 10 days of the semester. Students who have a grade average of 70 or above in such courses shall be awarded credit. Rather than a numerical grade, a “P” will be recorded on the transcript. Conversely, an “F” will be recorded on the transcripts of students who earn a numerical average of less than 70. These courses shall be excluded in the computation of grade point averages. The purpose of the option is to encourage students to take advanced courses in addition to the total number of credits required for graduation.

Students must meet eligibility requirements, including grade level and grades earned in previous courses, and receive approval from parents, counselor, and instructor. Because requirements and courses approved for pass/fail may change from year to year, students should consult with their counselor and/or content-area teacher prior to registration to determine their eligibility to participate in the pass/fail program. Students who take a course under the pass/fail option must complete all assigned work and take the TEKS/benchmark exam and final exam of the course unless they are exempt from the final exam due to the current exemption policy. The student’s academic performance in a pass/fail course will affect his/her eligibility to participate in extracurricular activities.

Correspondence Learning

A high school student may earn two credits toward graduation through courses/correspondence learning. A student will be awarded credit toward graduation only if he obtains approval from the grade-level counselor prior to course enrollment. All grades earned will be entered on the transcript and included in the grade point average.

The student’s eligibility for enrollment in a correspondence learning course is based upon the following criteria:

1. The student must have successfully completed one semester in the ninth grade.
2. The student must have an overall average for all courses taken in high school of at least 75.
3. The student must have at least a 75 average in a previous similar course.
4. The student must have successfully completed prerequisite courses as identified by district guidelines.
5. The student must not be enrolled in another correspondence learning course.
6. All course work and the final examination must be completed and the grade reported to the counselor before the sixteenth week of the fall semester of the senior year in order for the grade to be posted for graduation purposes.
7. The Texas Education Agency only recognizes courses from the University of Texas at Austin and Texas Tech University.

Correspondence learning course grades must be received by the counselor or registrar before the beginning of the sixteenth week of the fall semester of a student’s senior year, or the student shall be enrolled in the course for the spring at the high school the student is attending or in night school. If the senior is enrolled in a correspondence learning course in the fall semester and does not complete it before the sixteenth week, the course will be recorded on the student’s transcript as a “WD.”

If a student does not complete a correspondence learning course by the designated deadline, the course shall be recorded on the student’s transcript as a “WD” –a course attempted-withdrawn/dropped. That is, the course shall count as one attempted with no credit earned and zero grade points allowed. This course shall also be calculated in the grade point average and shall negatively affect class rank.

Students planning to participate in graduation in the summer must sign up for a correspondence learning course no later than March 1 and must have received all correspondence learning grades no later than July 1.

Early Graduation

Students may graduate early, subject to the following conditions.

1. Students must complete a Declaration of Intent to Graduate Early form, a document signed by the parent and submitted to the counselor no later than the semester before the intended graduation date. The counselor will review the plan, sign, and forward the plan to the high school registrar.
2. Early graduation options include the following:
   — the June of the third complete year of high school (36 consecutive months)
   — the summer after the third complete year of high school (38 consecutive months)
   — the December of the fourth complete year of high school (43 consecutive months); students choosing this option may participate in the spring graduation ceremony.

Grade point averages for these mid-term graduates will be treated in the same manner as spring graduates in so far as class rank and class honors are concerned.
Class Ranking

Beginning with courses taken between the eighth and ninth grade, all high school courses, including correspondence, night school, college courses taken for dual credit, credit-by-exam, and summer school, are averaged in the class rank with the exception of student assistant, local credit, and courses taken under the pass/fail option. High school courses taken by seventh or eighth-grade students and completed by the end of the eighth-grade year will not count in class rank with the exceptions of Geometry, Biology, Art I and the third or higher levels of a foreign language. Rank will be determined by grade point averages (GPA) of the students. GPA and class rank are calculated in the fall after students complete the ninth and tenth grades. Estimated class rankings are determined at the end of the junior year and the first semester of the senior year for the express purpose of college entrance requirements. Another ranking is performed at the end of the third grading period to identify summa cum laude, magna cum laude, and cum laude graduates.

Note: New students to CFISD will be awarded credit for all transcripted high school courses. However, these courses will be included/excluded from GPA and class rank calculation in alignment with CFISD’s GPA and class rank structures.

Honor Graduate Designation

At graduation ceremonies, graduates will be recognized in the following categories: summa cum laude (6.5 GPA), magna cum laude (6.25 GPA), and cum laude (6.0 GPA). A final calculation of GPA and class rank is determined at the end of the senior year and will be reflected on the final transcript which is sent to colleges.

Grading Scale

CFISD uses a weighted 6.0 grading scale. Grade points are allocated for a course of study based on the designation of the course as indicated in the chart below.

<table>
<thead>
<tr>
<th>GRADE</th>
<th>LEVEL OR COURSE</th>
<th>LIFE SKILLS</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>K, AP, and HORIZONS Levels</td>

<tr>
<td></td>
<td>3 grade points</td>
<td>1 grade points</td>
</tr>
<tr>
<td>F (below 70)</td>
<td>0 grade points</td>
<td>0 grade points</td>
</tr>
</tbody>
</table>

The semester grades are computed by allocating a weight of 3/7 for each grading period average and 1/7 for a semester exam. A student will receive credit for each semester passed. If the course is a two-semester sequence and the student passes the second semester after having failed the first, he/she may receive the credit for both semesters if the yearly average is passing (70+).

Four mathematics and four science courses will be included in a student’s GPA calculation. If a student takes Algebra I in 8th-grade and takes four math courses in grades 9-12, the four math courses taken in high school will be included in the student’s GPA. But, if a student takes Algebra I in 8th-grade and only takes three math courses in grades 9-12, the Algebra I course will be included in the student’s GPA calculation. Algebra I taken at any time will carry L-level grade points.

Participation in Commencement

To be eligible to participate in commencement exercises, a student must meet state graduation requirements by earning a minimum of 22 credits in designated courses and pass all required state assessments.
Honor Roll

SENIOR HIGH SCHOOL

1. Distinguished honor roll: Students who earn grades of 90 or above in all courses.

2. Regular honor roll: Students who earn a majority of grades of 90 or above, with the remaining grades in the range of 80-89.

3. Students qualifying for the honor roll must not earn less than an S in conduct.
Students who enter the ninth grade in the fall of 2014 and thereafter must enroll in courses necessary to complete the Foundation High School Program with an endorsement. Students may also earn Distinguished Level of Achievement by including and successfully completing Algebra II in their selected coursework. Students should study the table below which outlines requirements for 22 credits for the Foundation High School Program plus the 4 additional credits required for an endorsement. Counselors at each high school will furnish details associated with endorsements and other information necessary for student to complete registration.

**Financial Aid Application for High School Graduation**

Completing a free application for federal student aid (FAFSA) is a graduation requirement. FAFSA and/or TAFSA must be completed before a student can receive a high school diploma. A parent or legal guardian may provide written notice to opt out their child. Students who are at least 18 years old may opt themselves out of the requirement.
## Cypress-Fairbanks ISD - The Endorsements

A student must complete the Foundation High School Program (22 credits), one additional math credit, one additional science credit, and two additional elective credits while completing the specific requirements of his/her selected endorsement.

<table>
<thead>
<tr>

<td><strong>Option 3: Combination</strong> Students take a coherent sequence of four (4) credits from Option 1 and 2. Combination plan must include one (1) advanced CTE course.</td>
<td><strong>Option 3: Fine Arts</strong> Students take four (4) courses in the same fine arts area for 4 credits OR</td>
<td><strong>Option 3: Fine Arts</strong> Students take four (4) courses in the same fine arts area for 4 credits</td>
<td><strong>Option 3: Fine Arts</strong> Students take a combination of Advanced Placement (AP) or Dual credit courses for four (4) credits in English, math, science, social studies, foreign language, or fine arts.</td>
</tr>
</tbody>
</table>
### Option 4: Science

Students take Biology, Chemistry, and Physics, AND two (2) of the following courses.

- AP Chemistry
- AP Biology
- Anatomy & Physiology
- AP Environmental Science
- AP Physics I
- AP Physics II
- AP Physics C
- Aquatic Science
- Astronomy
- Earth & Space Science
- Environmental Systems
- Forensic Science
- Engineering Design & Problem Solving
- Advanced Animal Science
- Advanced Plant and Soil Science
- Pathophysiology

### Option 5: Combination

Students take Algebra II, Chemistry, and Physics, an additional math course, an additional science course, AND three (3) additional credits from Option 1 (Computer Science) and/or Option 2 (CTE) in the STEM endorsement. If the combination plan includes a CTE course, at least one (1) course must be advanced.
Performance Acknowledgements

Performance Acknowledgements for Students Pursuing the Foundation/Endorsement Graduation Plan

A student may earn a performance acknowledgment for outstanding performance in the areas of

1. Dual credit;
2. Bilingual / Bi-literacy;
3. College Board Advanced Placement (AP) exams;
4. PSAT, ACT ASPIRE, SAT, or ACT performance; or
5. Nationally or Internationally Recognized Business or Industry Certification or License

Dual Credit

A student may earn a performance acknowledgment by successfully completing at least 12 hours of college credit taken through dual credit enrollment, advanced technical credit courses, and locally articulated courses with a grade of A or B or earn an Associate Degree.

Bilingual / Bi-literacy

A student may earn a performance acknowledgment by completing all English requirements with a grade of 80+ AND by satisfying 1 of the 4 following additional requirements.

1. Complete 3 credits in the same foreign language with a grade of 80+.
2. Demonstrate proficiency in Level IV or higher in a foreign language with a grade of 80+.
3. Complete 3 credits in any foreign language with a grade of 80+.
4. Demonstrate proficiency in a foreign language through 1 of the 2 following methods.
   a. Earn a score of 3 or higher on a foreign language Advanced Placement (AP) exam.
   b. Earn performance on a national assessment of language proficiency in a foreign language of at least Intermediate High or equivalent.

An English language learner (ELL student) must also have participated in and met exit criteria of a bilingual or English as a second language (ESL) program AND scored Advanced High on the Texas English Language Proficiency Assessment System (TELPAS).

College Board Advanced Placement (AP) Exam

A student may earn a performance acknowledgment by earning a score of 3 or above on an Advanced Placement (AP) exam.

PSAT, ACT-Aspire 10, SAT, or ACT Performance

A student may earn a performance acknowledgment by earning a qualifying score on one of the following exams.

1. Earn a score on the PSAT that qualifies the student for recognition as a commended scholar or higher by the College Board and National Merit Scholarship Corporation, as part of the National Hispanic Recognition Program or National Achievement Scholarship Program.
2. Achieve the college readiness benchmark score on at least 2 of the 4 subject tests on the ACT – Aspire 10 exam.
3. Earn a combination critical reading and mathematics score of at least 1250 on the SAT.
4. Earn a composite score on the ACT exam of 28 (excluding the writing subscore).

Nationally or Internationally Recognized Business or Industry Certification or License

Student may earn a performance acknowledgment for earning a nationally or internationally recognized business or industry certification or license.

Nationally or internationally recognized business or industry certification must be endorsed by

- a national/international business, industry, or professional organization;
- a state agency or government entity, or
- a state-based industry association.

Certifications or licensures shall

- be age appropriate for high school students;
- represent a student’s substantial course of study and/or end-of-program knowledge and skills;
- include an industry recognized exam, an industry validated skills test, or demonstrated proficiency through documented supervised field experience; and
- represent substantial knowledge and multiple skills needed for successful entry into a high-skill occupation.

*See the counselors’ office for more details and form.
Testing Requirements for High School Graduation

Beginning with the Class of 2015 (ninth graders entering high school in fall 2011 and beyond), state law requires that students pass five STAAR End-of-Course (EOC) assessments in English, math, science, and social studies, along with meeting their course requirements, to receive a diploma from a Texas public high school. Courses with an EOC assessment are listed in the chart below.

<table>
<thead>
<tr>
<th>English</th>
<th>Mathematics</th>
<th>Science</th>
<th>Social Studies</th>
</tr>
</thead>
<tbody>
<tr>
<td>English I</td>
<td>Algebra I</td>
<td>Biology</td>
<td>U.S. History</td>
</tr>
<tr>
<td>English II</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

The STAAR testing program requires that students take the five EOC assessments during the school year in which they are enrolled in the courses. Students who are taking any of these five high school courses in middle school will also take the required EOC assessment. Students may not retake an EOC assessment that they have passed. EOC assessment scores are not included in students’ course grades.
Chapter 89: Adaptations for Special Populations
Subchapter AA: Commissioner’s Rules Concerning Special Education Services

RULE §89.1070: Graduation Requirements. (Students Entering High School Starting in 2014-15)

(a) Graduation with a regular high school diploma under subsections (b)(1), (b)(2)(D), (g)(1), (g)(2), (g)(3), or (g)(4)(D) of this section terminates a student’s eligibility for special education services under this subchapter and Part B of the Individuals with Disabilities Education Act and entitlement to the benefits of the Foundation School Program, as provided in Texas Education Code (TEC), §42.003(a).

(b) A student entering Grade 9 in the 2014-2015 school year and thereafter who receives special education services may graduate and be awarded a regular high school diploma if the student meets one of the following conditions.

(1) The student has demonstrated mastery of the required state standards (or district standards if greater) in Chapters 110-118, 126-128, and 130 of this title and satisfactorily completed credit requirements for graduation under the Foundation High School Program specified in §74.12 of this title (relating to Foundation High School Program) applicable to students in general education as well as satisfactory performance as established in the TEC, Chapter 39, on the required state assessments, unless the student’s admission, review, and dismissal (ARD) committee has determined that satisfactory performance on the required state assessments is not necessary for graduation.

(2) The student has demonstrated mastery of the required state standards (or district standards if greater) in Chapters 110-118, 126-128, and 130 of this title and satisfactorily completed credit requirements for graduation under the Foundation High School Program specified in §74.12 of this title through courses, one or more of which contain modified curriculum that is aligned to the standards applicable to students in general education, as well as satisfactory performance as established in the TEC, Chapter 39, on the required state assessments, unless the student’s ARD committee has determined that satisfactory performance on the required state assessments is not necessary for graduation. The student must also successfully complete the student’s individualized education program (IEP) and meet one of the following conditions.

(A) Consistent with the IEP, the student has obtained full-time employment, based on the student’s abilities and local employment opportunities, in addition to mastering sufficient self-help skills to enable the student to maintain the employment without direct and ongoing educational support of the local school district.

(B) Consistent with the IEP, the student has demonstrated mastery of specific employability skills and self-help skills that do not require direct ongoing educational support of the local school district.

(C) The student has access to services that are not within the legal responsibility of public education or employment or educational options for which the student has been prepared by the academic program.

(D) The student no longer meets age eligibility requirements.
Earning an Endorsement under the Foundation High School Program

(see HB165 on next page for update on graduation requirements)

(c) A student receiving special education services may earn an endorsement under §74.13 of this title (relating to Endorsements) if the student:

   (1) satisfactorily completes the requirements for graduation under the Foundation High School Program specified in §74.12 of this title as well as the additional credit requirements in mathematics, science, and elective courses as specified in §74.13(e) of this title with or without modified curriculum;

   (2) satisfactorily completes the courses required for the endorsement under §74.13(f) of this title without any modified curriculum; and

   (3) performs satisfactorily as established in the TEC, Chapter 39, on the required state assessments.

(d) Notwithstanding subsection (c)(3) of this section, a student receiving special education services classified in Grade 11 or 12 who has taken each of the state assessments required by Chapter 101, Subchapter CC, of this title (relating to Commissioner’s Rules Concerning Implementation of the Academic Content Areas Testing Program) or Subchapter DD of this title (relating to Commissioner’s Rules Concerning Substitute Assessments for Graduation) but failed to achieve satisfactory performance on no more than two of the assessments is eligible to receive an endorsement if the student has met the requirements in subsection (c)(1) and (2) of this section.

(e) In order for a student receiving special education services to use a course to satisfy both a requirement under the Foundation High School Program specified in §74.12 of this title and a requirement for an endorsement under §74.13 of this title, the student must satisfactorily complete the course without any modified curriculum.

(f) A student receiving special education services who entered Grade 9 before the 2014-2015 (content omitted)

(g) A student receiving special education services who entered Grade 9 before the 2014-2015 school year may graduate and be awarded a regular high school diploma if the student meets one of the following conditions.

(h) All students graduating under this section must be provided with a summary of academic achievement and functional performance as described in 34 Code of Federal Regulations (CFR), §300.305(e)(3). This summary must consider, as appropriate, the views of the parent and student and written recommendations from adult service agencies on how to assist the student in meeting postsecondary goals. An evaluation as required by 34 CFR, §300.305(e)(1), must be included as part of the summary for a student graduating under subsections (b)(2)(A), (B), or (C) or (g)(4)(A), (B), or (C) of this section.

(i) Students who participate in graduation ceremonies but who are not graduating under subsections (b)(2)(A), (B), or (C) or (g)(4)(A), (B), or (C) of this section and who will remain in school to complete their education do not have to be evaluated in accordance with subsection (h) of this section.

(j) Employability and self-help skills referenced under subsections (b)(2) and (g)(4) of this section are those skills directly related to the preparation of students for employment, including general skills necessary to obtain or retain employment.

(k) For students who receive a diploma according to subsections (b)(2)(A), (B), or (C) or (g)(4)(A), (B), or (C) of this section, the ARD committee must determine needed educational services upon the request of the student or parent to resume services, as long as the student meets the age eligibility requirements.

(l) For purposes of this section, modified curriculum and modified content refer to any reduction of the amount or complexity of the required knowledge and skills in Chapters 110-118, 126-128, and 130 of this title. Substitutions that are specifically authorized in statute or rule must not be considered modified curriculum or modified content.
House Bill No. 165
May 21, 2019
An ACT relating to providing for endorsements for public high school students enrolled in special education programs.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF TEXAS:

SECTION 1. Section 28.025, Education Code, is amended by adding Subsections (c-7) and (c-8) to read as follows:

(c-7) Subject to Subsection (c-8), a student who is enrolled in a special education program under Subchapter A, Chapter 29, may earn an endorsement on the student’s transcript by:

1. successfully completing, with or without modification of the curriculum:
   (A) the curriculum requirements identified by the State Board of Education under Subsection (a); and
   (B) the additional endorsement curriculum requirements prescribed by the State Board of Education under Subsection (c-2);

2. successfully completing all curriculum requirements for that endorsement adopted by the State Board of Education:
   (A) without modification of the curriculum; or
   (B) with modification of the curriculum,

provided that the curriculum, as modified, is sufficiently rigorous as determined by the student’s admission, review, and dismissal committee.

(c-8) For purposes of Subsection (c-7), the admission, review, and dismissal committee of a student in a special education program under Subchapter A, Chapter 29, shall determine whether the student is required to achieve satisfactory performance on an end-of-course assessment instrument to earn an endorsement on the student’s transcript.

SECTION 2. This Act applies beginning with the 2019-2020 school year.

SECTION 3. This Act takes effect immediately if it receives a vote of two-thirds of all the members elected to each house, as provided by Section 39, Article III, Texas Constitution. If this Act does not receive the vote necessary for immediate effect, this Act takes effect September 1, 2019.
State Programs Supporting Texas Students

The State of Texas has developed several programs to encourage students to pursue a strong academic high school program which will adequately prepare them for further study and to face challenges in the twenty-first century workplace. These programs focus on admissions, grants, tuition exemptions, and financial aid, which will enable well-prepared, eligible students to attend public and non-profit institutions of higher learning in the State of Texas. Some programs specify that students must graduate under the Distinguished Level of Achievement under the Foundation High School Program.

Top Ten Percent Admissions

Applicants from accredited Texas schools who graduate in the top ten percent of their high school class shall be admitted to a general academic institution if the students meet the following conditions:

- Distinguished level of achievement complete under the Foundation High School Program.
- Satisfied college Readiness standard on ACT or SAT
- Submit a completed application prior to filing deadlines set by the college
- Meet curriculum requirements established by college/university
- Provide additional documents requested by the college, including essays, letters of recommendations, admissions tests, high school transcript.

Note: Colleges may limit the number of first time freshmen eligible for admission due to enrollment caps (i.e., University of Texas). In some instances, students may be admitted to the university but not to the college of choice within the university. Colleges may admit students on a first-come-first-admitted basis or may use a lottery system.

There are several Texas grant opportunities for students. The four main ones are Toward EXcellence, Access, and Success (TEXAS) Grant Program, Texas Educational Opportunity Grant (TEOG), Texas Public Education Grant Program (TPEG), Tuition Equalization Grant Program (TEG). All require students to be a Texas Resident, be registered for Selective Service, or be exempt, demonstrate a financial need and be enrolled at least three-quarter time, with the exception TEOG, which requires half-time minimum enrollment. Both TEXAS and TEOG Grant Programs also require that the student cannot have been convicted of a felony or a crime involving a controlled substance. See below for more information.

Toward EXcellence, Access, and Success (TEXAS) Grant Program was established by the Texas Legislature to make sure that well-prepared high school graduates with financial need can go to college. The financial aid office at each college and university will determine the student’s eligibility.

Texas Educational Opportunity Grant (TEOG) provides grant aid to students with financial need that are enrolled in Texas public two-year colleges. In addition to requirements above, student cannot be concurrently receiving a renewal TEXAS Grant.

Texas Public Education Grant Program (TPEG) Public colleges or universities make TPEG awards from their own resources; therefore, only in-state colleges and universities may participate.

Tuition Equalization Grant Program (TEG) provides grant aid to students with financial need and enables students to attend private, non-profit colleges and universities in Texas.

### Course Offerings

The table lists all the high school course offerings with grade placement, credit, prerequisites, and some basic information on each course. This information serves as a brief overview of student requirements for high school graduation. Complete course descriptions will be found on the pages included. Course offerings are subject to change each year.

The following abbreviations appear in the table to indicate the type of course:

- **I** Independent Course - May receive credit for each semester passed. Students may enter or exit these courses at the end of the first semester. Students who are enrolled the entire year, pass the second semester and have a passing average for the year, earn one credit.

- **IS** Independent Sequential Course - May receive credit for each semester passed. Students may exit at the end of the first semester, but may not enter at mid-term. Students who are enrolled the entire year, pass the second semester, and have a passing average for the year earn one credit.

- **R** Courses are required during the year indicated on the chart.

- **E** Students may elect to take the course during the year shown and must meet prerequisites.

throughout the following TEKS strands: developing and sustaining meaningful collaboration and independent thought. This course connects listening, speaking, reading, writing, and thinking throughout the following TEKS strands: developing and sustaining foundational language skills; comprehension; response; multiple genres; author’s purpose and craft; composition; and inquiry and research. Students will engage in academic conversations, writing, and reading to facilitate critical thinking and adapt to the ever-evolving nature of language and literacy. Students will study the habits of the capable reader and the capable writer, establishing practices that will be applied to future endeavors. Students will encounter a diverse range of texts from multiple genres representing a broad range of authors, viewpoints, and literary traditions. Texts will include informational, literary, and multimodal (multimedia) texts. Students will write for a variety of purposes and study techniques appropriate to communicating their ideas with clarity and purpose.

**English II SOL (for Speakers of Other Languages)**

This course emphasizes continuing development of the fundamental English language skills of reading, writing, speaking and listening in an effort to continue to build the foundation for student success in advanced high school English classes. Included within the study are the identification of literary themes and forms, use of effective reading strategies, and development of speaking/listening skills. Instruction in such skills is accommodated to meet the varying needs of students who are at different stages of English language acquisition. The strategies and methodologies of English as a Second Language are utilized throughout this program that parallels with English I.

**English I SOL (for Speakers of Other Languages)**

This course focuses on the fundamental English language skills of reading, writing, speaking and listening in an effort to build a foundation for student success in advanced high school English classes. Students practice both reading and writing as a process. Students perform an array of reading strategies as they work to become proficient in understanding and responding appropriately to a variety of texts. Students write for varied audiences and purposes and work to develop ideas, voice, word choice, fluency, and organization in their writing while applying conventions of the English language. Instruction in such skills is accommodated to meet the varying needs of students who are at different stages of English language acquisition. The strategies and methodologies of English as a Second Language are utilized throughout this program that parallels with English I.

**English II**

In this course, students will continue to develop, strengthen, and broaden students’ literacy, communication skills, and analytical capabilities so that they become critical learners capable of both meaningful collaboration and independent thought. This course connects listening, speaking, reading, writing, and thinking throughout the following TEKS strands: developing and sustaining foundational language skills; comprehension; response; multiple genres; author’s purpose and craft; composition; and inquiry and research. Students will engage in academic conversations, writing, and reading to facilitate critical thinking and adapt to the ever-evolving nature of language and literacy. Students will study the habits of the capable reader and the capable writer, establishing practices that will be applied to future endeavors. Students will encounter a diverse range of texts from multiple genres representing a broad range of authors, viewpoints, and literary traditions. Texts will include informational, literary, and multimodal (multimedia) texts. Students will write for a variety of purposes and study techniques appropriate to communicating their ideas with clarity and purpose.

**English III**

This course presents advanced work in composition and reading. Students will continue to develop, strengthen, and broaden students’ literacy, communication skills, and analytical capabilities so that they become critical learners capable of both meaningful collaboration and independent thought. This course connects listening, speaking, reading, writing, and thinking throughout the following TEKS strands: developing and sustaining foundational language skills; comprehension; response; multiple genres; author’s purpose and craft; composition; and inquiry and research. Students will engage in academic conversations, writing, and reading to facilitate critical thinking and adapt to the ever-evolving nature of language and literacy. Students will study the habits of the capable reader and the capable writer, establishing practices that will be applied to future endeavors. Students will encounter a diverse range of texts from multiple genres representing a broad range of authors, viewpoints, and literary traditions. Texts will include informational, literary, and multimodal (multimedia) texts. Students will write for a variety of purposes and study techniques appropriate to communicating their ideas with clarity and purpose.
English III SSL (for Speakers of Other Languages)  1 credit
This course is designed for students previously enrolled in English I SOL and English II SOL and/or for speakers of other languages who need to develop proficiency in the use of English. The strategies and methodologies used to aid speakers of other languages in developing skills in English are utilized throughout this course. Thus, in considering the individual's oral proficiency and other academic competency skills in English, this course is accommodated to enhance the critical processes and features of second language acquisition. Focus of the course is on an overview of American literature, including samples of traditional and multi-ethnic selections that represent this country’s cultural diversity. Writing occurs in a variety of ways as appropriate. Correct English grammar and syntax are approached through direct instruction and/or through the writing process. Research is assigned as fits the students' needs and English skills. Practice in listening and speaking occurs throughout the course. Students write for varied audiences and purposes and work to apply effective ideas, voice, word choice, fluency, organization, and conventions in their writing. Instruction in such skills is accommodated to meet the varying needs of students who are at different stages of English language acquisition. The strategies and methodologies of English as a Second Language are utilized throughout this program that parallels with English II.

