

# TEXAS SCHOOL ALLIANCE

## TSA by the Numbers:

### An Experienced Voice for Texas Students

The Texas School Alliance is a superintendent-led organization that has been the leading voice of large Texas school districts for more than 30 years. Our members cover the breadth of Texas' geographic expanse, from the Rio Grande Valley to the Panhandle, from behind the Pine Curtain to Far West Texas. Some TSA districts are property-wealthy and others are property-poor, but all are committed to advocating for the students in Texas public schools.

### A Trusted Advocate at the Texas Capitol

TSA advocates for the needs and priorities of our districts before the Texas Legislature. Policymakers know TSA as a credible and honest broker more interested in getting results than scoring political points. We understand the importance of building open and productive communication with legislators while staying true to our priorities and the vast needs of Texas public school students. We draw on the expertise of professionals in our member districts as we talk to legislators about issues including school finance, accountability & assessment, student safety, and others. We also provide assistance and guidance to our member districts on these and other issues.

### A Member-Driven Thought Leader

TSA works with superintendents in member districts to identify the most pressing issues facing their students and communities. Heading into the 2023 legislative session, TSA member districts adopted the following legislative priorities:

- Make investments that reflect the true cost of educating students
- Provide the resources and flexibility for school districts to improve student safety
- Strengthen efforts to recruit and retain qualified educators
- Reform state accountability standards to better measure success
- Ensure public dollars only fund accountable transparent public schools