English III-Advanced Placement/HORIZONS  1 credit
English III H/AP covers the curriculum for the Advanced Placement English Language & Composition course, which focuses on the development and revision of evidence-based analytic and argumentative writing, the rhetorical analysis of nonfiction texts, and the decisions writers make as they compose and revise. During the course, students will evaluate, synthesize, and cite research to support their arguments. They will also read and analyze rhetorical elements and their effects in nonfiction texts – including images as forms of text – from a range of disciplines and historical periods. Writing assignments will include expository, analytical, and argumentative essays that require students to analyze and interpret nonfiction works. The AP English Language & Composition course aligns to an introductory college-level rhetoric and writing curriculum, and students may take the AP English Language Exam at the end of the course to earn college credit.

English IV SSL (for Speakers of Other Languages)  1 credit
This course is designed to aid speakers of other languages in developing skills in English and to take these speakers of other languages through a program of English composition and a variety of readings from British and World and contemporary literature. Strategies and methodologies for aiding these students in acquiring increasing competency in English are utilized throughout this course with accommodations in the English IV program occurring to meet the language learning needs of the individual student. Students write in a variety of forms, work on appropriate research skills, and use multiple strategies during the reading process. Appropriate and correct English grammar is approached through direct instruction and/or through the writing process. Opportunities for practice of listening and speaking are inherent in the course.

English IV Academic  1 credit
This course aligns with college learning outcomes and college and career readiness standards. Students will continue to develop, strengthen, and broaden students' literacy, communication skills, and analytical capabilities so that they become critical learners capable of both meaningful collaboration and independent thought. This course connects listening, speaking, reading, writing, and thinking throughout the following TEKS strands: developing and sustaining foundational language skills; comprehension; response; multiple genres; author’s purpose and craft; composition; and inquiry and research. Students will engage in academic conversations, writing, and reading to facilitate critical thinking and adapt to the ever-evolving nature of language and literacy.

Students will study the habits of the capable reader and the capable writer, establishing practices that will be applied to future endeavors. Students will encounter a diverse range of texts from multiple genres representing a broad range of authors, viewpoints, and literary traditions. Texts will include informational, literary, and multimodal (multimedia) texts. Students will write for a variety of purposes and study techniques appropriate to communicating their ideas with clarity and purpose. Successful completion of English IV with a grade requirement and completion of an in-class, timed, cumulative writing assessment qualifies a student to enroll in Freshman Composition at Lone Star without taking the TSI reading and writing assessment who qualify must enroll in Freshman Composition at Lone Star College within two years after graduation.

English IV-Advanced Placement/HORIZONS  1 credit
English IV H/AP covers the curriculum for the Advanced Placement English Literature & Composition course, which focuses on reading, analyzing, and writing about imaginative literature – fiction, poetry, and drama – from various time periods. Students will engage in close reading and critical analysis of imaginative literature to deepen their understanding of the ways writers use language to provide both meaning and pleasure to readers. During the course, students will consider a work’s structure, style, and themes, as well as its use of figurative language, imagery, and symbolism. Writing assignments will include expository, analytical, and argumentative essays that require students to analyze and interpret literary works. The AP English Literature & Composition course aligns to an introductory college-level literature and writing curriculum, and students may take the AP English Literature Exam at the end of the course to earn college credit.
Business English  

The Business English course allows students to enhance their reading, writing, computing, communication, and reasoning skills and apply them to the business environment. Students edit their work for clarity, engaging language, and the correct use of the conventions and mechanics of written English to produce final, error-free drafts for business reproduction. Having quality written and verbal communication is key to success in business as there is often no second chance to make a first impression. This course is designed for students graduating with an endorsement in Business and Industry.

- Grade 12
- Prerequisites: Successful completion of English I-III and satisfactory performance on English I and II end-of-course state assessment; Touch System Data Entry recommended.
- This course may satisfy the 4th English credit required for graduation on the Foundation High School Program.
- Note: Students selecting this course as their fourth English will not be eligible for the TSI waiver.

Research and Technical Writing  

As an advanced English course option, college ready seniors who have completed English I-III and passed STAAR End-of-Course for English I and II may choose this technical writing course. Students will skillfully research a topic and present that information in a variety of media. Emphasis will be on the research process and writing persuasive and informative texts. Students will publish writers. This course falls under the Arts and Humanities Endorsement.

- Grade 12
- Prerequisites: Successful completion of English I-III and satisfactory performance on English I and II end of course state assessment.
- This course may satisfy the fourth English Credit required for graduation on the Foundation High School Program.
- Note: Students selecting this course as their fourth English will not be eligible for the TSI waiver.
PACE

PACE- Personal, Academic, and Career Exploration
1/2 credit
This one semester course is designed to assist students in the transition from middle school to high school and build skills that will assist them in future transitions to career, college, adulthood, and independence. PACE will link relevant concepts so that students understand the "big picture" in preparing for life after high school while still in high school. Students will review and refine their 4-year plan already in place and will actively work to develop a personalized plan for life success based on their career aspirations. Coursework is focused around the skill areas of personal/social, academic, and career and life.
• Required in Grade 9
• The state required Speech TEKS are embedded in PACE.

OR

PACE Plus (English/Math/Science)       1 credit
This two-semester course is required of all 9th-grade students who did not pass all 8th-grade core academic classes (language arts, reading, math, science, and social studies) or who have not met the state standards on all 8th-grade reading, math, science, and social studies STAAR tests. Beginning ESL students, intermediate ESL students, and some special education students in need of academic support are also required to take this year-long class. The course must be taken in grade nine to fulfill Cypress-Fairbanks’ graduation requirements. PACE Plus is designed to assist students in the transition from middle school to high school and build skills that will assist them in future transitions to career, college, adulthood, and independence. This course will link relevant concepts so that students understand the "big picture" in preparing for life after high school while in high school. Students will review and refine their 4-year plan already in place and will actively work to develop a personalized plan for life success based on their career aspirations. Coursework is focused around the skill areas of personal/social, academic, and career and life.
• The state required Speech TEKS are embedded in PACE.

ACT/SAT Preparatory Strategies                      1/2 credit
This one-semester elective course is open to eleventh-grade students and fall semester twelfth-grade students who are college-bound and have successfully completed Algebra II or be concurrently enrolled in Algebra II. The course is designed to provide students with strategies to meet the academic requirements and demands of post-high school studies and to prepare students to successfully take college entrance exams. Units of study include preparation for college entrance exams (ACT and SAT), vocabulary expansion, objective test-taking skills, research and critical thinking, attitudes, goal setting, and time management. Strategies necessary for successfully reading, comprehending, and studying advanced-level content textbooks both in high school and in college will also be addressed.
• This course is noted on the transcript as Independent Study in English.
• Open to 11th- and 12th- grade students only
• Students may select to take the course for graduation credit or local credit. (Completion of Acknowledgement form is required.)

College Readiness & Study Skills                           1/2 credit
This one semester elective course is open to 12th-grade students who plan to attend post-secondary education. The course is designed to help students transition into the post-secondary environment. Units of study include becoming familiar with campus resources and services, determining college readiness, identifying personality styles and learning preferences, career exploration, time management, developing an academic plan for college, and addressing financial literacy.
• Open to 12th-grade students only
• L-level only

Creative and Imaginative Writing           1/2 or 1 credit
This study of creative and imaginative writing allows high school students to develop increased skill, creativity, and versatility as writers. In the class, students will be provided the time to write independently and to share and critique their writings with others. In their efforts to perfect selected pieces of work, students will be expected to demonstrate an understanding of the recursive nature of the writing process, applying the conventions of usage and the mechanics of written English. Throughout the year, students will study and create a variety of genres such as essays, short stories, poetry, and drama. As a means of extending their knowledge of effective techniques and forms of writing, students will critically examine models of various types written by professional authors.
• Grades 10-12
**READING**

Reading I-III  
1/2 - 3 credits  
Reading I, II, III offers students instruction in fluency, word study, vocabulary, and comprehension strategies. The curriculum emphasizes the six critical reading processes that are part of the state secondary reading curriculum and STAAR. Students are given opportunities to locate information in varied sources, to read critically, to evaluate sources, and to draw supportable conclusions. Students learn how various texts are organized, and how authors choose language for effects. All of these strategies are applied using reading material from all subject areas.

**JOURNALISM**

Photojournalism  
1/2 credit  
Photojournalism introduces students to the world of photography and journalism. The law, ethics, and history of photography complement the major units of study: operation and care of the digital camera, taking pictures, teamwork, and management skills. In addition, students will have opportunities to use state-of-the-art computer-aided publishing tools and other hands-on production tools.
- Students must have their own digital camera, and a fee will be charged for necessary photographic supplies.
- This course requires work outside of class to complete assignments.

Journalism I  
1 credit  
Students enrolled in Journalism write in a variety of forms for a variety of audiences and purposes. Students are expected to plan, draft, and complete written compositions on a regular basis, carefully examining their papers for clarity, engaging language, and the correct use of the conventions and mechanics of written English. Students will become analytical consumers of media and technology to enhance their communication skills. Writing, technology, and visual and electronic media are used as tools for learning as students produce effective communications. Journalism students will learn journalistic traditions, research self-selected topics, write journalistic texts, and learn the principals of publication.

Advanced Journalism I, II, III - Newspaper  
1 - 3 credits  
Students enrolled in Advanced Journalism: Newspaper I, II, III communicate in a variety of forms for a variety of audiences and purposes. Students are expected to plan, draft, and complete written and/or visual communications on a regular basis, carefully examining their copy for clarity, engaging language, and the correct use of the conventions and mechanics of written English. Students are expected to become analytical consumers of media and technology to enhance their communication skills. In addition, students will learn journalistic ethics and standards. Writing, technology, and visual and electronic media are used as tools for learning as students create, clarify, critique, write, and produce school newspapers.
- Students must have the recommendation of the publications teacher to enroll in this class.
- Courses must be taken in sequence.
- Prerequisite: Journalism I

Production of the newspaper may require 3 to 8 hours of after-school activities per week.

**SPEECH AND DEBATE**

Professional Communications  
1/2 credit  
This high school speech course is designed to provide opportunities for students to understand and develop effective interpersonal communication skills for the 21st Century. Professional Communications blends written, oral, and graphic communication in a career-based, business environment. Students will prepare, present, and evaluate a variety of multi-media presentations that are appropriate for the professional setting.
- Grades 9 – 12

Debate I, II, III  
1 - 3 credits  
Gaining a general understanding of the major forms of debate, studying logic and reasoning and learning to prepare and present actual debates, oratories, and extemporaneous speeches, are the objectives of this course in argumentation. Participation in competitive speech and debate events is a requirement for this class. Debate II-III build on the fundamentals and continue to develop speech and debate skills.
- Students must have the recommendation of the debate teacher to enroll in levels II and III.
- Courses must be taken in sequence.

Students involved in Speech/Debate competitions may be required to work after school to prepare. Preparation time will be limited to 8 hours per week on Monday through Thursday. After 2:30 on Friday, there is no limit on the number of hours students may work. Speech competitions are held on Friday evening and Saturday. Student fees for tournament competition are required.
Independent Study/Speech or Debate IV 1 credit
Activities designed for high achieving students to conduct research, produce original work in print or some other medium, develop an advanced speaking skill and study extensively in a specific area of interest are provided in this course. The prerequisites for enrollment in this course are three years of speech and teacher approval.

SOCIAL STUDIES

World Geography Studies 1 credit
In this course, students analyze the relationships between people, places, and environments. Students use problem-solving and decision-making skills to ask and answer geographic questions. A significant portion of the course will center around physical processes, places, and regions, the environment, the political, economic and social processes that shape cultural patterns, human systems such as population distribution and urbanization patterns, and the economic conditions which have led to and reinforced the developed and developing world.

- This course may be taken during the 9th or 10th grade to fulfill the first social studies requirement for the Foundation High School Program.

Human Geography-Advanced Placement/HORIZONS 1 credit
Human Geography is about making connections through the study of patterns and processes which shape human understanding, use, and modification of the Earth’s surface. In today’s world where places are increasingly interdependent, it is important to have an understanding of how events in one region of the world can have a major impact on events in other regions. Human Geography provides a framework to understand how this world is spatially organized and interdependent. In this rigorous course, students will develop a sophisticated view of the world enabling them to use geographic concepts and tools to make sense of why things happen where they do.

- This course of study is the equivalent of an introductory college course and is available to students interested in taking the Advanced Placement examination in World History Studies. This course may be substituted for World History Studies.
- This course may be taken during the 9th or 10th grade to fulfill the first social studies requirement for the Foundation High School Program.

World History Studies–Advanced Placement/HORIZONS 1 credit
The purpose of the Advanced Placement World History course is to develop greater understanding of world processes and contacts, in interaction with different types of human societies. Building on a short summary of cultural and institutional world history prior to 1200 C.E. (AD), the course focuses primarily on the last 1000 years of global experience. Using a chronological approach, the curriculum uses six major themes as unifying threads, helping students to put what is particular about each time period or society into a larger framework. Knowledge of major developments that illustrate or link the six thematic areas and of major civilizations in Asia, sub-Saharan Africa, Europe, and the Americas is expected. This course of study is the equivalent of an introductory college course and is available to students interested in taking the Advanced Placement examination in World History Studies. This course may be substituted for World History Studies.

- This course may be taken during the 9th or 10th grade to fulfill the first social studies requirement for the Foundation High School Program.

United States History 1 credit
This course is a required one-year study of the United States from 1877 to the present. The time span of the course is divided into units such as the Progressives, Civil Rights, and the Cold War. Within each unit events are looked at from several perspectives such as geographic, political, economic, social, and international influences. Emphasis is placed on relating the effects of past events to the present. The course is enriched with various activities which help students learn social studies skills as well as historical content.

- Prerequisite: World Geography or World History

United States History-Advanced Placement/HORIZONS 1 credit
The United States History AP course is designed to provide students with the analytical skills and factual knowledge necessary to deal critically with the problems and historical resources of U.S. history. Students will learn to assess historical materials to determine the relevance of those materials to a given problem, and to evaluate the reliability and importance of selected materials. Students will develop skills necessary to make informed judgments and to present reasons and evidence clearly and persuasively in essay format. This course of study is the equivalent of a college introductory course and is available to juniors or seniors interested in taking the AP examination in American history.

- Prerequisite: World Geography or World History
- Should a student enroll in United States History AP and drop the course at the end of the first semester, the student will have to take both semesters of U.S. History. In this situation, the first semester of U.S. History AP can count as an elective.
United States Government  1/2 credit
The primary objective of this required one-semester course is to prepare the student for decision-making within the framework of the American political system. The course begins with an overview of basic concepts found in all political systems, the philosophical background which led to our constitutional development, and the basic concepts found in the Constitution. The executive, legislative, and judicial branches of the federal government, including current issues of interest such as foreign affairs, will be studied. In addition, students study the fields of civil rights and liberties, political parties and suffrage, the Texas Constitution, and state and local government.
- Prerequisite: U.S. History

United States Government-Advanced Placement/HORIZONS  1/2 credit
The United States Government Advanced Placement course is designed to provide students with an analytical perspective on government and politics in the United States. This course involves both the study of general concepts used to interpret U.S. politics and the analysis of specific case studies. Students will also engage in an in-depth study of the various institutions, groups, beliefs and ideas that constitute the U.S. political system. Students are guided to use specific information critically to evaluate general propositions about government and politics, as well as to present basic data relevant to government and politics in sustained written arguments. This course of study is the equivalent of a college introductory course and is available to seniors interested in taking the Advanced Placement examination in U.S. Government.
- Prerequisite: U.S. History

European History-Advanced Placement/HORIZONS  1 credit
The Advanced Placement European History course focuses on European history from the High Renaissance (approximately 1450) to the present. The themes studied are intellectual and cultural history, political and diplomatic history, and social and economic history. Students will analyze historical evidence and learn to apply their analysis in essays and in multiple choice questions. The course is an elective and does not meet the state standards for substitution for the World History Studies required course.
- Prerequisite: U.S. History or concurrent enrollment
- May not substitute for World History Studies

Economics with Emphasis on the Free-Enterprise System and its Benefits  1/2 credit
This one-semester required course deals with the way that individuals and societies, particularly our society, have chosen to use scarce resources for the production of alternative goods. Students will learn how these scarce resources are distributed among the various peoples and groups in society. The course emphasizes the economic principles upon which the free enterprise system is based. Students will study the role government plays in this system and compare the American economic system to other types of economic systems. Students will also receive practical information in the field of personal finance.
- Prerequisite: U.S. History

Macro Economics-Advanced Placement/HORIZONS  1/2 credit
The Economics Advanced Placement course focuses on the concepts of macroeconomics by providing students an understanding of the principles of economics that apply to an economic system as a whole. Particular emphasis is placed on the study of national income and price determination. The course develops students' familiarity with economic performance measures, economic growth, and international economics. This course of study is the equivalent of a college introductory course and is available to seniors interested in taking the Advanced Placement examination in Macroeconomics.
- May substitute for required Economics
- Prerequisite: U.S. History

African-American Studies  1 credit
Ethnic Studies: African-American Studies focuses on the historical and cultural contributions of African Americans. This course is designed to assist students in understanding issues and events from multiple perspectives. This course develops an understanding of the historical roots of African American culture, especially as it pertains to social, economic, and political interactions within the broader context of United States history. It requires an analysis of important ideas, social and cultural values, beliefs, and traditions. Knowledge of past achievements provides citizens of the 21st century with a broader context within which to address the many issues facing the United States.
- Grades 10 - 12

Mexican-American Studies  1 credit
Ethnic Studies: Mexican American Studies course focuses on the historical and cultural contributions of Mexican Americans. Students explore history and culture from an interdisciplinary perspective. The course emphasizes events in the 20th and 21st centuries, but students will also engage with events prior to the 20th century. Students will utilize primary and secondary sources to learn about the complexities of the Mexican experience.
- Grades 10-12

Sociology  1/2 credit
Sociology is designed for students who are interested in enhancing their understanding of themselves and the society in which they live. The course deals with typical situations which people meet in their daily lives. Institutions, which are found in all societies, are studied, and emphasis is placed on the relationships people have within them. Study is also made of societal problems, including such topics as growing up, divorce, current events, etc.
- Grades 11-12

Personal Financial Literacy  1/2 credit
Personal Financial Literacy is designed to teach students how to analyze decisions involving earning and spending, saving and investing, credit and borrowing, insuring and protecting, and college and postsecondary education and training.
- Grades 10-12
Psychology

1/2 credit

Psychology is designed to acquaint students with the concept of human behavior. This elective provides a general introduction to the field of psychology. Specific topics include the following: learning and creativity, perception, theories of personality, human growth and development, and abnormalities. Psychology involves group work, laboratory experiments, independent reading/research, and active participation by the student.

• Grades 11-12

Psychology-Advanced Placement/HORIZONS

1/2 credit

The Psychology Advanced Placement course is designed to provide students with an analytical perspective about the field of psychology. After a general introduction to the methods, application, and history of the study of psychology, several areas of emphasis will be explored. These include sensation and perception, states of consciousness, learning, cognition, motivation and emotions, personality, abnormal psychology, and treatment of psychological disorders. The course is available to juniors and seniors interested in taking the Advanced Placement exam in Psychology.

• Grades 11-12

Special Topics in Social Studies – World Area Studies

1/2 - 1 credit

World Area Studies is designed to provide students the opportunity to study the geography, culture, history, politics, and economic development of selected regions and countries. Current world problems, such as population growth, global pollution, nuclear weapons, arms control, and world hunger will be explored. The regional studies will include an analysis of the issues and events pertinent to the area. Major regions of the world will be studied; however the course allows for flexibility regarding countries studied within each region as they relate to current events. Methods for resolving international problems will be analyzed.

• Grades 11-12
• K-level only

Special Topics in Social Studies-Street Law

1/2 - 1 credit

This elective course will give students a deeper understanding of the impact of criminal law and civil law upon their daily lives. Court structure, criminal procedure, civil rights, and other legal issues will be examined. This course is available to juniors and seniors only.

• Grades 11-12

MATHEMATICS

Algebra I

1 credit

In Algebra I, students will study linear, quadratic, and exponential functions and their related transformations, equations, and associated solutions. Students will connect functions and their associated solutions in both mathematical and real-world situations. Students will use technology, specifically the graphing calculator, to collect and explore data and analyze statistical relationships. In addition, students will study polynomials of degree one and two, radical expressions, sequences, and laws of exponents. Students will generate and solve linear systems with two equations and two variables and will create new functions through transformations.

• Prerequisite: Algebra I

Geometry

1 credit

In Geometry, students will build on the knowledge and skills for mathematics and will begin to focus on more precise terminology, symbolic representations, and the development of proofs. Students will explore concepts covering coordinate and transformational geometry; logical argument and constructions; proof and congruence; similarity, proof, and trigonometry; two- and three-dimensional figures; circles; and probability. Students will connect previous knowledge from Algebra I to Geometry through the coordinate and transformational geometry strand. Students will use technology, specifically the graphing calculator, to collect and explore data.

• Prerequisite: Algebra I

Algebra II

1 credit

In Algebra II, students will broaden their knowledge of quadratic functions, exponential functions, and systems of equations. Students will study logarithmic, square root, cubic, cube root, absolute value, rational functions, and their related equations. Students will connect functions to their inverses and associated equations and solutions in both mathematical and real-world situations. In addition, students will extend their knowledge of data analysis and numeric and algebraic methods. Students will use technology, specifically the graphing calculator, to collect and explore data and analyze statistical relationships.

• Prerequisite: Geometry

Precalculus

1 credit

Precalculus is the preparation for calculus. The course approaches topics from a function point of view, where appropriate, and is designed to strengthen and enhance conceptual understanding and mathematical reasoning used when modeling and solving mathematical and real-world problems. Students systematically work with functions and their multiple representations. The study of Precalculus deepens students' mathematical understanding and fluency with algebra and trigonometry and extends their ability to make connections and apply concepts and procedures at higher levels. Students investigate and explore mathematical ideas, develop multiple strategies for analyzing complex situations, and use technology, specifically the graphing calculator, to collect and understand, make connections between representations, and provide support in solving problems.

• Prerequisite: Algebra II
Calculus AB or BC-Advanced Placement/ HORIZONS

1 credit
The courses follow the AB or BC outline prescribed by the College Board and, as such, the Calculus AP test given in May for college placement is encouraged. Limits of functions, continuity, and derivatives are studied in detail. Both indefinite and definite integrals are explored, with applications to area and volume. The antiderivative, sequences and series, and differential equations are also included along with analytic geometry. The student will study the line, vectors in a plane, the circle, conics, relations, functions and their graphs, the intersections of loci, non-linear inequalities in the plane, parametric equations, polar coordinated, and solid analytic geometry. Computers and graphing calculators will be used extensively.
- Prerequisite: Precalculus

Statistics-Advanced Placement/HORIZONS

1 credit
This course follows the AP outline prescribed by the College Board. Distribution functions, and descriptive and inferential statistics will be studied. Students are encouraged to take the Statistics AP exam in May in order to earn college credit.
- Prerequisite: Algebra II

Mathematical Models with Applications

1 credit
Mathematical Models with Applications is designed to build on the knowledge and skills for mathematics and provides a path for students to succeed in Algebra II and prepares them for various post-secondary choices. Students learn to apply mathematics through experiences in personal finance, science, engineering, fine arts, and social sciences. Students use algebraic, graphical, and geometric reasoning to recognize patterns and structure, model information, solve problems, and communicate solutions. Students will select from tools such as physical objects; manipulatives; technology, including graphing calculators, data collection devices, and computers; and paper and pencil and from methods such as algebraic techniques, geometric reasoning, patterns, and mental math to solve problems.
- Prerequisite: Geometry

Statistics L

1 credit
In Statistics, students will build on the knowledge and skills for mathematics and will broaden their knowledge of variability and statistical processes. Students will study sampling and experimentation, categorical and quantitative data, probability and random variables, inference, and bivariate data. Students will connect data and statistical processes to real-world situations. In addition, students will extend their knowledge of data analysis. Students will use technology, specifically the graphing calculator, to collect and explore data.
- Prerequisite: Geometry

Algebraic Reasoning

1 credit
In Algebraic Reasoning, students will build on the knowledge and skills for mathematics and, continue with the development of mathematical reasoning related to algebraic understandings and processes, and deepen a foundation for studies in subsequent mathematics courses. Students will broaden their knowledge of functions and relationships, including linear, quadratic, square root, rational, cubic, cube root, exponential, absolute value, and logarithmic functions. Students will study these functions through analysis and application that includes explorations of patterns and structure, number and algebraic methods, and modeling from data using tools that build to workforce and college readiness such as probes, measurement tools, and software tools, including spreadsheets. Students will use technology, specifically the graphing calculator, to collect and explore data.
- Prerequisite: Geometry

Independent Study in Mathematics – College Algebra K

1 credit
In Independent Study in Mathematics, students will extend their mathematical understanding beyond the Algebra II level in a specific area or areas of mathematics. In College Algebra, students will study applications of Polynomial, rational, radical, absolute-Value, piecewise Defined, Exponential and logarithmic functions, equations, inequalities, graphing skills and systems of equations using matrices.
- Prerequisite: Algebra II
- K-level only

Independent Study in Mathematics – Advanced Algebra

1 credit
In Independent Study in Mathematics, students will extend their mathematical understanding beyond the Algebra II level in a specific area or areas of mathematics. In Advanced Algebra, students will study basic algebraic operations, solving linear equations and inequalities, laws of integer exponents, factoring, rational expressions, the Cartesian coordinate system, graphing lines, finding equations of lines and solving linear systems. In addition special products and factoring, rational expressions and equations, rational exponents, radicals, radical equations, quadratic equations, absolute value equations and inequalities, complex numbers, equations of lines, an introduction to the function concept, and graphing. Students will use technology, specifically the graphing calculator, to collect and explore data.
- Grade 12
- Prerequisite: Algebra II
- L-level only
- Successful completion of this course with a grade requirement qualifies a student to enroll in College Algebra at Lone Star.
Advanced Quantitative Reasoning  K  1 credit
In Advanced Quantitative Reasoning, students will develop and apply skills necessary for college, careers, and life. Course content consists primarily of applications of high school mathematics concepts to prepare students to become well-educated and highly informed 21st century citizens. Students will develop and apply reasoning, planning, and communication to make decisions and solve problems in applied situations involving numerical reasoning, probability, statistical analysis, finance, mathematical selection, and modeling with algebra, geometry, trigonometry, and discrete mathematics.
• Prerequisite: Algebra II
• K-level only

Accounting II  K  1 credit
Certification: Quickbooks Certified User
Students continue the investigation of the field of accounting in this advanced course, emphasizing corporate accounting and integrated financial analysis. Students reflect on this knowledge as they engage in various managerial and cost accounting activities. This course is vital for students planning to major in finance or seeking an entry-level position in accounting. This course satisfies a high school math graduation requirement.
• Grades 11 - 12
• Required prerequisites: Algebra II (or concurrent) and Accounting I
• Satisfies advanced course requirement for Business & Industry endorsement
• Quickbooks certification satisfies requirement to earn a performance acknowledgement.
• Lab supplies or fee may be required.

Robotics II  K  1 credit
In Robotics II K, students will explore artificial intelligence and programming in the robotic and automation industry. Through implementation of the design process, students will transfer academic skills to component designs in a project-based environment. Students will build prototypes and use software to test their designs.
• Grade 10-12
• Required prerequisite: Robotics I
• Program of Student Robotics
• Satisfies advanced course requirement for STEM endorsement
• FANUC Robot Operator 1 certification satisfies requirement to earn a Performance Acknowledgement
• Completing this course satisfies a math credit required for graduation
• K Level Only
The courses in this section are exclusively for identified gifted (HORIZONS) students and are designed to meet their specific nature and needs.

HORIZONS English I 1 credit
This course, designated for HORIZONS students only, follows the curriculum established for all levels of English I in the District (see English I course description). In addition, the course offers differentiated instruction to meet the needs of the HORIZONS student. Enrichment, extension, choice, and performance of independent projects is inherent in English I HORIZONS.

HORIZONS English II 1 credit
Limited to HORIZONS students only, this course follows the District English II curriculum. (See English II course description) The course is modified to meet the needs of HORIZONS students through insertion of differentiated offerings and instruction. Enrichment, extension, choice, and performance of independent projects are inherent in English II HORIZONS.

HORIZONS World Geography 1 credit
Limited to HORIZONS students only, this course is designed to provide ninth- to twelfth-grade HORIZONS students the opportunity to study the world as it is today. This course focuses on the major themes of geography. The curriculum includes an emphasis on physical geography of the world and human geography including historical, political, and economical developments of selected regions of the world. Environment and society will be emphasized by studying interaction of physical and human stems and identifying the central role of resources in the environment. Students will also develop geographic skills including the ability to acquire, arrange, and use geographic information.

HORIZONS World History Studies 1 credit
Limited to HORIZONS students only, HORIZONS World History will follow a thematic approach to the study of world history. Because these units of study are organized into themes, the course lends itself to extension into universal concepts. These themes include science and technology, civilizations, philosophy and belief systems, government, cooperation and conflict, and humanities. The curriculum allows gifted students to explore topics through problem solving, role-playing, simulations, and independent research.

Other Courses Appropriate for HORIZONS Students
HORIZONS students are encouraged to take the courses listed above along with other courses identified as appropriate for HORIZONS students. These courses may be identified as K-level or Advanced Placement and are available in the core academic areas of English, math, science, and social studies. HORIZONS students may also want to consider Advanced Placement courses in foreign language, technology applications, and art.

Integrated Physics and Chemistry 1 credit
IP&C Students conduct laboratory and field investigations, use scientific methods during investigations, and make informed decisions using critical thinking and scientific problem solving. The two disciplines are integrated in the topics of motion, waves, energy transformation, properties of matter, changes in matter, and solution chemistry. This course serves as a background for subsequent courses in chemistry and physics.
- Prerequisite: Biology

Biology 1 credit
Biology is the study of all living things. It is an investigation-oriented course which emphasizes cell structure and function, mechanisms of genetics, biological evolution and classification, biological processes and systems, and interdependence within environmental systems.

Chemistry 1 credit
In Chemistry, students conduct laboratory and field investigations, use of scientific methods during investigations, and make informed decisions using critical thinking and scientific problem solving. Students study a variety of topics that include characteristics of matter; use of Periodic Table, development of atomic theory and chemical bonding, chemical stoichiometry, gas laws, solution chemistry, thermochemistry, and nuclear chemistry. Students will investigate how chemistry is an integral part of our daily lives.
- Prerequisite: Biology and Algebra I

Physics 1 credit
In Physics, students conduct laboratory and field investigations, use scientific methods during investigations, and make informed decisions using critical thinking and scientific problem solving. Students study a variety of topics that include: laws of motion; changes within physical systems and conversion of energy and momentum; forces; thermodynamics; characteristics and behavior of waves; and atomic, nuclear, and quantum physics. Students who successfully complete Physics will acquire factual knowledge within a conceptual framework, practice experimental design and interpretation, work collaboratively with colleagues, and develop critical thinking skills.
- Prerequisites: Biology and completion of or concurrent with Algebra I

Academically Gifted Program

SCIENCE

IP&C Students conduct laboratory and field investigations, use scientific methods during investigations, and make informed decisions using critical thinking and scientific problem solving. The two disciplines are integrated in the topics of motion, waves, energy transformation, properties of matter, changes in matter, and solution chemistry. This course serves as a background for subsequent courses in chemistry and physics.
- Prerequisite: Biology

Biology is the study of all living things. It is an investigation-oriented course which emphasizes cell structure and function, mechanisms of genetics, biological evolution and classification, biological processes and systems, and interdependence within environmental systems.

Chemistry
In Chemistry, students conduct laboratory and field investigations, use of scientific methods during investigations, and make informed decisions using critical thinking and scientific problem solving. Students study a variety of topics that include characteristics of matter; use of Periodic Table, development of atomic theory and chemical bonding, chemical stoichiometry, gas laws, solution chemistry, thermochemistry, and nuclear chemistry. Students will investigate how chemistry is an integral part of our daily lives.
- Prerequisite: Biology and Algebra I

Physics
In Physics, students conduct laboratory and field investigations, use scientific methods during investigations, and make informed decisions using critical thinking and scientific problem solving. Students study a variety of topics that include: laws of motion; changes within physical systems and conversion of energy and momentum; forces; thermodynamics; characteristics and behavior of waves; and atomic, nuclear, and quantum physics. Students who successfully complete Physics will acquire factual knowledge within a conceptual framework, practice experimental design and interpretation, work collaboratively with colleagues, and develop critical thinking skills.
- Prerequisites: Biology and completion of or concurrent with Algebra I
Aquatic Science

In Aquatic Science, students study the interactions of biotic and abiotic components in aquatic environments, including impacts on aquatic systems. Investigations and fieldwork in this course will emphasize fresh water and marine aspects of aquatic science. Students who successfully complete Aquatic Science will acquire knowledge about a variety of aquatic systems, conduct investigations and observations of aquatic environments, work collaboratively with peers, and develop critical-thinking and problem-solving skills.

- Prerequisite: Culinary Arts and three units of science (including Biology and Chemistry)
- K Level Only

Astronomy

In Astronomy, students conduct laboratory and field investigations, use scientific methods, and make informed decisions using critical thinking and scientific problem solving. Students study the following topics: astronomy in civilization, patterns and objects in the sky, our place in space, the moon, seasons, gravity, spectroscopy, telescopes, planets, the sun, stars, galaxies, cosmology, and space exploration. Students who successfully complete Astronomy will acquire knowledge within a conceptual framework, conduct observations of the sky, work collaboratively, and develop critical-thinking skills.

- Prerequisite: Biology

Environmental Systems

In Environmental Systems students study: native plants and animals, endangered species, worldwide disasters, natural events such as world population changes, human impact on the environment and alternative solutions for resolving and/or preventing environmental problems. Students conduct laboratory and field investigations using scientific methods and make informed decisions using critical thinking and scientific problem solving.

- Prerequisite: Completed Biology and Integrated Physics and Chemistry (IPC) or Chemistry

Earth and Space Science (ESS)

ESS is a capstone course designed to build on students’ prior scientific and academic knowledge and skills to develop an understanding of Earth’s systems in space and time. Students will spend time studying the geosphere (solid Earth) hydrosphere (water), and atmosphere systems. Students will focus on how these systems interact with each other and how they interact with the biosphere (life). In addition, students will investigate how the Earth is part of the much larger solar and stellar systems.

- Prerequisite: Biology, Chemistry and completion or concurrent with 3rd Science
- Concurrent with 3rd math

Food Science K

In Food Science, Students conduct laboratory and field investigations, use scientific methods during investigations, and make informed decisions using critical thinking and scientific problem solving. Food Science is the study of the nature of foods, the causes of deterioration, the principles underlying food processing, and the improvement of foods for the consuming public.

- Grades 11 - 12
- Required prerequisite: Culinary Arts and three units of science (including Biology and Chemistry)
- K Level Only

Forensic Science K

In Forensic Science, students will learn terminology and investigative procedures related to crime scenes, questioning, interviewing, criminal behavior characteristics, truth detection, and scientific procedures used to solve crimes. Using scientific methods, students will collect and analyze evidence through case studies and simulated crime scenes such as fingerprint analysis. Students will learn the history, legal aspects, and career options for forensic science. This course is the recommended science course for the Public Services endorsement.

- Grades 11-12
- Required prerequisite: Biology and Chemistry
- Recommended prerequisites: Medical Terminology and Principles of Health Science.
- K Level only

Advanced Animal Science K

This course is designed for students preparing for careers in the field of animal science. Emphasis will be placed on the interrelatedness of human, scientific, and technological dimensions of livestock production. Instruction is designed to allow for the application of scientific and technological aspects of animal science through field and laboratory experiences.

- Grade 12
- Required prerequisite: Biology, Chemistry; and Vet Med or at least 1 credit of Animal Science courses (Small Animal, Equine Science, Livestock Prod.)
- K Level only

Advanced Plant and Soil Science K

Advanced Plant and Soil Science provides a way of learning about the natural world. Students should know how plant and soil science has influenced a vast body of knowledge, that there are still applications to be discovered, and that plant and soil science is the basis for many other fields of science. In this course, students will analyze such concepts as impact on production of food, fiber and other economic crops; factors within habitats and ecosystems; watershed, weathering, and erosion; along with origin and impact of fossil fuels and alternative energy sources.

- Grades 11-12
- Required prerequisites: Biology, Chemistry and Horticulture Science
- K Level only

Pathophysiology K

In Pathophysiology, students conduct laboratory and field investigations, use scientific methods during investigations, make informed decisions using critical thinking and scientific problem solving and demonstrate professional standards as related to business and industry. Students in Pathophysiology study disease processes and how humans are affected. Emphasis is placed on prevention and treatment of disease. Students will differentiate between normal and abnormal physiology.

- Grades 11-12
- Required Prerequisites: Biology and Chemistry
- Recommended prerequisites: Medical Terminology and Principles of Health Science
- K Level only
**Engineering Design and Problem Solving K**  1 credit  
Engineering Design and Problem Solving reinforces and integrates skills learned in previous mathematics and science courses. This course emphasizes solving problems, moving from well-defined toward more open-ended, with real-world application. Students apply critical thinking skills to justify a solution from multiple design options. This course is intended to stimulate students’ ingenuity, intellectual talents, and practical skills in devising solutions to engineering design problems in a project-based learning environment. Students use the engineering design process cycle to investigate, design, plan, create, and evaluate solutions. At the same time, this course fosters awareness of the social and ethical implications of technological development.  
- Grades 11-12  
- Required Prerequisites: Algebra II, Chemistry, and Physics (or concurrent) and Engineering and Design Presentation I  
- K Level only

**Anatomy and Physiology K**  1 credit  
Anatomy and Physiology is a college preparatory course designed to extend the student’s knowledge and understanding of the human body in respect to its structure (anatomy) and function (physiology). A survey of each organ system is presented with initial emphasis upon its anatomy, followed by an enhanced study of its physiology. This course is lab-oriented and teaches proper dissection techniques as well as evaluating the cause and effect of disease, trauma, and congenital defects on the structure and function of cells, tissues, organs, and systems. This course is recommended for students pursuing an education in the medical sciences.  
- Grades 11-12  
- Required prerequisite: Biology and Chemistry  
- Recommended prerequisites: Medical Terminology and Principles of Health Science  
- K Level only

**Biology-Advanced Placement**  1 credit  
Biology AP is a college preparatory course designed to extend the understanding of biology concepts. Major emphasis is placed on the latest theories and concepts dealing with molecular biology, biochemistry, cellular processes, human genetics, and bioethics. Other topics include plant and animal taxonomy, ecology, and evolution. The course is also heavily lab-oriented to familiarize the student with some of the techniques and processes currently used in scientific research. This course is recommended for students planning to major in any area of science in college. Students who take the course will be prepared for the AP Biology exam.  
- Prerequisites: Biology and Chemistry

**Chemistry-Advanced Placement**  1 credit  
Comparable to a first-year college course, this course is an in-depth study of the principles and concepts in chemistry. Students are required to demonstrate an understanding of these principles through application in a laboratory situation. Content includes structure and bonding, stoichiometry, thermodynamics, kinetics, and quantitative analysis. This course is designed toward advanced placement for the college-bound student. Students who take the course will be prepared for the AP Chemistry exam.  
- Prerequisite: Chemistry and Algebra II

**Environmental Science-Advanced Placement**  1 credit  
This course will provide students with the scientific principles, concepts, and methodologies required to understand the interrelationships of the natural world, to identify and analyze environmental problems both natural and human-made, to evaluate the relative risks associated with these problems, and to examine alternative solutions for resolving and/or preventing them. Students who take the course will be prepared for the AP Environmental Science exam.  
- Prerequisite: Biology and Chemistry

**Physics I-Advanced Placement**  1 credit  
AP Physics I is the equivalent of a first semester college course in algebra based physics but it is designed to be taught over a full academic year to enable AP students to develop deep understanding of the content and to focus on applying their knowledge through inquiry labs. The course covers Newtonian mechanics (including rotational dynamics and angular momentum); work, energy, and power; mechanical waves and sound. It also introduces electric circuits. The course may substitute for Physics.  
- Prerequisite: completion of or concurrent in Algebra II  
- Medical Focus

**Physics II-Advanced Placement**  1 credit  
In AP Physics II, students learn about the laws that govern the world around by studying Thermodynamics, Fluids, Electrostatics, Magnetism, and Modern Physics. Through inquiry-based learning, students will develop critical thinking and reasoning skills. AP Physics II is the equivalent of a second semester algebra-based physics college course; however, it is designed to be taught over a full academic year to enable AP students to develop deep understanding of the content and to allow for more time on inquiry labs. Students who take the course will be prepared for the AP Physics II exam.  
- Prerequisite: AP Physics I and completion or concurrent enrollment in Precalculus  
- Medical Focus

**Physics C-Advanced Placement**  2 credits  
AP Physics C is a second year physics course. In AP Physics C students will explore the laws that govern the world around them in even more depth and with more emphasis on the mathematics. Students will study principles of mechanics, electricity, and magnetism. Considerable emphasis is placed on laboratory investigation and student research. AP Physics C is the equivalent of calculus-based college physics (often for engineers and science majors) and is designed toward advance placement for the college-bound student. Students who take the course will be prepared for the AP Physics C exams.  
- Prerequisites: Physics or AP Physics I and completion of or concurrent enrollment in Calculus.  
- Engineering Focus
Students may take any two levels of the same foreign language to meet the requirements for the Foundation High School Program.

**MODERN LANGUAGES: FRENCH, GERMAN, SPANISH**

**Level I**
1 credit
The goal of the study of modern languages is communicative competence. This introduction course introduces students to language and develops novice-level proficiency in speaking, listening, reading, and writing. At the end of the course, students are expected to reach a Novice Mid-Novice High proficiency level and be able to engage in simple conversations within the limits of practiced vocabulary and structure. Students will also gain perspective and insight into the cultures of the countries where the language is spoken. Classes are conducted in the language as much as possible.

**Level II**
1 credit
Level II provides opportunities to further develop students' novice-level proficiency in listening, speaking, reading and writing for communicative competence. Emphasis is placed on expanding vocabulary from memorized words and phrases to sentence level discourse. Students will also continue to gain insight into the culture perspectives, products and practices of the countries where the language is spoken. By the end of the course, students are expected to reach a Novice High-Intermediate Low proficiency level. Classes are conducted in the language as much as possible.

**Level III (L or K)**
1 credit
Level III classes are conducted in the language and provide opportunities to develop intermediate language proficiency in speaking, listening, reading and writing. By the end of the course students should have adequate control of basic structural patterns and should be able to express themselves at a paragraph level. In addition, students will have a deeper understanding of the language and cultural perspectives associated with it. At the end of the course, students are expected to reach an Intermediate Low-Intermediate Mid proficiency level.

**Level IV K or AP, V K or AP, and VI K**
1 - 3 credits
While there is a continued emphasis on proficiency, the Level IV-VI class, which is conducted in the language, pursues a more in-depth study of language, culture, and literature. Refinement of grammatical concepts and vocabulary enrichment are stressed. At the end of levels IV and V students have the option to take the Advanced Placement Exam.

**Spanish for Native Speakers I**
1 credit
This course is for learners who have a Spanish language background. Students will further develop and improve their proficiency in listening, speaking, reading, and writing. Emphasis is placed on students' communicative competence in both formal and informal situations.

**Spanish or Native Speakers II / III K**
2 credits
This course is for students who have successfully completed Spanish for Native Speakers I or received an 80+ on the district placement test. Students will complete Spanish II during the first semester and Spanish III K in the second semester. Both courses will focus on the refinement of reading and writing skills. Students must pass the first semester with a 70+ to be eligible for III K in the spring. Successful completion of these two courses will prepare students to take Spanish for Native Speakers IV AP the following year.

**Spanish for Native Speakers IV AP**
1 credit
Spanish for Native Speakers IV AP is designed for students who have successfully completed Native Speakers II / III K. This course will follow the College Board expectations and will prepare students to take the Spanish Language AP Exam in the spring.

**CLASSICAL LANGUAGES: LATIN**

**Latin I**
1 credit
This course introduces students to Latin and focuses on the development of skills in reading and writing, with an emphasis on reading comprehension, the development of both oral and written skills and vocabulary derivatives. Studies of the ancient Roman world, daily life, mythology and history are included.

**Latin II**
1 credit
As the course continues, new grammar and structural concepts are included with an increased emphasis on reading, writing, speaking and listening and the culture of the Roman Empire.

**Latin III K – IV K or AP**
1 - 2 credits
Latin III emphasizes the work of major Latin authors with an introduction of Cicero. Latin IV introduces Virgil and The Aeneid. In both courses, focus is on the continued development of the four language skills. Students in Level IV will follow the College Board Advanced Placement Curriculum and will have the option of taking the Advanced Placement Exam.

**PROGRAMMING LANGUAGES**

The following computer programming courses may satisfy the LOTE requirement for graduation:

- Computer Science Principles AP
- Computer Science I K
- Computer Science II K
- Computer Science III K

* Colleges and universities set their own entrance requirements. Consequently, a student should verify admission requirements with the specific college/university.
Computer Science Principles AP 1 credit
The AP Computer Science Principles course will introduce students to the essential ideas of computer science and show how computing and technology can influence the world. Students will creatively address real-world issues and concerns while using the same processes and tools as artists, writers, computer scientists, and engineers to bring ideas to life.
- Grades 9 - 12
- Required prerequisite: Algebra I
- Recommended to be taken prior to or concurrent with Computer Science II K
- May not be taken post Computer Science III K
- Lab supplies or fee may be required.

Computer Science I K 1 credit
Computer Science I K is an introduction to the automated processing of information, including computer programming. This course gives students the conceptual background necessary to understand and construct programs, including the ability to specify computations, understand evaluation models, and utilize major constructs such as functions and procedures, data storage, conditionals and looping. At the end of this course, students should be able to read and write small programs in the language of Java in response to a given problem or scenario, preparing them to continue on to Computer Science II K.
- Grades 9 - 12
- Required prerequisite: Algebra I
- Lab supplies or fee may be required.

Computer Science II K (AP A Test Prep) 1 credit
Computer Science II K is a programming course designed to cover the Advance Placement (AP) Computer Science AP A Exam topics. The curriculum will build upon the topics addressed in Computer Science I K. Object-oriented components in the language of Java will be stressed. Other topics include decision making, looping, arrays, inheritance, interfaces, abstract classes, Java collections, sorting, searching, and the AP Case Study.
- Grades 10 - 12 (9th graders may enroll if concurrent with Algebra II)
- Required prerequisite: Algebra II or concurrent; Computer Science I K or Geometry K and prior programming experience
- Lab supplies or fee may be required.

Computer Science III K 1 credit
Computer Science III K is a continuation of Computer Science II K and builds upon such topics as object-oriented programming, inheritance, and classes. Students go on to address advanced topics such as stacks, queues, advanced recursion, linked lists, binary trees, and advanced sorting, and searching topics in preparation for and alignment with college-level computer science.
- Grades 11 - 12
- Required prerequisite: Computer Science II K
- Satisfies advanced course requirement for STEM endorsement.
- Oracle Java SE 8 Programmer or MTA Intro to Java Programming certifications satisfy the requirement to earn a performance Acknowledgment.
- Lab supplies or fee may be required.
**Off Campus PE**
Students may also meet the physical education requirements if they participate in a district-approved Olympic caliber, off-campus training program. Contact the school counselor for more information.

**Athletics**
Athletics is offered each year of high school and includes choices from twenty different sports for both men and women. A student enrolled in Athletics may earn a maximum of four credits toward graduation. Athletics is an instructional model designed to provide athletes with an authentic, in-depth sport experience. It is intended to move isolated skill practice into sequential, progressive, and realistic game situations with the primary objective of developing highly competitive team members. Taking responsibility for personal and social behavior, and respecting differences among people in sport settings are all inherent within the team model. Athletes are actively engaged in the sport of choice, working on skills for game play situations under the direction of their head coach. Students are placed in athletics as the result of student performance criteria conducted in pre-season tryout sessions and ultimate recommendation from the head coach. Students elected to participate must maintain academic eligibility as mandated by the University Interscholastic League. In the school, due to the rigorous nature of assigned workouts, a current UIL medical physical is required for enrollment and participation in the class.

In accordance with UIL rules, schools limit practice for in-season athletic activities to a maximum of eight hours per school week (Monday through Friday until 2:30 p.m.) per activity, in addition to a maximum of 60 minutes per school day, Monday through the end of the school day on Friday. One athletic competition may be held outside of school Monday through Thursday. After 2:30 p.m. on Friday and on Saturday, practice time and/or competitions are not limited by UIL. A schedule will be provided regularly by the coach/school.

**Health**

1/2 credit

In Health, students develop skills, including CPR that will make them health-literate adults. Students gain a deeper understanding of the knowledge and behaviors they use to safeguard their health, particularly pertaining to health risks. Students are taught how to access accurate information that they can use to promote health for themselves and others. Students use problem-solving, research, goal-setting and communication skills to protect their health and that of the community. Specific topics in the abstinence-based sex education curriculum include decision-making concerning dating, love, relationships, and marriage and family. Other issues addressed are the problems of teen pregnancy and parenthood, sexually transmitted diseases, sexual harassment and abuse, rape prevention and the failure rate of contraceptive methods when used either to prevent pregnancy or disease. Parents will have an opportunity to attend a preview night of the curriculum. Also, take-home assignments will provide avenues for parent/student communication. Because of the sensitive nature of these topics and the information about lifelong choices, students should consider their goals and maturity level when choosing the best time to take this course. With parent permission, this course may be delayed until grade 11 or 12, or taken by correspondence. The health requirement may also be met by successful completion of one credit of Principle of Health Science or students may take Anatomy and Physiology and receive credit for health upon successful completion of the health credit-by-exam.

**Principles of Health Science** 1 credit

This course is designed for students interested in medical and associated health careers. It gives an overview of the therapeutic, diagnostic, environmental, and informational systems of the health care industry. Topics include career requirements, medical history, trends in financing health care, ethical and legal responsibilities, human anatomy and physiology as related to the health care profession, client care, safety, first aid, and CPR. This course prepares the student for the transition to clinical and/or work-based experiences available in the advanced health science courses.

- Grades 10 – 12
- Completion of this course satisfies the health credit required for graduation.
- Lab supplies or fee may be required.

**Fine Arts**

Additional supplies and/or supply fees may be required.

Students develop skills in observation, problem solving, visual communication, manipulation of art media, self-expression, and critique. The student is responsible for paying a course fee: fees are determined at the campus level. Additional supplies and/or supply fees may be required. Only one state credit may be earned from the following Art I courses: Art I DP or Art I S or Art I P or Art I DM.

**Art I Drawing and Painting** 1 credit

Art I Drawing and Painting is a foundation course that uses 2D and 3D materials with an emphasis on drawing and painting. Students will explore the Elements of Art and apply the Principles of Design in planning, developing and creating original works of art. While tackling creative challenges, students will study techniques, contemporary artists and art history as they make cultural connections and explore realities, relationships, and ideas. Students will develop a portfolio that demonstrates an understanding of a variety of media and problem-solving skills. One full credit (2 sequential semesters) must be earned in Art I for entry into a Level II art course.

- A student may only earn one Art I credit.

**Art I Sculpture and Ceramics** 1 credit

Art I Sculpture and Ceramics is a foundation course that uses 3D and 2D materials with an emphasis on sculpture and ceramics. Students will explore the Elements of Art and apply the Principles of Design in planning, developing and creating original works of art. While tackling creative challenges, students will study techniques, contemporary artists and art history as they make cultural connections and explore realities, relationships, and ideas. Students will develop a portfolio that demonstrates an understanding of a variety of media and problem-solving skills. One full credit (2 sequential semesters) must be earned in Art I for entry into a Level II art course.

- A student may only earn one Art I credit.
Art I Photography 1 credit
Art I Photography is a foundation course with an emphasis on photographic media. Design elements and principles, history of art, art criticism as well as basic skills in drawing, color theory, and electronic media will be covered. Students will develop skills of observation, problem solving, and visual communication, manipulation of art media, and self-expression.
One full credit (2 sequential semesters) must be earned in Art I for entry into a Level II art course.
• A student may only earn one Art I credit.
• Having a Digital SLR camera of their own is beneficial to students taking this class.

Art I Digital Art and Media 1 credit
Art I Digital Art and Media is a foundation course that uses computers and other digital media along with 2D and 3D materials. Students will explore the Elements of Art and apply the Principles of Design in planning, developing and creating original works of art. While tackling creative challenges, students will study techniques, contemporary artists and art history as they make cultural connections and explore realities, relationships, and ideas. Students will develop a portfolio that demonstrates an understanding of a variety of media and problem-solving skills.
Having a Digital SLR camera of their own is beneficial to students taking this class.

One full credit (2 sequential semesters) must be earned in Art I for entry into a Level II art course.
• A student may only earn one Art I credit.

Art II Drawing/Painting 1 credit
This second-year art course provides students who have successfully completed an Art I course an opportunity to further develop their drawing and painting skills through the use of advanced concepts and processes. Development of a portfolio is required.
• Prerequisite: Art I DP, Art I S, Art I P, or Art I DM

Art II Sculpture/Ceramics 1 credit
This second-year art course provides students who have successfully completed an Art I course an opportunity to further develop their three-dimensional skills through the use of advanced concepts and processing in clay and a variety of other media. Development of a portfolio is required.
• Prerequisite: Art I DP, Art I S, Art I P, or Art I DM

Art II Photography 1 credit
This second-year art course focuses on techniques that will aid students in expressing their ideas. Students will work in color and black and white, with various camera types and formats, explore alternative photographic processes and digital media as well as working to further their own personal vision. Design principles, elements of art, history of art and art criticism learned in Photo I will be built upon in Photo II. Students will also build skills of critical thinking, problem solving, and aesthetics. Development of a portfolio is required.
• Prerequisite: Art I DP, Art I S, Art I P, or Art I DM
• Having a Digital SLR camera of their own is beneficial to students taking this class.

Art II Digital Art and Media 1 credit
This second year art course focuses on creating art works that communicate visual ideas and concepts by incorporating the elements/principles of design and drawing skills into a digital format. Various design software such as Adobe Photoshop, Illustrator, and other software will be explored. Emphasis will be placed on creativity, originality, and problem-solving skills.
• Prerequisite: Art I DP, Art I S, Art I P, or Art I DM
• Having a Digital SLR camera of their own is beneficial to students taking this class.

Art III Design 1 credit
This second-year art course provides students who have successfully completed an Art I course an opportunity to focus on creating art works that communicate visual ideas and concepts by incorporating the elements/principles of design through 2D and/or 3D art mediums. Development of a portfolio is required.
• Prerequisite: Art II DP, Art II S, Art II P, or Art II DM
• Must be approved by teacher.

Art III Drawing/Painting 1 credit
This third-year course provides an in-depth study of the concepts, techniques, and self-expression of drawing and painting on an advanced level. Completion of a cohesive portfolio is required.
• Prerequisite: Art II Drawing/Painting

Art III Sculpture/Ceramics 1 credit
This third-year course provides an in-depth study of the concepts, techniques, and self-expression of 3D artwork on an advanced level. Completion of a cohesive portfolio is required.
• Prerequisite: Art II Sculpture/Ceramics

Art III Photography 1 credit
This third-year course provides an in-depth study of the concepts, techniques, processes, and self-expression through photography on an advanced level. Completion of a cohesive portfolio is required.
• Prerequisite: Art III Photography
• Having a Digital SLR camera of their own is beneficial to students taking this class.

Art III Digital Art and Media 1 credit
This third-year course provides an in-depth study of digital concepts, techniques, and self-expression on an advanced level. Completion of a cohesive portfolio is required.
• Prerequisite: Art II Digital Art and Media
• Having a Digital SLR camera of their own is beneficial to students taking this class.

Art III Design 1 credit
This third-year course provides an in-depth study of the concepts, techniques, and self-expression of 2D and/or 3D art work on an advanced level. Completion of a cohesive portfolio is required.
• Prerequisite: Students must have completed the Level II Art course in the same series.
• Must be approved by teacher.
Art IV Studio – Drawing/Painting, Sculpture/Ceramics, Photography, Digital Art and Media or Design

1 credit

The experiences given and skills developed in the first three levels of art courses prepare students for in-depth study of special problems based on their previous credits. They will produce a body of artwork in their chosen area of art (drawing, painting, sculpture, ceramics, electronic media, photography, printmaking) and develop evaluative criteria for selecting artworks to include in a portfolio. Preparation of a portfolio is required.

- Prerequisite: Students must have completed the Level III art course in the same series
- Having a Digital SLR camera of their own is beneficial to students taking Digital Art Media or Photography classes.

ADVANCED PLACEMENT ART COURSES

Students can take AP at either the Art III or Art IV Level.

These courses are designed to help students mature as artists and find their personal style and direction. Students will be continuously involved in the investigation of formal and conceptual issues. The student will work towards developing a strong cohesive portfolio that meets the AP requirements in quality, concentration, and breadth.

AP Art - Drawing
AP Art - 2D Design*
AP Art – Photography (see AP – Art 2D)*
AP Art – Digital Art and Media (see AP – Art 2D)*
AP Art - 3D Design

- Prerequisite: Juniors or seniors who have completed Art II course
- Additional supplies and/or supply fees may be required.

*Student may only take 1 of these AP courses.

AP Art – 2D Design

The Two-Dimensional Design Advanced Placement portfolio is intended to address a very broad interpretation of two-dimensional design issues. This type of design involves purposeful decision-making about how to use the elements and principles of art in an integrative way. For this portfolio, students are asked to demonstrate proficiency in two-dimensional design using a variety of art forms. These could include, but are not limited to, photography, mixed media, digital art and media, painting, and printmaking. The portfolio is submitted as both original pieces and as digital images of selected pieces that represent the student’s best works and includes a written statement defining the student’s focus of concentration.

- Prerequisite: Students must have completed a Level II course

AP Art – 3D Design

The 3D Design portfolio course is intended to address a very broad interpretation of sculptural issues in depth and space. Such elements and concepts can be articulated through additive, subtractive, and/or fabrication processes. A variety of approaches might include jewelry, traditional sculpture, architectural models, apparel, ceramics, fiber arts, or metal works. The portfolio is submitted as digital images of selected pieces that represent the student’s best works and includes a written statement defining the student’s focus of concentration.

- Prerequisite: Students must have completed a Level II course
AP Art – Photography 1 credit
(another 2D design option)
The Two-Dimensional Design Advanced Placement portfolio is intended to address a very broad interpretation of two-dimensional design issues. This type of design involves purposeful decision-making about how to use the elements and principles of art in an integrative way. For this portfolio, students are asked to demonstrate proficiency in two-dimensional design using a variety of art forms. These could include, but are not limited to, photography, mixed media, digital art and media, painting, and printmaking. The portfolio is submitted as both original pieces and as digital images of selected pieces that represent the student’s best works and includes a written statement defining the student’s focus of concentration.

- Prerequisite: Students must have completed a Level II course
- Having a Digital SLR camera of their own is beneficial to students taking this class.

AP Art – Digital Art and Media 1 credit
(another 2D design option)
The Two-Dimensional Design Advanced Placement portfolio is intended to address a very broad interpretation of two-dimensional design issues. This type of design involves purposeful decision-making about how to use the elements and principles of art in an integrative way. For this portfolio, students are asked to demonstrate proficiency in two-dimensional design using a variety of art forms. These could include, but are not limited to, photography, mixed media, digital art and media, painting, and printmaking. The portfolio is submitted as both original pieces and as digital images of selected pieces that represent the student’s best works and includes a written statement defining the student’s focus of concentration.

- Prerequisite: Students must have completed a Level II course
- Having a Digital SLR camera of their own is beneficial to students taking this class.

AP Art History 1 credit
Students will explore and examine the form, function, content, and context surrounding various artworks and works of architecture from ancient to contemporary periods from a variety of cultures. Students are expected to prepare for the College Board examination through the course.

- Juniors or seniors
- A level-I Fine Arts credit is a required prerequisite

FLORAL DESIGN

Floral Design 1 credit
This course is designed to develop a student’s ability to identify and demonstrate the principles and techniques related to floral design as well as develop an understanding of the management of floral enterprises. Horticulture systems, career opportunities, entry requirements, and industry expectations will also be covered.

- Grades 10-12
- Required prerequisite (or concurrent): Principles of AFNR for 10th graders
- Completing this course satisfies a fine arts credit required for graduation.
- Lab supplies or fee may be required.

THEATRE ARTS

Additional supplies and/or supply fees may be required.

Theatre Arts I 1 credit
The purpose of this course is to cover the fundamentals of acting and theatrical production. Classroom activities include mime/pantomime, improvisation, characterization, and technical theatre. Emphasis will be placed on a variety of in-class performances and individual / group presentations.

- Completion of a previous level I theatre course required

Theatre Arts II-IV 1 - 3 credits
These courses are designed for the student who shows continued interest in theatre arts, and wishes to take advanced courses in theatre production. Emphasis will be placed on a variety of in-class performances and individual/group presentations. Students may have the opportunity to participate in class / campus events and productions.

- Prerequisite: Teacher recommendation

Theatre Production I 1 credit
The purpose of this course is to study acting and / or technical theatre, and the relationship(s) to the productions process. Emphasis will be placed on in-class performances and individual /group presentations. Students may have the opportunity to participate in campus events and productions.

- Prerequisite: Teacher recommendation
THEATRE

Theatre Production II-IV 1 - 3 credits
The purpose of these courses is to continue the study of acting and technical theatre, and the relationship(s) to the production process. Emphasis will be placed on in-class performances and individual/group presentations. Students may have the opportunity to participate in campus events and productions.
- Prerequisite: Teacher recommendation
- Completion of a previous level I theatre course required

Technical Theatre I 1 credit
The purpose of this course is to develop knowledge and application of skills related to technical theatre. Topics will include: scenery, lighting, sound, costuming, hair / makeup, marketing / publicity, and their relationship to the overall theatrical process.
- Students taking only one semester must be scheduled in the fall.

Technical Theatre II-IV 1 - 3 credits
The purpose of this course is to continue the application of skills related to technical theatre. Topics will include: scenery, lighting, sound, costuming, hair / makeup, marketing / publicity, and their relationship to the overall theatrical process. Students may have the opportunity to participate in campus events and productions.
- Prerequisite: Teacher approval
- Completion of a previous level I of theatre course required.

MUSIC

Student costs for band, choir, and orchestra programs are determined at the campus level. Required costs could include instruments, repairs, accessories and uniform costs. Optional costs could include fees for region auditions, solo and ensemble contest, accompanists, trip costs, fair-share donations and private lessons. Parents with financial need should reach out to the head director of their selected program.

Band I-IV 1/2 - 4 credits
Band students receive instruction on both marching and concert fundamentals. During marching season, students learn marching fundamentals, marching chart reading, how to play and march simultaneously, spatial awareness, kinesthetic awareness and movement memory. A variety of musical styles are performed. Physical conditioning is also emphasized. Concert season is ongoing and provides students an opportunity to continue musical growth and experience music literature. Individual, small, and large ensemble concepts and skills are emphasized. The high school band program provides multiple levels of band classes during the school day. Instructional priorities include instrumental technique, musicianship, critical listening, cultural growth, basic music theory, creative self-expression, rehearsal and concert etiquette, self-discipline, responsible citizenship, effective communication, problem solving, and production of quality products. Students are placed in each level by specific performance criteria including an audition.

Choral Music I-IV 1/2 - 4 credits
This course is designed to develop and refine music reading skills and to encourage artistic expression through choral singing. Rehearsals focus on choral techniques through proper vocal production. Theory and sight-reading techniques are also emphasized with continued development of the knowledge and skills in musicianship and performance. Students will sing literature from the Renaissance to popular and show choir music. This enables the students to gain an appreciation for different vocal styles, composers, form, periods, and cultures. Choir classes are ability-based and placement is determined by various performance criteria developed by the choral staff and may include an audition. A student with no prior experience may enroll in the program and will be placed in the appropriate group by the director. Attendance at after-school rehearsals and performances is a requirement for the performing choirs. Students will participate in three to four concerts per year, solo and ensemble contest, UIL concert and sight-reading contest and a music festival.

After school rehearsals are held prior to contests and performances. These sessions are scheduled through the director. A calendar with specific rehearsal and performance requirements for each choir is provided by the director at the beginning of the school year and updated as needed.
Vocal Ensemble I - IV 1 - 4 credits
This small group of top vocal students is comprised of the most highly skilled and motivated students in the choral program. A student must be chosen as a member of the varsity mixed choir in the program to be considered for membership in this very select ensemble. Emphasis is placed on carrying an independent part in a small ensemble group, and students must exhibit the appropriate level of vocal technique, sight-reading ability, and work ethic in order to be considered for this course. This group is focused on advanced literature and performs music selected from a wide variety of musical styles including traditional choral music, madrigals, motets, and Broadway and popular literature. Performance is stressed, and some time will be devoted to choreography. The name of such a group may differ with the high school in which it is organized.

• Prerequisite: Varsity mixed choir; audition and approval of the choral director

Attendance at extra rehearsals, competitions, and numerous performances of this ensemble is required.

Music Theory AP 1 credit
The main objective of the AP Music Theory Course is for students to develop aural, sight singing, written, composition, and analytical skills in music. This course covers material typically taught at the college freshman level with emphasis placed on basic pitch and rhythmic notation or scale structures, pitch intervals, chord structure and movement, part writing, ear training, harmonization, and music composition. Upon completion of this course, students will be prepared to take the College Board Advanced Placement Music Theory Examination.

Prerequisites:
• 11th and 12th graders
• A level I Music course is a required prerequisite.
• Minimum of two years membership in high school band, choir, or orchestra and taken concurrently with band, choir, or orchestra OR a minimum proficiency school on the CFISD Advanced Theory Placement Test.

Orchestra I-IV 1/2 - 4 credits
The high school orchestra program provides one to four levels of classes during the school day. Instructional priorities include instrument technique, musicianship, critical listening, cultural growth, basic music theory, creative self-expression, rehearsal and concert etiquette, self-discipline, responsible citizenship, effective communication, problem solving, and production of quality products. Orchestra students are given an opportunity to continue musical growth and experience quality music literature. Several large ensemble, small ensemble, and individual performance opportunities are provided for students in performing orchestras. Performances include 3-5 concerts and 3-5 festival performances. Students may also participate individually in a series of auditions related to the all-state process as well as solo and ensemble contests.

Orchestra membership requires a 1-2 hour weekly section rehearsal. More advanced performing groups may require an additional weekly full ensemble rehearsal of 1-2 hours. Additional full group rehearsals often occur leading up to major performances. Specific rehearsal and performance requirements for each orchestra are provided by the director.

Instrumental Ensemble Band/Orchestra I-IV 1/2 - 4 credits
This course requires concurrent enrollment in a band or orchestra class and requires director approval. This course is intended for those students who are striving to reach a degree of excellence in musical performance and who elect to schedule two instrumental music courses during the same semester. Emphasis is placed on individual performances, as well as small to medium ensemble performances. The names of these band and orchestra groups may differ with the high school in which it is organized. In accordance with UIL Policy (Section 1102.b.1), students may not perform on the same instrument in two ensembles under the same UIL organizational code at UIL contests.

DANCE

Additional supplies and/or supply fees may be required.

Dance I-II 1-2 credits (Fine Arts or PE)
Dance I-II students will learn fundamental skills in these dance techniques: ballet, modern, jazz, tap, folk, character, and World Dance. In addition, course objectives will emphasize (1) creative expression through movement; (2) awareness of space, time, and energy in dance technique and improvisational studies; (3) development of self-confidence through the use of the body as an expressive instrument; and (4) appreciation of dance as an art form.

Dance III-IV 1-2 credits (Fine Arts only)
Dance III-IV students will build on skills and techniques learned in Dance I & II, including creative expression, improvisation, and appreciation of dance as an art form. Qualities of movement are also explored. These include swinging, percussion, suspension, sustained, collapsing, and vibrancy. Kinesthetic awareness and movement memory is emphasized as well. Dance techniques explored may include ballet, modern, jazz, tap, folk, character, and world dance.

• Prerequisite: Previous level Dance course

Cypress-Fairbanks ISD • Page 62
Possible costs include costumes, practice apparel, camps, trips, individual entry fees, and other items specific to each school. Specific cost expectations vary from campus to campus and are available from the dance instructor. Costs for the first year of Dance Team are the highest.

**Dance I-IV (Dance Team) 1 - 4 credits**

Instructional priorities of the high school dance program include development of dance techniques, creative expression, improvisation, and appreciation of dance as an art form. Qualities of movement are also explored. These include swinging, percussion, suspension, sustained, collapsing, and vibrancy. Kinesthetic awareness and movement memory is emphasized as well. Dance techniques explored may include ballet, modern, jazz, tap, folk, character, and world dance. As students progress from Dance I to IV, more advanced techniques and skills are acquired. Placement of students in Dance I-IV (Dance Team) is determined by various criteria including a tryout. Dance Team will meet the requirement of 1 PE credit for after school participation.

Rehearsal and performance requirements vary from campus to campus. Dance teams generally practice 8 hours per week before/after school from Monday to Thursday. An additional 2 to 4 hours of rehearsal is required on selected weekends. The Dance Team performs at all varsity football games including playoff games, participates in 3 to 5 spring contests, and produces a spring show. Other performance opportunities are determined by the director.

- Students participating in Dance Team must have a physical on file with the Director.
- Additional supplies and/or supply fees may be required.
### CAREER AND TECHNICAL EDUCATION

Students participating in career and technical education (CTE) courses may incur some additional expense if the course includes constructing projects for personal use. Cost of the personal project will vary, depending upon the type of project, its size, and the materials used. Some CTE courses also include requirements to purchase tools and/or uniforms for personal use (such as lab kits for cosmetology and smocks for some health science classes).

Several of the CTE courses include training for industry-standard certifications. While students pay for the certification exam, the training is offered at no cost. Some of these certifications meet the requirements for a student to earn a Performance Acknowledgment. Certifications that relate to safety (such as CPR and OSHA) are required for all students in the course. There is an opportunity for students to receive a state-funded reimbursement for certification fees if they successfully earn the credential. See your teacher or counselor for more information.

While not a course requirement, if any student chooses to raise an animal as an ag project, all animal-project costs are the responsibility of the student. Raising animal projects may require one to two hours per day outside of school hours. See your agriscience teacher for more information.

Students may choose to participate in extra-curricular contests related to their coursework. Preparation for contest events may be held outside of school hours, possibly one to two hours per week.

### FREQUENTLY ASKED QUESTION ABOUT EARNING ENDORSEMENTS USING THE CTE OPTIONS

A variety of CTE course combo options are available. How do I know the group of courses I selected will satisfy the endorsement requirement?

**Use the following checklist:**

- A. Will you earn 4 or more CTE credits from courses that fall within the same endorsement?
- B. Are at least 2 of those courses from the same cluster?
- C. Is at least 1 of the courses listed as including “advanced” topics?

<table>
<thead>
<tr>
<th>Student 1 - Student is interested in learning how to design and build houses.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Principles of Manufacturing (1 credit)</td>
</tr>
<tr>
<td>Construction Technology I (2 credits)</td>
</tr>
<tr>
<td>Construction Tech II (2 credits-advanced)</td>
</tr>
</tbody>
</table>

**Result:** This combination of courses WILL SATISFY the CTE course credit requirement for an endorsement in Business & Industry.

<table>
<thead>
<tr>
<th>Example 2 - Student is interested in learning some basic cooking techniques.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Principles of Hospitality (1 credit)</td>
</tr>
<tr>
<td>Intro to Culinary Arts (1 credit)</td>
</tr>
<tr>
<td>Culinary Arts (2 credits)</td>
</tr>
</tbody>
</table>

**Result:** This combination of courses WILL NOT SATISFY the CTE course credit requirement for an endorsement in Business & Industry. This student has 4 credits but still needs to take an advanced CTE course. He/she has the prereqs to take Advanced Culinary Arts.

<table>
<thead>
<tr>
<th>Example 3 - Student is interested in working with animals, taking Principles of Health Science to satisfy the health requirement for graduation</th>
</tr>
</thead>
<tbody>
<tr>
<td>Principles of Health Science (1 credit)</td>
</tr>
<tr>
<td>Principles of Ag (1 credit)</td>
</tr>
<tr>
<td>Small Animal Management (1/2 credit)</td>
</tr>
<tr>
<td>Equine Science (1/2 credit)</td>
</tr>
<tr>
<td>Vet Med Applications (1 credit-advanced)</td>
</tr>
</tbody>
</table>

**Result:** This combination of courses WILL NOT SATISFY the CTE course credit requirement for an endorsement in Business & Industry. This student has 4 credits, but only 3 of them fall within the same endorsement. He/she needs one more credit from any of the clusters that fall within the Business & Industry endorsement.

*Meets Advanced Course Requirement for B&I Endorsement*

**Meets Requirement to Earn Performance Acknowledgement**

For more information, see your counselor, CTE teachers, or https://tinyurl.com/CTECFISD.
Principles of Agriculture, Food, and Natural Resources (AFNR) 1 credit  
**Certification: Quality Counts**  
This course is an introductory class that prepares students for careers in agriculture, food, and natural resources. The emphasis is on career opportunities, personal development, globalizaton, industry standards, details, practices, and expectations.  
- Grades 9 - 10  
- Required of all 9th/10th graders wanting to take an Ag course  
- Programs of Study: Animal Science, Plant Science and Applied Ag Engineering, Environmental & Natural Resources  
- Lab supplies or fee may be required.

Livestock Production 1 credit  
**Certification: Texas Beef Quality Assurance**  
This course is an in-depth study to develop knowledge and skills pertaining to all areas and kinds of livestock production. Topics which give the student an insight into livestock management include animal foods, nutrition and growth, reproduction, animal health, animal handling techniques, and livestock sales.  
- Grades 10 - 12  
- Required prerequisite (or concurrent): Principles of AFNR for 10th graders  
- Program of Study: Animal Science  
- Lab supplies or fee may be required.

Small Animal Management 1/2 credit  
**Certification: Fear Free Animal Handling**  
This course is designed for students to acquire knowledge and skills related to small animals and the small animal management industry. Small Animal Management may address topics related to small mammals such as dogs and cats, amphibians, reptiles, and birds.  
- Grades 10 - 12  
- Required prerequisite (or concurrent): Principles of AFNR for 10th graders  
- Program of Study: Animal Science  
- Lab supplies or fee may be required.

Advanced Animal Science K 1 credit (science)  
This course is designed for students preparing for careers in the field of animal science. Emphasis will be placed on the interrelatedness of human, scientific, and technological dimensions of livestock production. Instruction is designed to allow for the application of scientific and technological aspects of animal science through field and laboratory experiences.  
- Grades 11 - 12  
- Required prerequisites: Principles of AFNR and either Small Animal Management, Equine Science, or Livestock Production  
- Program of Study: Animal Science  
- Satisfies advanced course requirement for Business & Industry endorsement.  
- Completing this course satisfies a science credit required for graduation.  
- Lab supplies or fee may be required.

Veterinary Medical Applications 1 credit  
**Certification: Certified Vet Assistant-Level One (CVA)**  
This course is designed for students preparing for careers in the field of animal science. Topics covered include, but are not limited to career opportunities, entry requirements, industry expectations, animal systems, and veterinary practices as they relate to both large and small animal species.  
- Grades 11 - 12  
- Required prerequisites: Principles of AFNR and either Small Animal Management, Equine Science, or Livestock Production  
- Program of Study: Animal Science  
- Satisfies advanced course requirement for Business & Industry endorsement.  
- CVA certification satisfies requirement to earn a Performance Acknowledgment.  
- Lab supplies or fee may be required.

Food Technology & Safety (an Ag course) 1 credit  
Food Technology and Safety is designed to acquaint the student with world food production. Areas investigated will be marketing and transportation of food products, including preparation, processing, preservation and packaging for the consumer. Students learn about government regulations, sanitation, occupational opportunities, safety, and leadership development.  
- Grades 10 - 12  
- Required prerequisite (or concurrent): Principles of AFNR for 10th graders  
- Related elective that can be added as additional credit to any of the Ag Programs of Study  
- Lab supplies or fee may be required.
Agriculture, Food and Natural Resources
Endorsement: Business & Industry

Wildlife, Fisheries and Ecology Management  
Certification: Hunter, Boater & Angler Safety  
1 credit
This course is designed to inform the students about wildlife management and outdoor recreation. Hunting and fishing skills and safety are taught as well as water and boating safety. Wise use of our natural resources and career opportunities are also covered.
- Grades 10 - 12
- Required prerequisite (or concurrent): Principles of AFNR for 10th graders
- Program of Study: Environmental & Natural Resources
- Lab supplies or fee may be required.

Range Ecology Management  
A 1 credit
This course is designed to develop students’ understanding of rangeland ecosystems and sustainable forage production. Students will study methods for maintaining and improving rangeland for livestock and wildlife management.
- Grades 11 - 12
- Required prerequisite: Wildlife, Fisheries and Ecology Management
- Program of Study: Environmental & Natural Resources
- Satisfies advanced course requirement for Business & Industry endorsement.
- Lab supplies or fee may be required.

Floral Design  
P 1 credit (fine arts)
Certifications: TSFA Floral Designer Skills, TSFA Floral Designer-Level One
This course is designed to develop a student’s ability to identify and demonstrate the principles and techniques related to floral design as well as develop an understanding of the management of floral enterprises. Horticulture systems, career opportunities, entry requirements, and industry expectations will also be covered.
- Grades 10 - 12
- Required prerequisite (or concurrent): Principles of AFNR for 10th graders
- Program of Study: Plant Science
- Completing this course satisfies a fine arts credit required for graduation.
- Floral Skills and Floral Designer-Level One certifications each satisfy requirement to earn a Performance Acknowledgment.
- Lab supplies or fee may be required.

Greenhouse Operation & Production  
1 credit
This course is designed to develop an understanding of greenhouse production techniques and practices. Students will gain an understanding of common horticultural management practices as they relate to food and ornamental plant production. Plant nutrition, plant use and identification, plant chemical uses and precautions are introduced along with tools and equipment used in the industry.
- Grades 10 - 12
- Required prerequisite (or concurrent): Principles of AFNR for 10th graders
- Program of Study: Plant Science
- Lab supplies or fee may be required.

Advanced Floral Design  
A C P 1 credit
Certification: TSFA Floral Designer-Level Two
Advanced Floral Design students build on the knowledge from the Floral Design course and are introduced to more advanced floral design concepts, with an emphasis on specialty designs and specific occasion planning.
- Grades 11 - 12
- Required prerequisite: Floral Design
- Recommended prerequisite: Floral Designer Level One certification
- Program of Study: Plant Science
- Satisfies advanced course requirement for Business & Industry endorsement.
- Floral Designer-Level Two certification satisfies requirement to earn a performance Acknowledgment
- Lab supplies or fee may be required.

Advanced Plant & Soil Science  
K A 1 credit(science)
Advanced Plant and Soil Science provides a way of learning about the natural world. Students should know how plant and soil science has influenced a vast body of knowledge, that there are still applications to be discovered, and that plant and soil science is the basis for many other fields of science. In this course, students will analyze such concepts as impact on production of food, fiber and other economic crops; factors within habitats and ecosystems; watershed, weathering, and erosion; along with origin and impact of fossil fuels and alternative energy sources.
- Grades 11 - 12
- Required prerequisites: Biology, Chemistry and Horticulture or Greenhouse Operation & Production
- Program of Study: Plant Science
- Satisfies advanced course requirement for Business & Industry endorsement.
- Completing this course satisfies a science credit required for graduation.
- Lab supplies or fee may be required.
Agricultural Mechanics and Metal Technologies **C P** 1 credit

**Certifications: OSHA-10, American Welding Society (AWS)**

This course is designed to develop an understanding of agricultural mechanics as it relates to safety and skills in tool operation, electrical wiring, plumbing, carpentry, fencing, concrete, and metal working techniques. Construction of a project or demonstration of skills will fulfill the requirements of the Supervised Agricultural Experience Program.

- Grades 10 - 12
- Required prerequisite (or concurrent): Principles of AFNR for 10th graders
- Program of Study: Applied Ag Engineering
- AWS certification satisfies requirement to earn a Performance Acknowledgment. Certifications available: Flat, Horizontal, Vertical, and Overhead.
- Lab supplies or fee may be required.

Agricultural Equipment Design & Fabrication **A C P** 1 credit

**Certification: American Welding Society (AWS)**

To prepare for careers in mechanized agriculture and technical systems, students must attain knowledge and skills related to agricultural equipment design and fabrication. In this course, students will take projects from the design stage through construction and completion. Projects might include items such as agricultural machinery and equipment, fences, corrals, or other agricultural enclosures.

- Grades 11 - 12
- Required prerequisites: Agricultural Mechanics and Metal Technologies
- Program of Study: Applied Ag Engineering
- Satisfies advanced course requirement for Business & Industry endorsement.
- AWS certification satisfies requirement to earn a Performance Acknowledgment. Certifications available: Flat, Horizontal, Vertical, and Overhead.
- Lab supplies or fee may be required.

Project-based Research: Focused on Advanced Ag Mechanics **A C P** 1 credit (project-based)

**Certification: OSHA-30**

This course is a supervised research study/project-based class where students will apply knowledge and skills from previous ag mechanics courses in a related advanced/specialized field of study. Students are required to submit a formal project plan within 15 school days after enrollment in the course. The plan should specify the additional concepts and/or technologies that will be studied and utilized, along with an overview of the culminating project.

- Grades 11 - 12
- Required prerequisites: Ag Mechanics
- Recommended for students unable to complete all welding certifications available in Ag Mech and Ag Equipment and/or students wanting to complete an advanced ag mechanics project.
- Program of Study: Applied Ag Engineering
- Satisfies advanced course requirement for Business & Industry endorsement.
- Lab supplies or fee may be required.
- Students wanting to study advanced topics in floral design should take Advanced Floral Design.

Practicum in Agriculture, Food & Natural Resources **A C P** 2 credits (work-based)

**Certification: Wastewater Collections**

This course allows students to apply agricultural concepts and principles in the classroom and the workplace. In the classroom portion of the course, students will gain knowledge of professional standards as required by business and industry. Students will also receive industry recognized training designed to make them more marketable and desirable in the workplace. Students are required to work 10 hours per week at an approved training site and must be employed at that site within 15 school days after enrollment in the course. Students wishing to earn the Wastewater Collections certification must attain a job/internship at a facility in that industry.

- Grades 11 - 12
- Required prerequisites: at least two (2) credits from ag cluster and age 16 if paid training site
- Programs of Study: Animal Science, Plant Science and Applied Ag Engineering, Environmental & Natural Resources
- Recommended for students needing to complete the hour requirement required to earn their CVA level one certification (started in Vet Med) or move on to level two.
- Satisfies advanced course requirement for Business & Industry endorsement.
- Lab supplies or fee may be required.
- Students must provide own transportation to the work site

ARCHITECTURE AND CONSTRUCTION
Endorsement: Business & Industry

Course with “advanced” topics - Students wishing to earn an endorsement by taking CTE courses must take at least one with advanced topics.
Course includes training for an industry-standard certification. While students pay for the certification exam, the training is offered at no cost.
Course includes training for a certification meeting the requirements for a student to earn a Performance Acknowledgment if they successfully earn it.

Principles of Architecture  C P  1 credit
Certification: NCCER CORE

Students will explore the various fields of architecture, construction science, and construction technology. The emphasis is on design, drafting, reading technical drawings, estimating and construction science. Students will use a variety of tools to accomplish hands-on activities related to model construction. This course is highly recommended for students planning a career in architecture or construction.
- Grades 9 - 11
- Programs of Study: Architecture, Construction, Plumbing and Interior Design
- NCCER CORE certification satisfies requirement to earn a Performance Acknowledgment.
- Lab supplies or fee may be required.

Construction Technology I  C P  2 credits
Certification: NCCER Carpentry Level 1

Students will gain knowledge and skills specific to those needed to enter the workforce or prepare for a postsecondary degree in the construction, architecture, or engineering field. Students will acquire knowledge and skills in safety, tool and machine usage, building materials, codes, and framing.
- Grades 10 - 12
- Required prerequisite: Principles of Architecture or Principles of Manufacturing
- Programs of Study: Construction/Carpentry and Construction/Plumbing
- NCCER Carpentry Level 1 certification satisfies requirement to earn a Performance Acknowledgment.
- Lab supplies or fee may be required.

Interior Design  1 credit

This technical course provides students the opportunity to acquire knowledge and skills related to interior and exterior environments. This course provides instruction in the basic principles and elements of design and construction including the use of color, textiles, furniture, wall, window and floor coverings, space planning, and lighting in residential and non-residential environments. Students will investigate and prepare for career opportunities in construction, housing and interior design related fields.
- Grades 10 - 12
- Recommended prerequisite: Principles of Architecture
- Program of Study: Interior Design
- Lab supplies or fee may be required.

Construction Technology II  A C P  2 credits
Certifications: OSHA 10-HR Card, NCCER Carpentry Level 2

In Construction Technology II, students will gain advanced knowledge and skills needed to enter the workforce as carpenters, building maintenance technicians, or supervisors or to prepare for a postsecondary degree in construction management, architecture, or engineering. Students will build on the knowledge base from Construction Technology I and are introduced to exterior and interior finish out skills.
- Grades 11 - 12
- Required prerequisite: Construction Technology I
- Program of Study: Construction/Carpentry
- Satisfies advanced course requirement for Business & Industry endorsement.
- NCCER Carpentry Level 2 certification satisfies requirement to earn a Performance Acknowledgment.
- Lab supplies or fee may be required.

Architectural Design I  1 credit

Students explore the design, planning, and development of architectural drawings. Emphasis is placed on the production of construction documents and presentation media through traditional and computer-aided equipment. This course is highly recommended for students planning a career in architecture or a construction-related trade.
- Grades 10 - 12
- Required prerequisite: Principles of Architecture
- Recommended prerequisite: Geometry
- Programs of Study: Architecture and Interior Design
- Lab supplies or fee may be required.

Architectural Design II  A C P  2 credits
Certifications: Autodesk Revit, Autodesk AutoCAD

Students will gain advanced knowledge and skills specific to those needed to enter a career in architecture and construction. Advanced knowledge of the design, design history, techniques, and tools related to the production of drawings, renderings, and scaled models for commercial or residential architectural purposes.
- Grades 11 - 12
- Required prerequisite: Architectural Design I
- Programs of Study: Architecture and Interior Design
- Satisfies advanced course requirement for Business & Industry endorsement.
- Autodesk Revit and AutoCAD certifications satisfy requirement to earn a Performance Acknowledgment.
- Lab supplies or fee may be required.
Architectural Design II Workforce  

Certifications: Autodesk Revit, Autodesk AutoCAD

Similar to Architectural Design II, except students must also have a Student Work Portfolio submitted and approved by Lone Star College. The workforce courses include additional content aligned with the Lone Star College Architectural Design Technology AAS degree.

- Grades 11 - 12
- Required prerequisite: Architectural Design I and Student Work Portfolio submitted and approved by Lone Star College
- Programs of Study: Architecture and Interior Design
- Satisfies advanced course requirement for Business & Industry endorsement.
- Autodesk Revit and AutoCAD certifications satisfy requirement to earn a Performance Acknowledgment.
- Lab supplies or fee may be required
- NOTE: Workforce dual credit courses are non-transferable to a 4-year institution and don’t carry advanced grade points

Practicum in Architectural Design  

2 credits (work-based)

An occupationally specific course designed to provide technical instruction in architectural design. Instruction may be delivered through an unpaid laboratory training or through paid career preparation delivery arrangements. Students are required to work 10 hours per week at an approved training site and must be employed at that site within 15 school days after enrollment in the course.

- Grade 12
- Required prerequisite: Architectural Design I and age 16 if paid training site
- Program of Study: Architecture
- Satisfies advanced course requirement for Business & Industry endorsement.
- Lab supplies or fee may be required.
- Students must provide own transportation to the work site

Project-based Research in Architecture Workforce  

2 credits

Students will gain advanced knowledge and skills specific to those needed to enter a career in architecture and construction. Students will explore advanced critical topics such as structural steel, pre-cast concrete, poured-in-place concrete, structural wood drafting, pre-fab metal buildings, civil engineering drafting, and process piping. The workforce courses include additional content aligned with the Lone Star College Architectural Design Technology AAS degree.

- Grade 12
- Required prerequisite: Architectural Design II Workforce
- Programs of Study: Architecture and Interior Design
- Satisfies advanced course requirement for Business & Industry endorsement.
- Lab supplies or fee may be required
- NOTE: Workforce dual credit courses are non-transferable to a 4-year institution and don’t carry advanced grade points

Mill and Cabinetmaking Technology  

2 credits

Students will gain knowledge and skills specific to mill work and cabinet manufacturing and installation. Emphasis on cabinet design, tool usage, jointing methods, materials, finishes, and numerical and computer control production methods.

- Grades 10 - 12
- Required prerequisite: Construction Technology I
- Program of Study: Construction/Carpentry
- Satisfies advanced course requirement for Business & Industry endorsement.
- Lab supplies or fee may be required.

Practicum in Construction Technology  

2 credits (work-based)

This course allows students to apply construction management concepts and principles in the classroom and the workplace. In the classroom portion of the course, students will gain knowledge of professional standards as required by business and industry. Students will also receive industry-recognized training designed to make them more marketable and desirable in the workplace. Students are required to work 10 hours per week at an approved training site and must be employed at that site within 15 school days after enrollment in the course.

- Grade 12
- Required prerequisite: Construction Technology I and age 16 if paid training site
- Program of Study: Construction/Carpentry
- Satisfies advanced course requirement for Business & Industry endorsement.
- Lab supplies or fee may be required.
- Students must provide own transportation to the work site
**Plumbing I (blocked with Project-based Research in Plumbing) 2 credits**

Certification: NCCER Plumbing Level 1

Students will gain knowledge and skills needed to enter the industry as a plumbing apprentice, building maintenance technician, or supervisor or prepare for a postsecondary degree in construction management, architecture, or engineering. Students will acquire knowledge and skills in industry workplace basics and employer/customer expectations including how to use a plumbing code book, how to identify and use power and hand tools, how to be safe on the jobsite and how to apply basic plumbing mathematics and plumbing drawing; and how to identify, fit and use plastic, copper, cast iron, carbon steel, and corrugated stainless steel pipe.

- Grades 11-12, with priority given to students planning to take Plumbing II
- Required prerequisite: Construction Technology I
- Program of Study: Plumbing
- Satisfies advanced course requirement for Business & Industry endorsement.
- NCCER certification satisfies requirement to earn a Performance Acknowledgment.
- Lab supplies or fee may be required.
- Course will transcript as 1 credit in Plumbing I and 1 credit in Project-based Research

**Plumbing II 2 credits**

Certification: NCCER Plumbing Level 2

Students will gain knowledge and skills needed to enter the industry as a plumber, building maintenance technician, or supervisor or prepare for a postsecondary degree in mechanical engineering. Students will acquire knowledge and skills in plumbing code, industry workplace basics, and employer/customer expectations, including tool and jobsite safety, advanced plumbing mathematics, commercial drawings, basic electricity, hanger installation, supports and structural penetrations, roof drains, fixture installation, valves and faucets, and oxy-fuel safety.

- Grades 12
- Required prerequisite: Plumbing I and Project-based Research in Plumbing
- Program of Study: Plumbing
- Satisfies advanced course requirement for Business & Industry endorsement.
- NCCER certification satisfies requirement to earn a Performance Acknowledgment.
- Lab supplies or fee may be required.

**Professional Communications** 1/2 credit

This high school speech course is designed to provide opportunities for students to understand and develop effective interpersonal communication skills for the 21st Century. Professional Communications blends written, oral, and graphic communication in a career-based, business environment. Students will prepare, present, and evaluate a variety of multi-media presentations that are appropriate for the professional setting.

- Grades 9 - 12
- Related elective that can be added as additional credit to any Program of Study

**Digital Media** 1 credit

(also listed in Information Tech cluster)

**Certification: Adobe Photoshop and Adobe Web Design Specialist**

Through the study of digital media and its application in information technology, students will design and create multimedia projects that address customer needs. Students will learn skills such as creating digital graphics, digital photography, using audio editing software, and creating video files. The emphasis will be on utilizing the features in Adobe Photoshop included in the corresponding industry-recognized certification. Students earning certifications in Adobe Animate, Dreamweaver and Photoshop are considered Web Design Specialists.

- Grades 9 - 12
- Program of Study: Multimedia Arts, Video Production and Web Development
- Adobe Photoshop and Web Design Specialist certifications satisfy requirement to earn a Performance Acknowledgment.
- Lab supplies or fee may be required.

**Practicum in Animation** 2 credits (work-based)

This course allows students to apply animation concepts and principles in the classroom and the workplace. Students will develop an increasing understanding of the industry with a focus on applying pre-production, production, and post-production animation products in a professional environment. Students are required to work 10 hours per week at an approved training site and must be employed at that site within 15 school days after enrollment in the course.

- Grade 12
- Required prerequisite: Animation II
- Program of Study: Multimedia Arts
- Satisfies advanced course requirement for Business & Industry endorsement.
- Students must provide own transportation to the work site.
- Lab supplies or fee may be required.

**Animation I** 1 credit

(also listed in Information Tech cluster)

**Certification: Adobe Animate and Adobe Web Design Specialist**

This course allows students to create animation projects using principles of design to combine graphics, images and sound. A variety of techniques will be explored, including storyboarding, scripting/programming, interactivity, and flip books. The emphasis will be on utilizing the features in Adobe Animate included in the corresponding industry-recognized certification. Students earning certifications in Adobe Animate, Dreamweaver and Photoshop are considered Web Design Specialists.

- Grades 10 - 12
- Recommended prerequisite: Digital Media
- Program of Study: Multimedia Arts
- Adobe Animate and Web Design Specialist certifications satisfy requirement to earn a Performance Acknowledgment.
- Lab supplies or fee may be required.

**Animation II** 2 credits

Certification: Autodesk Maya

This course provides students the opportunity to expand upon the animation knowledge and skills mastered in the first animation course. A variety of advanced techniques will be explored, including orthographic and isometric drawing, framing, lighting, exaggeration, additive color, layers, and transitions. Products will be created utilizing industry-recognized technologies.

- Grades 11 - 12
- Required prerequisite: Animation I
- Program of Study: Multimedia Arts
- Satisfies advanced course requirement for Business & Industry endorsement.
- Lab supplies or fee may be required.

**Web Technologies I** 1 credit

(also listed in Information Tech cluster)

**Certifications: Adobe Dreamweaver and Web Design Specialist**

Students will learn how to design, create, and maintain web pages including campus pages on the district website. Projects will incorporate tools such as HTML, Dreamweaver, Photoshop, Animate, Fireworks, digital cameras, and scanners. The emphasis will be on utilizing the features in Adobe Dreamweaver included in the corresponding industry-recognized certification. Students earning certifications in Adobe Animate, Dreamweaver and Photoshop are considered Web Design Specialists.

- Grades 9 - 12
- Program of Study: Web Development and related elective that can be added as additional credit to any of the Arts Programs of Study
- Adobe Web Design Specialist certification satisfies requirement to earn a Performance Acknowledgment.
- Lab supplies or fee may be required.

**Certification: Adobe Animate and Adobe Web Design Specialist**

This course provides students the opportunity to expand upon the animation knowledge and skills mastered in the first animation course. A variety of advanced techniques will be explored, including orthographic and isometric drawing, framing, lighting, exaggeration, additive color, layers, and transitions. Products will be created utilizing industry-recognized technologies.

- Grades 11 - 12
- Required prerequisite: Animation I
- Program of Study: Multimedia Arts
- Satisfies advanced course requirement for Business & Industry endorsement.
- Lab supplies or fee may be required.

**Practicum in Animation** 2 credits (work-based)

This course allows students to apply animation concepts and principles in the classroom and the workplace. Students will develop an increasing understanding of the industry with a focus on applying pre-production, production, and post-production animation products in a professional environment. Students are required to work 10 hours per week at an approved training site and must be employed at that site within 15 school days after enrollment in the course.

- Grade 12
- Required prerequisite: Animation II
- Program of Study: Multimedia Arts
- Satisfies advanced course requirement for Business & Industry endorsement.
- Students must provide own transportation to the work site.
- Lab supplies or fee may be required.
**Digital Audio Technology I** 1 credit

This course provides skills for students to produce professional audio for a variety of real-world uses, such as: radio and television broadcasting, audio for video and film, audio for animation and game design, music production and live sound, and additional opportunities and skills sets. Students will master audio production equipment and create projects with a DAW (Digital Audio Workstation). Students will be expected to develop an understanding of the audio industry with a technical emphasis on production and critical-listening skills.

- Grades 9 - 12
- Programs of Study: Digital Communications/Video, Digital Communications/Audio
- Lab supplies or fee may be required.

**Digital Audio Technology II** 1 credit

In Digital Audio Technology II, students build upon their basic skills learned in Digital Audio Technology I, and explore more advanced audio recording, editing, composition, and mixing. Students work on music composition, creating sound effects, and more advanced audio equipment. This course focuses on advanced audio production concepts, such as music production, as well as advanced issues involved in producing radio commercials and projects on a deadline in this course. This course will be administered with a project based strategy with an industry-focused pre-production, production, and post production audio system to create useful digital content. Students are expected to use innovative thinking to develop new ideas and processes for solving real-world issues and conveying those ideas to a global audience through a digital product. Issues will include current topics such as health care, government, business, and education. Methods and products will be created for audiences beyond the classroom such as school officials, non-profit organizations, higher education officials, government, or other stakeholders.

- Grades 10 - 12, with priority to grades 10 and 11
- Recommended prerequisite: Digital Media or Digital Audio Technology I
- Programs of Study: Digital Communications/Video, Digital Communications/Audio
- Adobe Premiere Pro certification satisfies requirement to earn a Performance Acknowledgment.
- Students may be required to work additional hours after school at the teacher’s discretion.
- Lab supplies or fee may be required.

**Audio/Video Production I** 2 credits

**Certification: Adobe Premier Pro**

Students will produce videos using professional standards in the area of pre-production, production and post-production. Public Services announcements, news packages, documentaries, educational, promotional, and commercial productions. Students will work in crews to examine real-world issues related to current topics such as health care, government, business, or education. Productions will be created for audiences beyond the classroom such as school officials, non-profit organizations, higher education officials, government, or other stakeholders.

- Grades 10 - 12, with priority to grades 10 and 11
- Recommended prerequisite: Audio/Video Production I
- Programs of Study: Digital Communication/Video, Digital Communication/Audio
- Adobe Premiere Pro certification satisfies requirement to earn a Performance Acknowledgment.
- Students may be required to work additional hours after school at the teacher’s discretion.
- Lab supplies or fee may be required.

**Audio/Video Production II** 2 credits

**Certification: Adobe After Effects**

Students will form their own crews to create productions beyond the campus level with actual clients in industry, such as education, charity, and for-profit businesses in the community. Students will expand their skills to produce short films, music videos, movie trailers, television shows, web series, and others. Students will also use audio/video equipment to use media to cover various events in the athletic, arena, board meetings, corporate, family and other events in need of production. Students will learn the process to create an online marketing presence to form their own business.

- Grades 11 - 12
- Required prerequisite: Audio/Video Production I
- Program of Study: Digital Communication/Video
- Adobe After Effects certification satisfies requirement to earn a Performance Acknowledgment.
- Satisfies advanced course requirement for Business & Industry endorsement.
- Students will be required to work additional hours after school at the teacher’s discretion.
- Lab supplies or fee may be required.
Practicum in Audio/Video Production  

Certification: Remote Drone Pilot

Students will work as contractors to produce videos for a wide variety of organizations. Under the supervision of their AVP teacher, the practicum student will identify community production opportunities off campus, conduct meetings with clients, and manage video production equipment and crews. Students will also have the opportunity to pursue the training and certification needed to film using a drone. This course requires students to arrange their own transportation to produce a wide variety of media projects.

- Grade 12
- Required prerequisite: Audio/Video Production II or Digital Audio Technology II
- Programs of Study: Digital Communications/Video, Digital Communications/Audio
- Satisfies advanced course requirement for Business & Industry endorsement.
- Remote Drone Pilot certification satisfies requirement to earn a Performance Acknowledgment
- Students are required to have an approved training site/client within 15 school days of enrollment in the course.
- Lab supplies or fee may be required.
- Students must provide own transportation to the work site

Fashion Design II

This course builds upon skills learned in Fashion Design I. Students continue to develop and refine their understanding of fashion figures, garment details, and construction. Students will develop an understanding of the industry by participation in fashion projects.

- Grades 11 - 12
- Required prerequisite: Fashion Design I
- Program of Study: Fashion Design
- Satisfies advanced course requirement for Business & Industry endorsement.
- Lab supplies or fee may be required.

Project-based Research in Fashion Design

1 credit (project-based)

This advanced course builds upon skills learned in Advanced Fashion Design II. Students will work on special projects such as HUNCH or utilize all advanced designing and sewing techniques in their projects to create a professional look. Students will make minor and advanced alterations and display their garments.

- Grade: 12
- Required prerequisite: Fashion Design II
- Program of Study: Fashion Design
- Satisfies advanced course requirement for Business & Industry endorsement.
- Lab supplies or fee may be required.

Fashion Design I

1 credit

This course emphasizes careers in fashion which span all aspects of the textile and apparel industries. Students interested will develop an understanding of the industry by participation in fashion, textile, and apparel projects, as well as exposure to laws governing the industry, skills related to commercial care of clothing, safety regulations, and general knowledge and skills leading to success in the Arts, Audio/Video Technology, and Communications career cluster.

- Grades 10 - 12
- Program of Study: Fashion Design
- Lab supplies or fee may be required.

Fashion Marketing

1/2 credit

(Also listed in Marketing cluster)

Fashion Marketing is designed to provide students with knowledge of the various business functions in the fashion industry. Students in Fashion Marking will gain a working knowledge of promotion, textiles, merchandising, mathematics, selling, visual merchandising, and career opportunities.

- Grades 10 - 12
- Recommended prerequisite: Principles of Business, Marketing and Finance
- Related elective that can be added as additional credit to the Fashion Design Program of Study
- Lab supplies or fee may be required.

rev 07/2020
Principles of Business, Marketing, and Finance  1 credit
In Principles of Business, Marketing, and Finance, students gain knowledge and skills in economies and private enterprise systems, the impact of global business, marketing of goods and services, advertising, and product pricing. Students analyze the sales process and financial management principles. The engaging learning activities and simulations in this course provide the foundation for more advanced courses in the business, marketing, and finance clusters.
• Grades 8 - 10
• Programs of Study: Accounting & Financial Services, Business Management, Entrepreneurship, Marketing & Sales
• Lab supplies or fee may be required.

Accounting I  1 credit
Certification: Microsoft Excel or Microsoft Excel Expert
Accounting helps individuals and businesses manage their money. This course is one of the fastest growing and highly compensated areas of business. This course includes the complete accounting cycle, end-of-period statements, bank reconciliation, payrolls, and petty cash. Upon completion, students should be able to demonstrate an understanding of accounting principles and apply those skills to a business organization.
• Grades 10 - 12
• Required prerequisite: Geometry
• Recommended prerequisite: Principles of Business, Marketing, and Finance; Strongly recommended for all students wanting to pursue a degree in Business
• Program of Study: Accounting & Financial Services
• Satisfies advanced course requirement for Business & Industry endorsement
• Microsoft Excel or Microsoft Excel Expert certifications satisfy requirement to earn a Performance Acknowledgment
• Lab supplies or fee may be required.

Accounting II K  1 credit (math)
Certification: Quickbooks Certified User
Students continue the investigation of the field of accounting in this advanced course, emphasizing corporate accounting and integrated financial analysis. Students reflect on this knowledge as they engage in various managerial and cost accounting activities. This course is vital for students planning to major in finance or seeking an entry-level position in accounting. This course satisfies a high school math graduation requirement.
• Grades 11 - 12
• Required prerequisites: Algebra II (or concurrent) and Accounting I
• Program of Study: Accounting & Financial Services
• Satisfies advanced course requirement for Business & Industry endorsement
• Completing this course satisfies a math credit required for graduation.
• Quickbooks certification satisfies requirement to earn a Performance Acknowledgment.
• Lab supplies or fee may be required.

Advanced Marketing  2 credits
Certification: Microsoft Word or Microsoft Word Expert
Advanced Marketing builds upon the ideals taught in previous Marketing courses. The course is intended for students interested in taking their marketing skills to the next level and developing an action plan for a successful future. This course includes instructional areas designed to provide an understanding of advanced marketing principles, careers in marketing and the importance of entrepreneurship in our economy. Major emphasis is placed on marketing principles, communication, market research, sales, career development, customer service and entrepreneurship.
• Grades 11 - 12
• Required prerequisite: at least one Marketing course (Fashion Mktg, Social Media Mktg or Sports & Entertainment Mktg)
• Program of Study: Marketing & Sales
• Recommended prerequisite: Practicum in Marketing I
• Satisfies advanced course requirement for Business & Industry endorsement
• Microsoft Word or Microsoft Word Expert certifications satisfy requirement to earn a Performance Acknowledgment
• Lab supplies or fee may be required.
Business Information Management I (BIM I)  
(1 credit)
Certification: Microsoft Office

BIM I prepares students to apply personal, interpersonal, and technology skills in other content areas, the workplace, and post-secondary education. The applications utilized in this course will include word processing, spreadsheets, multimedia presentations, databases, Internet research, and a look at emerging technologies. While an emphasis will be placed on simulations related to business, finance, and marketing, this introductory technology course is appropriate for students whose career interests fall within any of the 16 career clusters.

- Grades 8 - 12
- Recommended prerequisite: Principles of Business, Marketing, and Finance
- Program of Study: Accounting & Financial Services
- Lab supplies or fee may be required.

Business Information Management II (BIM II)  
(1 credit)
Certification: Microsoft Office

Students will complete this course with an advance level of proficiency in word processing, spreadsheet, database and presentation applications that is expected in the world of business. Lessons are aligned with the content on the Microsoft Office Specialist exams. This certification is globally recognized as the standard for demonstrating mastery of Microsoft Office Suite skills and may be a valuable addition to your credentials for current and future employment. On-site certification assessment is available at all campuses.

- Grades 10 - 12 (Students with credit for BIM I in 8th grade may enroll in 9th grade.)
- Recommended prerequisite: Business Information Management I
- Program of Study: Business Management
- Satisfies advanced course requirement for Business & Industry endorsement.
- Microsoft Office-Word, Microsoft-Expert Word, Microsoft Office-Excel and Microsoft Office-Expert Excel certifications each satisfy the requirement to earn a Performance Acknowledgment.
- Students earning Word Expert, Excel Expert, Powerpoint, and Access certifications also earn the Microsoft Office Specialist-Master certification, which satisfies requirement to earn an additional Performance Acknowledgment.
- Lab supplies or fee may be required.

Business Management  
(1 credit)

In Business Management, students analyze the primary functions of management and leadership in this rapidly evolving global business environment. Students incorporate a broad base of knowledge that includes the legal, managerial, marketing, financial, ethical, and international dimensions of business to make appropriate management decisions. This course is strongly recommended for those who strive to be their own boss one day.

- Grades 11 -12
- Recommended prerequisite: at least one Business course (BIM I or II, Global Business, Human Resources Mgmt or Virtual Business)
- Strongly recommended for all students wanting to pursue a degree in Business.
- Program of Study: Business Management
- Satisfies advanced course requirement for Business & Industry endorsement.
- Lab supplies or fee may be required.
Entrepreneurship

Certification: Entrepreneurship & Small Business
1 credit

In Entrepreneurship, students will gain knowledge and skills needed to become an entrepreneur. Students will learn the principles necessary to begin and operate a business. The primary focus of the course is to help students understand the process of analyzing a business opportunity, preparing a business plan, determining feasibility of an idea using research, and developing a plan to organize and promote the business and its products and services. In addition, students will understand the capital required, the return on investment desired, and the potential for profit.

- Grades 10 - 12
- Recommended prerequisite: Principles of Business, Marketing and Finance
- Program of Study: Entrepreneurship
- Entrepreneurship & Small Business certification satisfies requirement to earn a Performance Acknowledgment.
- Lab supplies or fee may be required

Fashion Marketing

1/2 credit

(also listed in Arts, A/V Tech cluster)
Fashion Marketing is designed to provide students with knowledge of the various business functions in the fashion industry. Students in Fashion Marketing will gain a working knowledge of promotion, textiles, merchandising, mathematics, selling, visual merchandising, and career opportunities.

- Grades 10 - 12
- Recommended prerequisite: Principles of Business, Marketing and Finance
- Program of Study: Marketing & Sales
- Lab supplies or fee may be required

Global Business

1/2 credit

In Global Business, students explore theories in trading and investing across national borders. This course includes topics related to differing laws, cultures and societies, and their impact on the application of basic business principles. Students taking this course should consider also taking Virtual Business and/or Human Resource Management and Business Management.

- Grades 10 - 12
- Recommended prerequisite: Principles of Business, Marketing and Finance
- Programs of Study: Accounting & Financial Services, Business Management, and Entrepreneurship
- Lab supplies or fee may be required

Human Resources Management

1/2 credit

In Human Resources Management, students typically analyze the primary functions of human resources management, which include recruitment, selection, training, development, and compensation. Topics will incorporate social responsibility of business and industry to its employees. Students develop a foundation in the economical, financial, technological, international, social, and ethical aspects of human resources in order to become competent managers, employees, and entrepreneurs.

- Grades 11 - 12
- Recommended prerequisite: Principles of Business, Marketing and Finance
- Program of Study: Business Management
- Lab supplies or fee may be required

Insurance Operations

1 credit

In Insurance Operations, students will understand the laws and regulations in order to manage business operations and transactions in the insurance industry.

- Grades 11 - 12
- Recommended prerequisite: at least one Finance course (Accounting I, Banking & Financial Services or Money Matters)
- Program of Study: Accounting & Financial Services
- Satisfies advanced course requirement for Business & Industry endorsement
- Lab supplies or fee may be required
Money Matters
In Money Matters, students will gain an understanding of the fundamental principles of money and personal financial planning. Special emphasis is placed on bank record management, use of credit, investing, insurance, and budgets. In addition, students are introduced to financial market and securities analysis, and career readiness. Current economic events indicate that it is never too early for students to gain an awareness of factors that will impact their short-term and long-term financial plans.
- Grades 9 - 12
- Program of Study: Accounting & Financial Services
- Lab supplies or fee may be required.

Securities and Investments
Securities and investments have become top story items in today’s news. Knowing what a security is (and is not), how profit is generated, regulations and taxation issues, real estate law and the nature of investment risk will not only help students understand the news, but gain insight into options for their own personal financial planning as well. You, too, can soon own a part of your favorite company. Students taking this course should consider also taking Banking and Financial Services.
- Grades 11 - 12
- Recommended prerequisite: at least one Finance course (Accounting I, Banking & Financial Services or Money Matters)
- Program of Study: Accounting & Financial Services
- Satisfies advanced course requirement for Business & Industry endorsement.
- Lab supplies or fee may be required.

Virtual Business
Virtual Business is designed for students to start a virtual business by creating a web presence, conducting online and off-line marketing, examining contracts appropriate for an online business and demonstrating project management skills. Students will also demonstrate bookkeeping skills for a virtual business, maintain business records, and understand legal issues associated with a virtual business. The culminating project will include building a functional website that incorporates the essentials of a virtual business. Students taking this course should consider also taking Global Business and/or Human Resource Management and Business Management.
- Grades 10 - 12
- Recommended prerequisite: Principles of Business, Marketing and Finance
- Program of Study: Marketing & Sales
- Lab supplies or fee may be required.

Sports and Entertainment Marketing
Sports and Entertainment Marketing allows students to apply marketing principles and processes to the sports and entertainment industry. Students will investigate sponsorships, promotion/public relations, merchandising, advertising, sales, and events through case studies and simulations. Behind the superstars are those who have mastered the craft of developing the true connections with consumers needed to build that passion.
- Grades 10 - 12
- Recommended prerequisite: Principles of Business, Marketing and Finance
- Program of Study: Marketing & Sales
- Lab supplies or fee may be required.

Touch System Data Entry
The Touch System Data Entry course provides students the opportunity to improve their speed and accuracy on the keyboard. In addition, the course focuses on document formatting skills applicable in many personal, educational, and workplace settings. With an ever increasing focus on technology, these skills are valuable for all students.
- Grades 7 - 12
- Strongly recommended for all students.
- Related elective that can be added as additional credit to any of the Business, Marketing & Finance Programs of Study
- Lab supplies or fee may be required.

Social Media Marketing
Social Media Marketing is designed to look at the rise of social media and how marketers are integrating social media tools in their overall marketing strategy. The course will investigate how the marketing community measures success in the new world of social media. Students will manage a successful social media presence for an organization, understand techniques for gaining customer and consumer buy-in to achieve marketing goals, and properly select social media platforms to engage consumers and monitor and measure the results of these efforts.
- Grades 10 - 12
- Recommended prerequisite: Principles of Business, Marketing and Finance
- Program of Study: Marketing & Sales
- Lab supplies or fee may be required.
Course with “advanced” topics - Students wishing to earn an endorsement by taking CTE courses must take at least one with advanced topics. 

Course includes training for an industry-standard certification. While students pay for the certification exam, the training is offered at no cost.

Course includes training for a certification meeting the requirements for a student to earn a Performance Acknowledgment if they successfully earn it.

Practicum in Business Management I  
2 credits (work-based)  
Certification: Microsoft Office

This course allows students to apply business concepts and principles in the classroom and the workplace. In the classroom portion of the course, students will gain a working knowledge of office-related skills such as communication, ethics, office technology (Microsoft Office and Adobe applications), and resume writing. Students will also receive industry-recognized training designed to make them more marketable and desirable in the workplace. Students are required to work 15 hours per week at an approved training site and must be employed at that site within 15 school days after enrollment in the course.

- Grades 11 - 12
- Reuired prerequisite: At least one credit in Business, Marketing and Finance cluster and age 16 with reliable transportation
- Programs of Study: Accounting & Financial Services, Business Management and Entrepreneurship
- Satisfies advanced course requirement for Business & Industry endorsement.
- Microsoft Office-Word, Microsoft-Expert Word, Microsoft Office-Excel and Microsoft Office-Expert Excel certifications each satisfy the requirement to earn a Performance Acknowledgment.
- Students earning Word Expert, Excel Expert, Powerpoint, and Access certifications also earn the Microsoft Office Specialist-Master certification, which satisfies requirement to earn an additional Performance Acknowledgment.
- Lab supplies or fee may be required.
- May be taken a second year (Practicum in Business Management II) for an additional 2 credits if you get a job in a different field.
- Students must provide own transportation to the work site

Practicum in Marketing I  
2 credits (work-based)  
Certifications: Real Estate Sales License

This course allows students to apply marketing concepts and principles in the classroom and the workplace. In the classroom portion of the course, students will gain a working knowledge of marketing functions such as selling, advertising, display, the free enterprise system, inventory control systems, marketing mathematics, and resume writing. Students will also receive industry-recognized training designed to make them more marketable and desirable in the workplace. Students are required to work 15 hours per week at an approved training site and must be employed at that site within 15 school days after enrollment in the course. Students, age 17 and older, may opt to pursue their real estate license for an additional cost.

- Grades 11 - 12
- Recommended prerequisite: At least one course in Business, Marketing & Finance cluster or related area
- Required prerequisite: Age 16 with reliable transportation
- Programs of Study: Entrepreneurship and Marketing & Sales
- Satisfies advanced course requirement for Business & Industry endorsement.
- Lab supplies or fee may be required.
- May be taken a second year (Practicum in Marketing II) for an additional 2 credits if you get a job in a different field.
- Students must provide own transportation to the work site

Business English  
1 credit (English)

The Business English course allows students to enhance their reading, writing, computing, communication, and reasoning skills and apply them to the business environment. Students edit their work for clarity, engaging language, and the correct use of the conventions and mechanics of written English to produce final, error-free drafts for business reproduction. Having quality written and verbal communication is key to success in business as there is often no second chance to make a first impression. This course is designed for students graduating with an endorsement in Business and Industry.

- Grade 12
- Prerequisites: Successful completion of English I-III and satisfactory performance on STAAR English I and II End-of-Course; Touch System Data Entry recommended.
- Related elective that can be added as additional credit to any of the Business, Marketing & Finance Programs of Study
- This course may satisfy the 4th English credit required for graduation on the Foundation High School Program.
- Note: Students selecting this course as their fourth English will not be eligible for the TSI waiver.

</table>
**EDUCATION AND TRAINING**

**Endorsement: Public Services**

---

**Teacher Prep I (Instructional Practices)**  
**CFISD Letter of Intent to Interview**  
2 credits (student teaching)  
This course is a field-based internship that provides students with background knowledge of child and adolescent development as well as principles of effective teaching and training practices. Students work under the joint direction and supervision of both a teacher with knowledge of early childhood education and exemplary educators or trainers in direct instructional roles with elementary students. Students learn to plan and direct individualized instruction and group activities, prepare instructional materials, develop materials for educational environments, assist with record keeping, and complete other responsibilities of teachers, trainers, paraprofessionals, or other educational personnel. Standard professional dress is required when on “cooperating” school campuses.
- Grades 11 - 12
- Recommended prerequisite: Principles of Education and Training or Principles of Human Services and Child Development or Communication and Technology in Education
- Program of Study: Teaching/Training
- Satisfies advanced course requirement for Public Services endorsement
- Seniors receive CFISD Letter of Intent to Interview upon successful completion of program.
- Lab/uniform fee may be required

---

**Child Guidance**  
**CFISD Letter of Intent to Interview**  
2 credits (preschool lab)  
In a “hands-on” laboratory setting, students work with three and four-year-old students in a preschool educational environment, applying knowledge and skills related to child growth and guidance.
- Grades 11 - 12
- Recommended prerequisite: Principles of Human Services or Principles of Education & Training and Child Development or Child Development Associate Foundations
- Program of Study: Early Learning
- Satisfies advanced course requirement for Public Services endorsement.
- Seniors receive CFISD Letter of Intent to Interview upon successful completion of program.
- An application may be required if demand exceeds number of available slots.
- Lab supplies/uniform or fee may be required.

---

**Teacher Prep II (Practicum in Education and Training)**  
**CFISD Letter of Intent to Interview**  
2 credits (student teaching)  
Certification: Educational Aide I
This course is the continuation of a field based internship that provides students background knowledge of child and adolescent development principles as well as principles of effective teaching and training practices. Students in this course mentor the students in Instructional Practices course and are assigned to an elementary and/or secondary “cooperating” school environment. Here they continue to plan and direct individualized instruction and group activities, prepare instructional materials, assist with recordkeeping, make physical arrangements, and complete other responsibilities of classroom teachers, trainers, paraprofessionals, or other educational personnel.
- Grade 12
- Required prerequisite: Teacher Prep I (Instructional Practices)
- Program of Study: Teaching/Training
- Satisfies advanced course requirement for Public Services endorsement
- The Educational Aide I certification satisfies the requirement to earn a Performance Acknowledgment. NOTE: Requirements to fully earn this certification include high school graduation/GED and being at least 18 years of age.
- Seniors receive CFISD Letter of Intent to Interview upon successful completion of program.
- Lab/uniform fee may be required

---

**Practicum in Human Services**  
**CFISD Letter of Intent to Interview**  
2 credits (preschool lab)  
Certification: Child Development Associate (CDA)
This course continues the emphasis of laboratory experiences in a preschool setting. In this course, students mentor the Child Guidance students and continue participating in extended learning/teaching experiences with the three and four-year-old children in the preschools located in the high schools. They model ethical behaviors, comply with laws and regulations, and assist in establishing a physically and psychologically healthy environment to inspire client confidence in services provided. The students are expected to produce a professional portfolio.
- Grade 12
- Required prerequisite: Child Guidance
- Program of Study: Early Learning
- Satisfies advanced course requirement for Public Services endorsement.
- Child Development Associate certification satisfies the requirement to earn a Performance Acknowledgment.
- Seniors receive CFISD Letter of Intent to Interview upon successful completion of program.
- An application may be required if demand exceeds number of available slots.
- Lab supplies/uniform or fee may be required.

For more information, see your counselor, CTE teachers, or https://tinyurl.com/CTECFISD.
Medical Terminology                           1 credit
This course allows students to develop a working knowledge of the language of medicine by introducing them to the structure of medical terms, including prefixes, suffixes, word roots, combining forms, and singular and plural forms, plus medical abbreviations and acronyms. Comprehending this terminology will not only be beneficial in understanding other science and health science related courses taken in high school, but will also enhance their ability to secure employment or pursue further education in this industry.
- Grades 9 - 10
- Recommended to be taken prior to Principles of Health Science
- Programs of Study: Healthcare Diagnostics, Healthcare Therapeutic, Nursing Science and Health Informatics
- Lab supplies or fee may be required

Health Science Theory/Clinicals A C 2 credits
Certifications: OSHA-10hr, AHA Basic Life Support CPR
The Health Science Theory course is designed for the development of advanced knowledge and skills related to a wide variety of health careers. Students will employ hands-on experience for continued knowledge and skill development. Key components of this course may include CPR and OSHA certification, standard precautions, and ethics. The students will apply the concepts being learned in Health Science Theory and practice entry-level occupational skills in the clinical setting such as hospitals or other medical-related agencies.
- Grades 11 - 12, An application may be required if demand exceeds number of available slots.
- Required prerequisite: Principles of Health Science and Biology and verification of immunization requirements
- Programs of Study: Healthcare Diagnostics and Healthcare Therapeutic
- Satisfies advanced course requirement for Public Services endorsement
- Lab supplies or fee may be required.
- Background check and drug testing may be required.

Principles of Health Science C 1 credit (health)
Certification: AHA Heartsaver CPR/First Aid
This course is designed for students interested in medical and associated health careers. It gives an overview of the therapeutic, diagnostic, environmental, and informational systems of the health care industry. Topics include career requirements, medical history, trends in financing health care, ethical and legal responsibilities, human anatomy and physiology as related to the health care profession, client care, safety, first aid, and CPR. This course prepares the student for the transition to clinical and/or work-based experiences available in the advanced health science courses.
- Grades 10 - 12
- Completing the course satisfies the required health credit.
- Programs of Study: Healthcare Diagnostics, Healthcare Therapeutic, Nursing Science and Health Informatics
- Lab supplies or fee may be required.

Anatomy and Physiology K A 1 credit (science)
Anatomy and Physiology is a college preparatory course designed to extend the student’s knowledge and understanding of the human body in respect to its structure and function. A survey of each organ system is presented with initial emphasis upon its anatomy, followed by an in-depth study of its physiology. This course is labororiented and teaches proper dissection techniques as well as various physiological phenomena. This course is recommended for students pursuing an education in the medical sciences.
- Grades 11 - 12
- Required prerequisites: Biology and Chemistry
- Recommended prerequisites: Medical Terminology and Principles of Health Science
- Programs of Study: Healthcare Diagnostics, Healthcare Therapeutic, and Nursing Science
- Satisfies advanced course requirement for Public Services endorsement
- Completing this course satisfies a science credit required for graduation.
**HEALTH SCIENCE**

**Endorsement: Public Services**

**Pathophysiology K**

1 credit (science)

In Pathophysiology, students conduct laboratory and field investigations, use scientific methods during investigations, make informed decisions using critical thinking and scientific problem solving and demonstrate professional standards as related to business and industry. Students in Pathophysiology study disease processes and how humans are affected. Emphasis is placed on prevention and treatment of disease. Students will differentiate between normal and abnormal physiology.

- Grades 11 - 12
- Required prerequisites: Biology and Chemistry
- Recommended prerequisites: Medical Terminology, Principles of Health Science and Anatomy & Physiology K
- Programs of Study: Healthcare Diagnostics, Healthcare Therapeutic, and Nursing Science
- Satisfies advanced course requirement for Public Services endorsement
- Completing this course satisfies a science credit required for graduation

**World Health Research**

1 credit

The World Health Research course is designed to examine major world health problems and emerging technologies as solutions to these medical concerns. It is designed to improve students’ understanding of the cultural, infrastructural, political, educational, and technological constraints and inspire ideas for appropriate technological solutions to global medical care issues.

- Grades 11 - 12
- Required prerequisite: Principles of Health Science
- Recommended prerequisites: Biology, Chemistry, and Medical Terminology
- Program of Study: Health Informatics
- Satisfies advanced course requirement for Public Services endorsement
- Lab supplies or fee may be required.

**Practicum in Health Science**

2 credits

Certification: EMT or CNA or PharmTech

While earlier courses in health science provide students with an overview of the healthcare industry, this course allows students to select and pursue a specialization. Students will have the opportunity to gain knowledge and develop advanced clinical skills needed for a specific certification or licensure in an allied health career such as Pharmacy Technician, Certified Nursing Aide (CNA), or Emergency Medical Technician. Because training requirements vary by specialization, a program application process is required to determine the most appropriate method(s) of instruction. These may include classes on a college campus, pre-employment labs in the classroom, clinical internships or employment, or a combination.

- Grade 12, An application may be required if demand exceeds number of available slots.
- Required prerequisites: Principles of Health Science and one advanced health science-related course.
- Admissions application to Lone Star College is required for students interested in EMT or CNA. If accepted, students will be responsible for their own transportation to attend these classes at Lone Star College.
- Programs of Study: Healthcare Diagnostics, Healthcare Therapeutic, and Nursing Science
- Satisfies advanced course requirement for Public Services endorsement
- EMT, CNA, and PharmTech certifications each satisfy requirement to earn a Performance Acknowledgment.
- Lab supplies or fee may be required.
- Age requirements may also apply.
- Students must provide own transportation to the work site
Forensic Science K  A  1 credit (science)
Students will learn terminology and investigative procedures related to crime scene, questioning, interviewing, criminal behavior characteristics, truth detection, and scientific procedures used to solve crimes. Using scientific methods, students will collect and analyze evidence through case studies and simulated crime scenes such as fingerprints analysis, ballistics, and blood spatter analysis. Students will learn the history, legal aspects, and career options for forensic science.

- Grades 11 - 12
- Required prerequisites: Biology and Chemistry
- Recommended prerequisites: Medical Terminology and Principles of Health Science
- Related elective that can be added as additional credit to any of the Health Science Programs of Study
- Satisfies advanced course requirement for Public Services endorsement
- Completing this course satisfies a science credit required for graduation.

Course with “advanced” topics - Students wishing to earn an endorsement by taking CTE courses must take at least one with advanced topics.
Course includes training for an industry-standard certification. While students pay for the certification exam, the training is offered at no cost.
Course includes training for a certification meeting the requirements for a student to earn a Performance Acknowledgment if they successfully earn it.

HOSPITALITY & TOURISM
Endorsement: Business & Industry

Principles of Hospitality & Tourism 1 credit
The Hospitality/Tourism cluster includes those careers in the culinary, hotel, and travel industries. Exposure to these careers will include hands-on experiences while providing the complete dining experience and planning that perfect vacation.
- Offered in middle school only
- Program of Study: Culinary Arts

Introduction to Culinary Arts 1 credit
Certification: ServSafe Food Handler
This course will emphasize the principles of planning, organizing, staffing, directing, and controlling the management of a variety of food service operations. The course will provide insight into the operation of a well-run restaurant. Introduction to Culinary Arts will provide insight into food production skills, various levels of industry management, and hospitality skills. This is an entry level course for students interested in pursuing a career in the food service industry.
- Grades 9 - 10
- Recommended prerequisite: Principles of Hospitality
- Program of Study: Culinary Arts
- Lab supplies or fee may be required.

Culinary Arts 2 credits
Certification: ServSafe Manager
Culinary Arts is now available in all high schools as a two period laboratory FCS course, beginning with student instruction in the fundamentals and principles of the art of cooking and the science of baking, including management and production skills and techniques. Students are encouraged to pursue a national sanitation certification, a Texas culinary specialist certification or any other appropriate industry certification which would assist in immediate employment in a restaurant setting. This course would provide the foundation needed for students to progress to the Practicum in Culinary Arts the following school year.
- Grades 10 - 12
- Recommended prerequisite: Principles of Hospitality & Tourism or Introduction to Culinary Arts
- Program of Study: Culinary Arts
- The ServSafe Manager certification satisfies the requirement to earn a Performance Acknowledgment.
- Lab supplies/uniform or fee may be required.

Advanced Culinary Arts 2 credits
This course is a unique practicum that provides occupationally specific opportunities for students to participate in a learning experience that combines classroom instruction with actual business and industry career experiences. Practicum in Culinary Arts integrates academic and career and technical education with the goal of preparing students with a variety of skills in a fastchanging workplace. The students are actually major participants in operating a restaurant and catering business.
- Grades 11 - 12
- Required prerequisite: Culinary Arts and ServSafe Food Handler or ServSafe Food Manager certification
- Program of Study: Culinary Arts
- Satisfies advanced course requirement for Business & Industry endorsement.
- An application may be required if demand exceeds number of available slots.
- Lab supplies/uniform or fee may be required.
- Students will take this course at Cy-Fair High School, Cypress Park High School, or Cypress Ridge High School.

Food Science K 1 credit (science)
In Food Science, Students conduct laboratory and field investigations, use scientific methods during investigations, and make informed decisions using critical thinking and scientific problem solving. Food Science is the study of the nature of foods, the causes of deterioration, the principles underlying food processing, and the improvement of foods for the consuming public.
- Grades 11 - 12
- Required prerequisite: Culinary Arts and three units of science (including Biology and Chemistry)
- Program of Study: Culinary Arts
- Satisfies advanced course requirement for Business & Industry endorsement.
- Lab supplies/uniform or fee may be required.

Practicum in Culinary Arts 2 credits
This advanced culinary course allows 3rd year culinary students the opportunity to gain additional real world experience in a commercial kitchen. Instruction will be delivered through school-based laboratory training and through work-based arrangements such as practicum education, mentoring, and job shadowing.
- Grade 12
- Required prerequisite: Advanced Culinary Arts and ServSafe Food Handler or Food Manager
- Program of Study: Culinary Arts
- Satisfies advanced course requirement for Business & Industry endorsement.
- An application may be required if demand exceeds number of available slots.
- Lab supplies/uniform or fee may be required.
- Students will take this course at Cy-Fair High School, Cypress Park High School, or Cypress Ridge High School.
- Students must provide own transportation if utilizing work sites other than those listed above.

**Cosmetology Operators License

Careers
Hairdresser, Hairstylist, or Cosmetologist ($28K+)

*Meets Advanced Course Requirement for Public Services Endorsement
**Meets Requirement to Earn Performance Acknowledgement
For more information, see your counselor, CTE teachers, or https://tinyurl.com/CTECFISD.
**Principles of Human Services**  
1 credit  
This course will enable students to investigate careers in the Human Services Career Cluster, including counseling & mental health, early childhood development, family & community, personal care and consumer services. Each student is expected to complete the knowledge and skills essential for success in high-wage or high-demand human services careers.  
- Offered in middle school only  
- Programs of Study: Early Learning, Cosmetology, and Teaching/Training  

**Principles of Cosmetology Design & Color Theory**  
1 credit  
This exploratory course provides instruction in design and color theory of cosmetology. Students will attain academic and technical skills and knowledge in this laboratory course designed to provide job-specific training for employment in cosmetology careers. Learners will explore design elements of form, lines, texture, structure and illusion of depth as it relates to hair design and facial shapes as well as sterilization and sanitation for hair, nail and skin care. Good attendance is necessary as students earn clock hours toward state licensing requirement of 1000 hours.  
- Grades 9 - 10  
- May be taken in 11th or 12th grade if concurrent with Cosmetology I or Cosmetology II  
- Program of Study: Cosmetology  
- Students may opt to purchase lab kit and/or uniform.  
- $25 permit fee is required and MUST be paid within 7 days of enrollment to remain in the class if this is a student’s first course in cosmetology.  

**Introduction to Cosmetology**  
1 credit  
This exploratory course is required for students who are interested in a career in cosmetology, it also assists students who have an interest, but are unsure this is the career path they wish to follow. Learners explore areas such as bacteriology, sterilization and sanitation, hair styling, manicuring, shampooing, as well as the principles of hair cutting, hair coloring, skin care, and facial makeup. Connected to this is the study of careers in the personal care services industry. To be successful in this profession, students should possess skills/aptitudes relative to the industry, as well as academic knowledge and motivation. Good attendance is necessary as students earn clock hours toward state licensing requirement of 1000 hours.  
- Grade 10  
- May be taken in 11th grade if concurrent with Cos I  
- Program of Study: Cosmetology  
- Students may opt to purchase lab kit and/or uniform.  
- $25 permit fee is required and MUST be paid within 7 days of enrollment to remain in the class if this is a student’s first course in cosmetology.  

**Cosmetology I**  
2 credits  
This 2-hour block laboratory instructional sequence course continues the integration of academic, career, and technical knowledge and skills designed to provide job-specific training for employment in cosmetology careers. All the skills listed above in the Introduction course are continued for skill enhancement in this course. In addition, analysis of career opportunities, requirements, expectations, and development of workplace skills are included. Attendance is critical to the earning of the monitored 1000 clock hours required for qualification for taking the state examination for licensing.  
- Grade 11  
- Required prerequisite (or concurrent): Introduction to Cosmetology  
- Program of Study: Cosmetology  
- An application may be required if demand exceeds number of available slots.  
- Purchase of lab kit and uniform may be required, depending on what was purchased in Introduction to Cosmetology.  

**Cosmetology II**  
A C P 3 credits  
**Certification: Cosmetology Operator’s License**  
This course provides the final advanced training for employment in cosmetology careers (see list of trainings in the description of the Intro course). The course meets the Texas Department of Licensing and Regulation requirements for licensure upon completing the required 1000 clock hours of licensed instructor monitoring student classroom instruction/application and a passing grade on the state examination. Good attendance is necessary to be successful in this lucrative career path training.  
- Grade 12  
- Required prerequisite: Cosmetology I  
- Program of Study: Cosmetology  
- Satisfies advanced course requirement for Public Services endorsement.  
- Cosmetology Operator’s License satisfies requirement to earn a Performance Acknowledgment.  
- Purchase of lab kit and uniform may be required, depending on what was purchased in previous Cosmetology courses.

Principles of Information Technology  1 credit
Principles of Information Technology prepares students to adapt to emerging technologies used in the global marketplace. Students will enhance their reading, writing, computing, communication, and reasoning skills and apply them to the information technology environment. The students will research careers in the technology field, computer hardware, appropriate software, and network systems. The applications used include word processing, spreadsheets, database, presentation, design, and web publishing.

- Offered in middle school only
- Programs of Study: Network Services, Cybersecurity and Web Development
- Lab supplies or fee may be required

Networking  C P  1 credit
Certifications: CompTIA A+ and MTA Windows Operating System

Upon completion of this course, students will understand the fundamentals of computer hardware and software such that they can assemble a computer system, install an operating system, and troubleshoot any issues that arise. Other topics include preventative maintenance, networking and security. The goal of providing this training/certification is to assist students in becoming more marketable and desirable in the workplace.

- Grades 9 - 12
- Recommended prerequisite: Principles of Information Technology
- Programs of Study: Networking Securities and Cybersecurity
- CompTIA and MTA certifications each satisfy the requirement to earn a Performance Acknowledgment.
- Lab supplies or fee may be required

Internetworking Technologies I  A C P  1 credit
Certification: MTA Networking Fundamentals

Internetworking Technologies I prepares students to install, operate and troubleshoot a home or small business enterprise branch network. The content of this course is in alignment with the Cisco certifications earned in Internetworking Technologies II. The goal of providing this training/certification is to assist students in becoming more marketable and desirable in the workplace.

- Grades 10 - 12
- Recommended prerequisite: Networking
- Programs of Study: Networking Services and Cybersecurity
- Satisfies advanced course requirement for Business & Industry endorsement.
- MTA certifications satisfy the requirement to earn a Performance Acknowledgment.
- Lab supplies or fee may be required

Internetworking Technologies II  A C P  1 credit
Certifications: Cisco CCNA

Internetworking Technologies II prepares students to install, operate and troubleshoot a medium-sized business enterprise branch network. Completing both Internetworking Tech I and II prepares students to pass the CCNA exam, an industry-recognized certification in this field. The goal for providing this training/certification is to assist students in becoming more marketable and desirable in the workplace.

- Grades 11 - 12
- Required prerequisite: Internetworking Technologies I
- Program of Study: Networking Services
- Satisfies advanced course requirement for Business & Industry endorsement.
- Cisco certifications satisfy the requirement to earn a Performance Acknowledgment.
- Lab supplies or fee may be required

Project-based Research in Networking  A C P  1 credit (project-based)
Certifications: MTA Security Fundamentals and/or MTA Server Administration Fundamentals

This course is a supervised research study project-based class where students will apply knowledge and skills from previous networking courses in a related advanced/specialized field of study. Student projects will focus on either the Internet of Things or Cybersecurity. Students are required to submit a formal project plan within 15 school days after enrollment in the course. The plan should specify the additional concepts and/or technologies that will be studied and utilized, along with an overview of the culminating project.

- Grades 11 - 12
- Required prerequisite (or concurrent): At least 2 technology courses with at least one being Networking or Internetworking Tech I
- Programs of Study: Networking Services and Cybersecurity
- Satisfies advanced course requirement for Business & Industry endorsement.
- MTA certifications satisfy the requirement to earn a Performance Acknowledgment.
- Lab supplies or fee may be required
Practicum in Information Technology  
A  
2 credits (work-based)  
This course allows students to apply and expand upon previously learned IT concepts and principles in the classroom and the workplace. In the classroom portion of the course, students will gain knowledge of professional standards as required by business and industry. Students will also receive industry-recognized training designed to make them more marketable and desirable in the workplace. Students are required to work 10 hours per week at an approved training site and must be employed at that site within 15 school days after enrollment in the course.

- Grade 12
- Required prerequisite (or concurrent): At least 2 technology courses with at least one being Networking or Internetworking Tech I
- Satisfies advanced course requirement for Business & Industry endorsement.
- Lab supplies or fee may be required.
- Students must provide own transportation to the work site

Business Information Management I (BIM I)  
C P  
1 credit  
(Also listed in Business, Marketing & Finance and Health Science Clusters)

Certification: Microsoft Office  
BIM I prepares students to apply personal, interpersonal, and technology skills in other content areas, the workplace, and post-secondary education. The applications utilized in this course will include word processing, spreadsheets, multimedia presentations, databases, Internet research, and a look at emerging technologies. While an emphasis will be placed on simulations related to business, finance, and marketing, this introductory technology course is appropriate for students whose career interests fall within any of the 16 career clusters.

- Grades 8 - 12
- Recommended prerequisite: Touch System Data Entry
- Programs of Study: Business Management, Entrepreneurship, Health Informatics and is also a related elective that can be added as additional credit to the Network Systems Program of Study
- Microsoft Office-Word, Microsoft-Expert Word, Microsoft Office-Excel and Microsoft Office-Expert Excel certifications each satisfy the requirement to earn a Performance Acknowledgment.
- Students earning Word Expert, Excel Expert, Powerpoint, and Access certifications also earn the Microsoft Office Specialist-Master certification, which satisfies requirement to earn an additional Performance Acknowledgment.
- Lab supplies or fee may be required.

Digital Media  
P  
1 credit  
(Also listed in Arts, A/V Tech cluster)

Certification: Adobe Photoshop and Adobe Web Design Specialist  
This course allows students to apply and expand upon previously learned IT concepts and principles in the classroom and the workplace. In the classroom portion of the course, students will gain knowledge of professional standards as required by business and industry. Students will also receive industry-recognized training designed to make them more marketable and desirable in the workplace. Students are required to work 10 hours per week at an approved training site and must be employed at that site within 15 school days after enrollment in the course.

- Grade 12
- Required prerequisite (or concurrent): At least 2 technology courses with at least one being Networking or Internetworking Tech I
- Satisfies advanced course requirement for Business & Industry endorsement.
- Lab supplies or fee may be required.

Web Technologies I  
P  
1 credit  
(Also listed in Arts, A/V Tech cluster)

Certification: Adobe Dreamweaver and Web Design Specialist  
This course allows students to apply and expand upon previously learned IT concepts and principles in the classroom and the workplace. In the classroom portion of the course, students will gain knowledge of professional standards as required by business and industry. Students will also receive industry-recognized training designed to make them more marketable and desirable in the workplace. Students are required to work 10 hours per week at an approved training site and must be employed at that site within 15 school days after enrollment in the course.

- Grade 12
- Required prerequisite (or concurrent): At least 2 technology courses with at least one being Networking or Internetworking Tech I
- Satisfies advanced course requirement for Business & Industry endorsement.
- Lab supplies or fee may be required.
Web Technologies II  A  1 credit
This course provides students the opportunity to expand upon the web tech knowledge and skills mastered in the Web Technologies I course. Students will focus on advanced web page concepts and applications, including the incorporation of web-based programming languages such as JavaScript, Perl or mySQL. Students are required to submit a formal project plan within 15 school days after enrollment in the course. The plan should specify the additional languages and/or technologies that will be studied and utilized, along with an overview of the culminating project.
- Grades 10 - 12
- Required prerequisite: Web Technologies I
- Program of Study: Web Development
- Satisfies advanced course requirement for Business & Industry endorsement.
- Lab supplies or fee may be required.

Animation I  C P  1 credit
(also listed in Arts, A/V Tech cluster)
Certification: Adobe Animate and Adobe Web Design Specialist
This course allows students to create animation projects using principles of design to combine graphics, images and sound. A variety of techniques will be explored, including storyboarding, scripting/programming, interactivity, and flip books. The emphasis will be on utilizing the features in Adobe Animate included in the corresponding industry-recognized certification. Students earning certifications in Adobe Animate, Dreamweaver and Photoshop are considered Web Design Specialists.
- Grades 10 - 12
- Recommended prerequisite: Digital Media
- Program of Study: Multimedia Arts and related elective that can be added as additional credit to the Web Development Program of Study
- Adobe Animate and Web Design Specialist certifications satisfy requirement to earn a Performance Acknowledgment.
- Lab supplies or fee may be required.

Project-based Research in Web Development  A  1 credit (project-based)
(formerly known as PBR in Multimedia)
This course is a supervised research study project-based class where students will apply knowledge and skills from previous web technologies courses in a related advanced/specialized field of study. Students are required to submit a formal project plan within 15 school days after enrollment in the course. The plan should specify the additional concepts and/or technologies that will be studied and utilized, along with an overview of the culminating project.
- Grades 11 - 12
- Required prerequisite: Web Technologies II
- Programs of Study: Web Development
- Satisfies advanced course requirement for Business & Industry endorsement.
- Lab supplies or fee may be required.

MANUFACTURING
Endorsement: Business & Industry

Course with "advanced" topics - Students wishing to earn an endorsement by taking CTE courses must take at least one with advanced topics.

Course includes training for an industry-standard certification. While students pay for the certification exam, the training is offered at no cost.

Course includes training for a certification meeting the requirements for a student to earn a Performance Acknowledgment if they successfully earn it.

Principles of Manufacturing  
Certification: NCCER CORE
1 credit

Principles of Manufacturing will allow students to reinforce, apply, and transfer academic knowledge and skills to a variety of interesting, relevant activities and problems in a manufacturing setting. Students will design, produce, and assess products, services, and systems. They will use a variety of hand tools, power tools, machinery, computer hardware, and software applications to complete assignments and projects individually or with teams.

- Grades 8 - 11
- Programs of Study: Manufacturing and Welding
- NCCER CORE Certification satisfies requirement to earn a Performance Acknowledgment.
- Lab supplies or fee may be required.

Diversified Manufacturing I

Certification: NCCER CORE
1 credit

This course allows students to gain knowledge and skills in the application, design, production, and assessment of products, services, and systems and how those knowledge and skills are applied to manufacturing. Diversified Manufacturing I allows students the opportunity to understand the process of mass production by using a wide variety of materials and manufacturing techniques. Knowledge about career opportunities, requirements, and expectations and the development of skills prepare students for workplace success.

- Grades 9 - 12
- Required prerequisite: Principles of Manufacturing
- Program of Study: Manufacturing
- Lab supplies or fee may be required.

Diversified Manufacturing II

Certifications: OSHA 10-HR Card,  
MasterCAM Professional Level Certification
1 credit

This course builds on knowledge and skill developed in Diversified Manufacturing I. Students will develop advanced skills related to the industry manufacturing through the use of machines and tools used in industry.

- Grades 10 - 12
- Required prerequisite: Diversified Manufacturing I
- Program of Study: Manufacturing
- Satisfies advanced course requirement for Business & Industry endorsement.
- MasterCAM Professional Level Certification satisfies requirement to earn a Performance Acknowledgment.
- Lab supplies or fee may be required.

Precision Metal Manufacturing I

Certification: NCCER CORE
2 credits

This course will provide the knowledge, skills, and technologies required for employment in precision machining. While the course is designed to provide necessary skills in machining, it also provides a real-world foundation for any engineering discipline. This course may address a variety of materials such as plastics, ceramics, and wood in addition to metal.

- Grades 11 - 12
- Required prerequisite: Diversified Manufacturing I
- Program of Study: Manufacturing
- Satisfies advanced course requirement for Business & Industry endorsement.
- Lab supplies or fee may be required.

Precision Metal Manufacturing II

Certification: MasterCAM Professional Level Certification
2 credits

This course will provide students advanced knowledge, skills, and technologies required for employment in precision machining. While this course is designed to provide necessary skills in machining, it also provides a real-world foundation for any engineering discipline. This course addresses a variety of materials such as plastics, ceramics, and wood in addition to metal. Students will develop knowledge of the concepts and skills related to these systems to apply them to personal and career development.

- Grade 12
- Required prerequisite: Precision Metal Manufacturing I
- Program of Study: Manufacturing
- Satisfies advanced course requirement for Business & Industry endorsement.
- MasterCAM Professional Level Certification satisfies requirement to earn a Performance Acknowledgment.
- Lab supplies or fee may be required.
Welding I  
Certifications: OSHA-10hr, American Welding Society (AWS)
This Career and Technical course is for students interested in welding as a career. Training for employment with entry-level skills in welding trades will be emphasized. Instruction follows an industry-standard curriculum, and students’ certifications are listed in a national registry upon successful completion. Oxy-fuel welding and cutting, plasma arc cutting, shielded metal arc welding, gas metal arc welding, flux cored arc welding, and gas tungsten arc welding will be covered. Hand and power tools, welding on various types of metals, reading blueprint welding symbols, metal characteristics, and equipment setup are other areas that students master. Safety, leadership, entrepreneurship, and career opportunities are included.

- Grades 10 - 12, priority given to 10th and 11th graders
- Recommended prerequisite: Principles of Manufacturing or Agricultural Mechanics and Metal Technologies
- Program of Study: Welding
- An application may be required if demand exceeds number of available slots.
- AWS certification satisfies requirement to earn a Performance Acknowledgment. Certifications available: Flat, Horizontal, Vertical, and Overhead.
- Lab supplies or fee may be required.

Welding II  
Certifications: American Welding Society (AWS), API Welding
This advanced level Career and Technical course is for students interested in welding as a career. Advanced Welding builds on knowledge and skills developed in the previous welding course. Training for employment with advance-level skills in welding trades will be emphasized. Instruction follows an industry-standard curriculum, and students’ certifications are listed in a national registry upon successful completion. Oxy-fuel welding and cutting, plasma arc cutting, shielded metal arc welding, gas metal arc welding, flux cored arc welding, and gas tungsten arc welding will be covered. Hand and power tools, welding on various types of metals, reading blueprint welding symbols, metal characteristics, and equipment setup are other areas that students master. Safety, leadership, entrepreneurship, and career opportunities are included.

- Grades 11 - 12
- Required prerequisite: Welding I, Diversified Manufacturing I, Precision Metal Manufacturing I or Robotics I and age 16 if paid training site
- Program of Study: Manufacturing, Welding and Robotics
- Satisfies advanced course requirement for Business & Industry endorsement.
- Lab supplies or fee may be required.
- Students must provide own transportation to the work site

Practicum in Manufacturing  
This course allows students to apply manufacturing concepts and principles in the classroom and the workplace. In the classroom portion of the course, students will gain knowledge of professional standards as required by business and industry. Students will also receive industry-recognized training designed to make them more marketable and desirable in the workplace. Students are required to work 10 hours per week at an approved training site and must be employed at that site within 15 school days after enrollment in the course.

- Grades 11 - 12
- Required prerequisite: Welding I, Diversified Manufacturing I, Precision Metal Manufacturing I or Robotics I and age 16 if paid training site
- Program of Study: Manufacturing, Welding and Robotics
- Satisfies advanced course requirement for Business & Industry endorsement.
- Lab supplies or fee may be required.
### Programs of Study
#### STEM 1: PROGRAMMING & SOFTWARE DEV
- **9th Grade**
  - Computer Science Principles AP (1)
  - or Computer Science I K (1)
- **10th Grade**
  - Computer Science Principles AP (1)
  - or Computer Science I K (1)
  - or Computer Science II K (1)
- **11th Grade**
  - Computer Science Principles AP (1)
  - or Computer Science I K (1)
  - or Computer Science II K (1)
- **12th Grade**
  - Computer Science III K (1)
  - or Project-based Computer Science: Mobile App Development K (1)

**Certifications**
- MTA Intro to Java Programming
- Oracle Java SE Programming

**Careers**
- Computer Network Architect ($111K)
- Software Developer ($103K)

#### STEM 2: ROBOTICS
- **9th Grade**
  - Principles of Applied Engineering (1)
- **10th Grade**
  - Robotics I (1)
- **11th Grade**
  - *Robotics II K (1-math)*
- **12th Grade**
  - Practicum in Manufacturing (2)

**Certifications**
- Autodesk Inventor

**Careers**
- Electro-Mechanical Assembler ($30K)
- Electro-Mechanical Technician ($57K)
- Industrial Machinery Mechanic ($50K)

#### STEM 3: ENGINEERING
- **9th Grade**
  - Principles of Applied Engineering (1)
- **10th Grade**
  - Engineering Design & Presentation I (1)
- **11th Grade**
  - *Engineering Design & Presentation II (2)*
- **12th Grade**
  - Eng Design & Problem Solving K (1-science)
  - or Practicum in STEM (2)

**Certifications**
- Certified SolidWorks Associate
- MTA Intro to Java Programming
- Oracle Java SE Programming

**Careers**
- Industrial Engineer ($97K)
- Mechanical Engineer ($92K)
- Chemical Engineer ($112K)
- Electrical Engineer ($98K)

#### STEM 4: STEM ACADEMY FOR ARC (HOUSED AT CYPRESS SPRINGS)
- **9th Grade**
  - Computer Science I K (1-LOTE)
  - Manufacturing Engineer Tech I K (1)
- **10th Grade**
  - Computer Science II K (1-LOTE)
  - Digital Electronics K (1-math)
- **11th Grade**
  - *Computer Science III (1)*
  - *Engineering Math K (1-math)*
- **12th Grade**
  - *Project-based Computer Science: Robotics Programming K (1)
  - *Scientific Research & Design I K (1-science)*

**Certifications**
- Certified SolidWorks Associate
- MTA Intro to Java Programming
- Oracle Java SE Programming

**Careers**
- Mechanical/Electrical Engineer ($95K)
- Hardware Engineer ($99K)
- CAD Drafter ($46K)
- Software Engineer ($100K)
- Computer Programmer ($75K)

---

*Meets Advanced Course Requirement for STEM Endorsement*

**Meets Requirement to Earn Performance Acknowledgement**

For more information, see your counselor, CTE teachers, or https://tinyurl.com/CTECFISD.
SCIENCE, TECHNOLOGY, ENGINEERING AND MATH (STEM)
Endorsement: STEM

Course with “advanced” topics - Students wishing to earn an endorsement by taking CTE courses must take at least one with advanced topics.

Course includes training for an industry-standard certification. While students pay for the certification exam, the training is offered at no cost.

Course includes training for a certification meeting the requirements for a student to earn a Performance Acknowledgment if they successfully earn it.

TECHNOLOGY (COMPUTER SCIENCE)

Computer Science Principles AP      1 credit (LOTE)
Potential College Credit via AP Exam

The AP Computer Science Principles course will introduce you to the essential ideas of computer science and show how computing and technology can influence the world around you. Students will creatively address real-world issues and concerns while using the same processes and tools as artists, writers, computer scientists, and engineers to bring ideas to life.

- Grades 9 - 12
- Required prerequisite: Algebra I
- Program of Study: Programming & Software Development
- Recommended to be taken prior to or concurrent with Computer Science II K
- May not be taken post Computer Science III K
- Lab supplies or fee may be required.

Computer Science I K      1 credit (LOTE)

Computer Science I K is an introduction to the automated processing of information, including computer programming. This course gives students the conceptual background necessary to understand and construct programs, including the ability to specify computations, understand evaluation models, and utilize major constructs such as functions and procedures, data storage, conditionals and looping. At the end of this course, students should be able to read and write small programs in the language of Java in response to a given problem or scenario, preparing them to continue on to Computer Science II K.

- Grades 9 - 12
- Required prerequisite: Algebra I
- Program of Study: Programming & Software Development
- Lab supplies or fee may be required.

Computer Science II K (AP A Test Prep)      1 credit (LOTE)
Potential College Credit via AP Exam

Computer Science II K is a programming course designed to cover the Advance Placement (AP) Computer Science AP A Exam topics. The curriculum will build upon the topics addressed in Computer Science I K. Object-oriented components in the language of Java will be stressed. Other topics include decision making, looping, arrays, inheritance, interfaces, abstract classes, Java collections, sorting, searching, and the AP Case Study.

- Grades 10 - 12 (9th graders may enroll if concurrent with Algebra II)
- Required prerequisite: Algebra II or concurrent; Computer Science I K or Geometry K and prior programming experience
- Program of Study: Programming & Software Development
- Lab supplies or fee may be required.

Computer Science III K      1 credit (LOTE)
Certification: Oracle Java SE 8 Programmer, MTA Intro to Java Programming

Computer Science III K is a continuation of Computer Science II K and builds upon such topics as object-oriented programming, inheritance, and classes. Students go on to address advanced topics such as stacks, queues, advanced recursion, linked lists, binary trees, and advanced sorting, and searching topics in preparation for and alignment with college-level computer science.

- Grades 11 - 12
- Required prerequisite: Computer Science II K
- Program of Study: Programming & Software Development
- Satisfies advanced course requirement for STEM endorsement.
- Oracle Java SE 8 Programmer and MTA Intro to Java Programming certifications each satisfy requirement to earn a Performance Acknowledgment.
- Lab supplies or fee may be required.

Project-based Computer Science: Mobile App Development K      1 credit

Mobile Application Development is a course that students will have the opportunity to showcase their creativity and innovation through the development of projects using mobile computing devices. Students will collaborate with other peers, instructors and/or community members to problem solve, create and design mobile computing solutions based on the need of individuals or businesses. Students will gain a deeper understanding of the knowledge and skills of mobile application development through different platforms, programming languages and software design standards. Students will also research current laws and regulations to make sure their mobile computing solution adheres to all protocols that encompass all laws and regulations as set forth by governing agencies.

- Grades 11 - 12
- Required prerequisite: Computer Science II K or concurrent
- Program of Study: Programming & Software Development
- Satisfies advanced course requirement for STEM endorsement.
- Lab supplies or fee may be required.

* The following computer programming courses may satisfy the LOTE requirement for graduation:
  - Computer Science Principles AP
  - Computer Science I K
  - Computer Science II K
  - Computer Science III K

* Colleges and universities set their own entrance requirements. Consequently, a student should verify admission requirements with the specific college/university.
2021 - 2022 High School Offerings

SCIENCE, TECHNOLOGY, ENGINEERING AND MATH (STEM)
Endorsement: STEM

Course with "advanced" topics - Students wishing to earn an endorsement by taking CTE courses must take at least one with advanced topics.

Course includes training for an industry-standard certification. While students pay for the certification exam, the training is offered at no cost.

Course includes training for a certification meeting the requirements for a student to earn a Performance Acknowledgment if they successfully earn it.

ENGINEERING

Principles of Applied Engineering 1 credit
Principles of Applied Engineering provides an overview of the various fields of science, technology, engineering, and mathematics and their interrelationships. Students will develop engineering communication skills, which include computer graphics, modeling, and presentations, by using a variety of computer hardware and software applications to complete assignments and projects. Upon completing this course, students will have an understanding of the various fields of engineering and will be able to make informed career decisions.
- Grades 7 - 10
- Programs of Study: Robotics and Engineering
- Lab supplies or fee may be required

Engineering Design and Presentation I 1 credit
Students will use multiple software applications and tools necessary to produce and present working drawings, solid model renderings, and prototypes relating to the engineering design fields. Students will use a variety of computer hardware and software applications to complete assignments and projects.
- Grades 9 - 12
- Required prerequisite: Principles of Applied Engineering
- Program of Study: Engineering
- Lab supplies or fee may be required

Engineering Design and Presentation II 2 credits
Certification: Autodesk Inventor
Students will work on a variety of projects that will help them develop design skills including those related to team building, problem solving, time management, project design and development. Students will be encouraged to enter competitive events that lead to the completion of industry certifications, internships, and career opportunities.
- Grades 10 - 12
- Required prerequisite: Engineering Design and Presentation I
- Program of Study: Engineering
- Satisfies advanced course requirement for STEM endorsement.
- Autodesk Inventor certification satisfies requirement to earn a Performance Acknowledgment.
- Lab supplies or fee may be required

Engineering Design and Problem Solving K 1 credit (science)
Engineering Design and Problem Solving reinforces and integrates skills learned in previous mathematics and science courses. This course emphasizes solving problems, moving from well-defined toward more open-ended, with real-world application. Students apply critical thinking skills to justify a solution from multiple design options. This course is intended to stimulate students’ ingenuity, intellectual talents, and practical skills in devising solutions to engineering design problems in a project-based learning environment. Students use the engineering design process cycle to investigate, design, plan, create, and evaluate solutions. At the same time, this course fosters awareness of the social and ethical implications of technological development.
- Grades 11 - 12
- Required prerequisites: Algebra II, Chemistry, Physics (or concurrent), Engineering Design and Presentation I or Manufacturing Engineering Technology K (ARC)
- Program of Study: Engineering
- Satisfies advanced course requirement for STEM endorsement.
- Completing this course satisfies a science credit required for graduation

Robotics I 1 credit
In Robotics I, students will transfer academic skills to component designs in a project-based environment through implementation of the design process. Students will build prototypes or use simulation software to test their designs. Additionally, students will explore career opportunities, employer expectations, and educational needs in the robotic and automation industry.
- Grades 9 - 12
- Required prerequisite: Principles of Applied Engineering
- Program of Study: Robotics
- Lab supplies or fee may be required
SCIENCE, TECHNOLOGY, ENGINEERING AND MATH (STEM)
Endorsement: STEM

Course with "advanced" topics - Students wishing to earn an endorsement by taking CTE courses must take at least one with advanced topics.

Course includes training for an industry-standard certification. While students pay for the certification exam, the training is offered at no cost.

Course includes training for a certification meeting the requirements for a student to earn a Performance Acknowledgment if they successfully earn it.

ENGINEERING continued

Robotics II K  1 credit (math)
Certification: FANUC Robot Operator 1

In Robotics II K, students will explore artificial intelligence and programming in the robotic and automation industry. Through implementation of the design process, students will transfer academic skills to component designs in a project-based environment. Students will build prototypes and use software to test their designs.

• Grades 10 - 12
• Required prerequisite: Robotics I
• Program of Study: Robotics
• Satisfies advanced course requirement for STEM endorsement.
• FANUC Robot Operator 1 certification satisfies requirement to earn a Performance Acknowledgment
• Completing this course satisfies a math credit required for graduation.
• Lab supplies or fee may be required

Practicum in STEM  2 credits (work-based)
This course allows students to apply science, technology, engineering, and mathematic concepts and principles in the classroom and the workplace. In the classroom portion of the course, students will gain knowledge of professional standards as required by business and industry. Students will also receive industry-recognized training designed to make them more marketable and desirable in the workplace. Students are required to work 10 hours per week at an approved training site and must be employed at that site within 15 school days after enrollment in the course.

• Grades 11 - 12
• Required prerequisite: Engineering Design I and age 16 if paid training site
• Programs of Study: Robotics and Engineering
• Satisfies advanced course requirement for STEM endorsement.
• Lab supplies or fee may be required.
• Students must provide own transportation to the work site

Practicum in Manufacturing  2 credits (work-based)
(also listed in Manufacturing cluster)
This course allows students to apply manufacturing concepts and principles in the classroom and the workplace. In the classroom portion of the course, students will gain knowledge of professional standards as required by business and industry. Students will also receive industry-recognized training designed to make them more marketable and desirable in the workplace. Students are required to work 10 hours per week at an approved training site and must be employed at that site within 15 school days after enrollment in the course.

• Grades 11 - 12
• Required prerequisite: Welding I, Diversified Manufacturing I, Precision Metal Manufacturing or Robotics I and age 16 if paid training site
• Programs of Study: Manufacturing, Welding and Robotics
• Satisfies advanced course requirement for Business & Industry endorsement.
• Lab supplies or fee may be required.
• Students must provide own transportation to the work site
## CFISD STEM ACADEMY FOR AUTOMATION, ROBOTICS & COMPUTER SCIENCE (ARC)

(housed at Cypress Springs High School)

**Endorsement: Science, Technology, Engineering & Mathematics (STEM)**

---

### Academy Entry Requirements:
- Successful completion of Algebra I (80+ end-of-year average) in middle school
- Score Meets or Masters on 8th Reading STARR and Algebra I EOC
- Recommended to have completed Principles of Applied Engineering and/or Principles of Manufacturing
- If LOTE requirement for graduation is not met in middle school, one credit of LOTE, PE, or Art may need to be taken in summer school
- Enroll at Cypress Springs High School
- Application required - see your counselor

---

### Course Sequence (Program of Study) that satisfy the CTE course requirement for STEM Endorsement

Earn at least 4 credits by taking at least two courses in the same cluster, with at least one containing advanced topics in that field (*)--see page in this document on Endorsements or your counselor for more information on graduation requirements.

***Students who already have credit for Physics should consider taking Engineering Design and Problem Solving K as their science course.***
Computer Science I K  1 credit (LOTE)
Computer Science I K is an introduction to the automated processing of information, including computer programming. This course gives students the conceptual background necessary to understand and construct programs, including the ability to specify computations, understand evaluation models, and utilize major constructs such as functions and procedures, data storage, conditionals and looping. At the end of this course, students should be able to read and write small programs in the language of Java in response to a given problem or scenario, preparing them to continue on to Computer Science II K.

- Grades 9 - 12
- Required prerequisite: Algebra I
- Program of Study: Automation, Robotics & Computer Science
- Lab supplies or fee may be required.

Computer Science II K (AP A Test Prep)  1 credit (LOTE)  Potential College Credit via AP Exam
Computer Science II K is a programming course designed to cover the Advance Placement (AP) Computer Science AP A Exam topics. The curriculum will build upon the topics addressed in Computer Science I K. Object-oriented components in the language of Java will be stressed. Other topics include decision making, looping, arrays, inheritance, interfaces, abstract classes, Java collections, sorting, searching, and the AP Case Study.

- Grades 10 - 12 (9th graders may enroll if concurrent with Algebra II)
- Required prerequisite: Algebra II or concurrent; Computer Science I K or Geometry K and prior programming experience
- Program of Study: Automation, Robotics & Computer Science
- Lab supplies or fee may be required.

Computer Science III K  1 credit (LOTE)  Certification: Oracle Java SE 8 Programmer, MTA Intro to Java Programming
Computer Science III K is a continuation of Computer Science II K and builds upon such topics as object-oriented programming, inheritance, and classes. Students go on to address advanced topics such as stacks, queues, advanced recursion, linked lists, binary trees, and advanced sorting, and searching topics in preparation for and alignment with college-level computer science.

- Grades 11 - 12
- Required prerequisite: Computer Science II K
- Program of Study: Automation, Robotics & Computer Science
- Satisfies advanced course requirement for STEM endorsement.
- Oracle Java SE 8 Programmer and MTA Intro to Java Programming certifications each satisfy requirement to earn a Performance Acknowledgment.
- Lab supplies or fee may be required.

Project-based Computer Science: Robotics Programming K  1 credit (formerly Project-based Research in Computer Science K) (NEW 2022-2023)
In this course, students will translate the programming foundation they gained in Computer Science I, II, and III to other programming languages used in the field of robotics and automation. The focus will be on variations of the C programming language. Other topics may include analyzing the social responsibility of business and industry regarding the environment, ethics, health, safety, and diversity in society and the workplace as related to robotics and automation.

- Grade 12
- Required prerequisite: Computer Science III K and enrollment in CFISD ARC Academy
- Program of Study: Automation, Robotics & Computer Science
- Satisfies advanced course requirement for STEM endorsement.
- Lab supplies or fee may be required.
**Manufacturing Engineering Technology K**

1 credit

In this course, students will gain knowledge and skills in the application, design, production, and assessment of products, services, and systems and how those knowledge and skills are applied to manufacturing, robotics and automation. The study of manufacturing engineering and automation will allow students to reinforce, apply, and transfer academic knowledge and skills to a variety of interesting and relevant activities, problems, and settings in a manufacturing setting.

- Grade 9
- Required prerequisites: Algebra I and enrollment in CFISD ARC Academy
- Recommended prerequisite: Principles of Applied Engineering or Principles of Manufacturing
- Program of Study: Automation, Robotics & Computer Science
- Lab supplies or fee may be required

**Digital Electronics K**

1 credit (math)

This course is the study of electronic circuits that are used to process and control digital signals. Digital electronics is the foundation of modern electronic devices such as cellular phones, digital audio players, laptop computers, digital cameras, and high-definition televisions. The primary focus of Digital Electronics is to expose students to the design process of combinational and sequential logic design, teamwork, communication methods, engineering standards, and technical documentation.

- Grade 10
- Required prerequisites: Geometry, Manufacturing Engineering Technology K and enrollment in CFISD ARC Academy
- Program of Study: Automation, Robotics & Computer Science
- Lab supplies or fee may be required

**Engineering Math K**

(NEW 2021-2022) 1 credit (math)

In this course, students solve and model design problems. Students will use a variety of mathematical methods and models to represent and analyze problems that represent a range of real-world engineering applications such as robotics, data acquisition, spatial applications, electrical measurement, manufacturing processes, materials engineering, mechanical drives, pneumatics, process control systems, quality control, and computer programming.

- Grade 11
- Required prerequisites: Algebra II, Digital Electronics K and enrollment in CFISD ARC Academy
- Program of Study: Automation, Robotics & Computer Science
- Satisfies advanced course requirement for STEM endorsement.
- Lab supplies or fee may be required.

**Scientific Research and Design I K**

(NEW 2022-2023) 1 credit (science)

Certification: Certified SolidWorks Associate

This course allows students to apply manufacturing, robotics and automation concepts and principles in the classroom and the workplace. The course has the components of any rigorous scientific or engineering program of study from the problem identification, investigation design, data collection, data analysis, formulation, and presentation of the conclusions. All of these components are integrated with the career and technical education emphasis of helping students gain entry-level employment in high-skill, high-wage jobs and/or continue their education.

- Grades 12
- Required prerequisite: Biology, Chemistry, Physics, Engineering Math K and enrollment in CFISD ARC Academy
- Program of Study: Automation, Robotics & Computer Science
- Satisfies advanced course requirement for STEM endorsement.
- Certified SolidWorks Associate certification satisfies requirement to earn a Performance Acknowledgment.
- Lab supplies or fee may be required.

Course with “advanced” topics - Students wishing to earn an endorsement by taking CTE courses must take at least one with advanced topics.

Course includes training for an industry-standard certification. While students pay for the certification exam, the training is offered at no cost.

Course includes training for a certification meeting the requirements for a student to earn a Performance Acknowledgment if they successfully earn it.

**TRANSPORTATION, DISTRIBUTION & LOGISTICS**

**Endorsement: Business & Industry**

**Automotive Basics**

Certifications: Safety & Pollution Prevention (S/P2)

This introduction course will allow students to gain knowledge in the repair, maintenance, and servicing of vehicle systems. This study allows students to reinforce, apply, and transfer academic knowledge and skills to a variety of interesting and relevant activities, problems, and settings. The focus of this course is to teach safety, tool identification, proper tool use, and employability.

- Grades 9 - 12
- Program of Study: Automotive Technician
- Lab supplies or fee may be required.

**Automotive Technology I**

Certifications: Safety & Pollution Prevention (S/P2), Automotive Service Excellence (ASE)

In Automotive Technology I, students gain knowledge and skills in the repair, maintenance, and diagnosis of vehicle systems. This course provides specific training for entry-level employment in the automotive technician career field. Areas covered include use of repair manuals and service and repair of basic components of an automobile such as fuel systems, engines, emission control, power trains, chassis, electrical systems, brakes, and heating and air conditioning. Entrepreneurship, safety, leadership, and career opportunities are included.

- Grades 10 - 12, priority to 11th graders
- Required prerequisite: Automotive Technology I
- Program of Study: Automotive Technician
- Lab supplies or fee may be required.

**Automotive Technology II**

Certifications: Safety & Pollution Prevention (S/P2), Automotive Service Excellence (ASE)

In Automotive Technology II, students gain advance knowledge and skills in the repair, maintenance, and diagnosis of vehicle systems. This course provides specific training for employment in the automotive technician career field. Areas covered include use of repair manuals and service and repair of basic components of an automobile such as fuel systems, engines, emission control, power trains, chassis, electrical systems, brakes, and heating and air conditioning. Entrepreneurship, safety, leadership, and career opportunities are included.

- Grades 11 - 12
- Required prerequisite: Automotive Technology I
- Program of Study: Automotive Technician
- Satisfies advanced course requirement for Business & Industry endorsement.
- Students may earn student ASE certifications in multiple areas and each satisfies the requirement to earn a separate Performance Acknowledgment.
- Lab supplies or fee may be required.

**Practicum in Transportation Systems**

Certifications: Safety & Pollution Prevention (S/P2), Automotive Service Excellence (ASE)

This course allows students to apply transportation, distribution, and logistics concepts and principles in the classroom and the workplace. In the classroom portion of the course, students will gain knowledge of professional standards as required by business and industry. Students will also receive industry-recognized training designed to make them more marketable and desirable in the workplace. Students are required to work 15 hours per week at an approved training site and must be employed at that site within 15 school days after enrollment in the course.

- Grade 12
- Required prerequisite: Automotive Technology I and age 16 if paid training site
- Program of Study: Automotive Technician
- An application may be required if demand exceeds number of available slots.
- Satisfies advanced course requirement for Business & Industry endorsement.
- Students may earn student ASE certifications in multiple areas and each satisfies the requirement to earn a separate Performance Acknowledgment.
- Lab supplies or fee may be required.
This program of study culminates with a supervised on-the-job training experience. If you are looking for a traditional unsupervised work site experience, consider enrolling in one of the many other programs of study listed on the pages preceding this one.

**General Employability Skills** 1 credit
This course will provide students with prerequisite skills for general employment and focuses on work-related decision making, working as a team, discovering job interests, appropriate personal grooming needs for the work place, and self-awareness of work environment preferences.
- Grades 10 - 12
- Lab supplies or fee may be required

**Student to Industry Connections** 1 credit
The Student to Industry Connection course provides students with the opportunity to develop professional relationships with experienced individuals within the student’s chosen program of study and to demonstrate necessary skills. The central focus of this course is to prepare students to be 21st century career ready through interaction with a seasoned workplace mentor.
- Grades 11 - 12
- Recommended prerequisite: General Employability Skills
- Lab supplies or fee may be required

**Career Preparation** 2 credits
(supervised on-the-job training)
Certification: ServSafe Food Handler
This career course will be taught in a two-hour block daily. It will provide students with on-campus activities that will develop employability skills leading to supported employment or internship in the community. On-campus training will be provided with in-class activities relating to students’ actual occupations. On-the-job training will be provided by the business community. The students will be under the supervision of the teacher or teacher’s assistant while undergoing on-the-job training that fits in with a student’s ability and interest.
- Grades 11 - 12
- Recommended prerequisite: General Employability Skills
- Lab supplies or fee may be required

Cypress-Fairbanks ISD • Page 115
VOCATIONAL TRAINING COURSES FOR STUDENTS IN SPECIAL EDUCATION

**Business Media Production Systems**  
2 - 4 credits  
Business Media Production Systems is a two-hour block course for students with disabilities that provides training in following safety procedures, operating equipment, maintaining orders, taking and filling orders. This course includes career opportunities and work experience related to printing, silk screening, embossing, and laminating.  
- Recommendation by the IEP committee required

**Commercial Foods**  
2 - 4 credits  
This vocational course for students with disabilities provides instruction in the use of maintenance equipment, production of foods, job opportunities, and tasks involved in restaurant-type facilities. This course encompasses on-site training at the Carlton Center and community-based instruction opportunities.  
- Recommendation by the IEP committee required

**Vocational Adjustment Class (VAC)**  
1 - 10 credits  
The VAC class, or supervised employment, is a work/study program designed to transition students with disabilities into the world of work. Vocational training and job experience are combined with academic courses that lead to development of employment potential. VAC students must enroll in courses that prepare them for state required assessments. Once the testing requirements are satisfied, the student may enroll in VAC full-time as the IEP committee deems appropriate. The decision is based upon the student’s age and individual needs; however, the student should be at least sixteen years old. Occupational Training is recommended as a prerequisite, concurrent enrollment, or as determined by an IEP committee.  
- Prerequisite: Occupational Training or concurrent enrollment  
- Recommendation by the IEP committee required

**Occupational Training**  
1 - 2 credits  
Occupational Training is a course to help special education students use knowledge, educational, and career information to set and achieve career goals. The course emphasizes the job application process, the interview, the employer, social skills, and practical consumer life skills. This course is intended to be a prerequisite for VAC or the student should be enrolled concurrently.  
- Recommendation by the IEP committee required

LEADERSHIP

**LeadWorthy**  
1/2 credit  
LeadWorthy The Course is designed to develop personal responsibility, leadership, and professional skills through explicit social-emotional participatory learning experiences. The course provides students the opportunity to develop an awareness of personal image, a healthy self-concept, and healthy relationships. Students learn the concepts of consequential thinking and principal-based decision making. Students examine their awareness of social media, the effects of peer pressure and bulling, along with the effective strategies to counteract those effects. This course will provide students opportunities to improve their public speaking and communication skills and their personal vision, mission statement, and goals. They will develop an understanding of what it means to be an effective member of the community through community service.  
- Grades 9 - 12

**Student Leadership**  
1/2-1 credit  
Student Leadership is a course for students who seek opportunities to expand and deepen their group and individual leadership skills to positively impact their own lives and community. Building on collaborative skills and habits of mind, students gain knowledge and expertise in leadership skills including goal setting, effective communication, organization, time management, and collaborative strategies. The course prepares students not only for active participation in school but also in their community. Students solve relevant and current school and community issues by working collaboratively and independently on high-level, real-world tasks such as project proposals, portfolios, and presentations. The course is adaptable across various student needs and student populations. In some schools, the course is customized to meet the needs of formal student organizations such as student council.  
- Grades 11 - 12  
- Must be student leaders
Peer Assistance Leadership (PALS) I-II 1-2 credits
The Peer Assistance and Leadership (PAL) program focuses on working with elementary, middle, and high school age youth. Participants receive effective training in resiliency strategies. Course content and interactive activities combat issues like school violence, drug use/abuse, teen pregnancy, gang participation, school dropouts, and/or behavior problems. PAL began in 1980 as a peer mentoring program, commonly referred to as “peer helping”, by combining peer assistance and peer leadership strategies originally developed in the 1970’s. PAL applies these basic prevention strategies by implementing the program as informal extra-curricular activities, or as structured, evidence/curriculum-based programs. The outcomes identified through implementation of the PAL program in a school setting are a reduction in substance use/abuse, an increase in academic performance, a reduction of absences/truancy, a reduction of discipline referrals to the school office, and an increase in positive decision-making skills and risk resiliency. Parents and school administrators note a favorable perception of the program effectiveness. Students selected for PALS must complete an application, submit recommendations, and schedule an interview with the PALS sponsor.
• Grades 11-12

Air Force Junior ROTC 1 - 4 credits
Air Force Junior Reserve Officer Training Corps (AFJROTC) is a voluntary program for motivated students. The mission of AFJROTC is to develop citizens of character dedicated to serving their nation and community. The objectives of AFJROTC are to educate and train high school cadets in citizenship, promote community service, instill responsibility, character, and self-discipline, and provide instruction in air and space fundamentals. The program is divided into three courses of instruction, Aerospace Science, Leadership Education, and Health and Wellness. Aerospace Science (AS) acquaints students with the elements of aerospace and the aerospace environment. Aerospace Science (AS) introduces them to the principles of aircraft flight and navigation, the history of aviation, development of air power, contemporary aviation, human requirements of flight, cultural and global awareness, the space environment, space programs, space technology, rocketry, propulsion, the aerospace industry, astronomy, and survival. Leadership Education (LE) develops leadership skills and acquaints students with the practical application of life skills. Leadership Education emphasizes discipline, responsibility, leadership, followership, citizenship, customs and courtesies, cadet corps activities, study habits, time management, communication skills, career opportunities, life skills, financial literacy, management skills, and drill and ceremonies. The Wellness Program objective is to motivate cadets to lead healthy, active lifestyles beyond program requirements and into their adult lives. The exercise programs are focused upon individual base line improvements with the goal of achieving a national standard as calculated by age and gender.
• Grades 9-12
• Lab supplies or fee may be required.

Students in AFJROTC may participate in drill competitions or performances requiring up to 8 hours of after school practice weekly.
Cypress-Fairbanks ISD offers support to school district for career and technical education programs in agriculture, architecture, arts/communication, business, education & training, finance, health science, hospitality, human services, information technology, manufacturing, marketing, STEM, and transportation. Admission to these programs is based on enrollment in Cypress-Fairbanks ISD secondary schools.

It is the policy of Cypress-Fairbanks ISD not to discriminate on the basis of race, color, national origin, sex or handicap in its CTE programs, services or activities as required by Title VI of the Civil Rights Act of 1964, as amended; Title IX of the Education Amendments of 1972; and Section 504 of the Rehabilitation Act of 1973, as amended.

It is the policy of Cypress-Fairbanks ISD not to discriminate on the basis of race, color, national origin, sex, handicap, or age in its employment practices as required by Title VI of the Civil Rights Act of 1964, as amended; Title IX of the Education Amendments of 1972; the Age Discrimination Act of 1975, as amended; and Section 504 of the Rehabilitation Act of 1973, as amended.

Cypress-Fairbanks ISD will take steps to assure that lack of English language skills will not be a barrier to admission and participation in all educational and CTE programs.

For information about your rights or grievance procedures, contact the Title IX Coordinator, Deborah Stewart, and/or the Section 504 Coordinator, Barbara Levandoski, at 10300 Jones Road, Houston, TX 77065, 281-897-4000.

Comunicado público sobre la no discriminación en los programas de educación profesional y técnica 2017- 2018

Cypress-Fairbanks ISD ofrece programas de educación profesional y técnica para la agricultura, arquitectura, bellas artes/comunicaciones, negocios, educación y capacitación, finanzas, ciencias de la salud, hospitalidad, servicios humanos, tecnología, manufactura, mercadeo, STEM y transporte. La admisión a estos programas se basa en el número de estudiantes inscritos en las escuelas secundarias de Cypress-Fairbanks ISD.

Es norma de Cypress-Fairbanks ISD no discriminar por motivos de raza, color, origen nacional, sexo o impedimento en sus programas, servicios o actividades de CTE, tal como lo requieren el Título VI de la Ley de Derechos Civiles de 1964, en su forma enmendada; el Título IX de las Enmiendas en la Educación de 1972 y la Sección 504 de la Ley de Rehabilitación de 1973, en su forma enmendada.

Es norma de Cypress-Fairbanks ISD no discriminar por motivos de raza, color, origen nacional, sexo, impedimento o edad, en sus procedimientos de empleo, tal como lo requieren el Título VI de la Ley de Derechos Civiles de 1964, en su forma enmendada; el Título IX de las Enmiendas en la Educación, de 1972, la ley de Discriminación por Edad, de 1975, en su forma enmendada, y la Sección 504 de la Ley de Rehabilitación de 1973, en su forma enmendada.

Cypress-Fairbanks ISD tomará las medidas necesarias para asegurar que la falta de habilidad en el uso del inglés no sea un obstáculo para la admisión y participación en todos los programas educativos y CTE.

Para información acerca de sus derechos o sobre los procedimientos de quejas, comuníquese con la Coordinadora del Título IX, Deborah Stewart, y/o el Coordinador de la Sección 504, Barbara Levandoski, en el 10300 Jones Road, Houston, TX 77065, 281-897-4000.
