

CARE Academy
A College Prep Program

September 2018

Dear Parent/Guardian of a Graduating Cy-Fair ISD Senior:

You are receiving this email because your student is enrolled in a CARE Academy prep class (English IV L (on-level) and/or Advanced Algebra). Students in the CARE Academy are eligible to enroll directly into credit-level English or Math courses **without having to take a college placement test** if the student earns a grade of 75 or higher in high school English IV L (on-level) and/or Advanced Algebra in the spring semester. This is a wonderful opportunity for your student to avoid possible remedial courses in English and Math which will save time and money!

The first step in this process is to complete an application to Lone Star College. An application drive will be held on your senior's high school campus during the fall semester. Please refer to your CARE Academy google classroom for your campus date so your student can complete this step! Students will be applying to Lone Star College during their English IV L class and our CARE Academy team will be present to assist your student with the application process.

Please be advised that your student will need to know the following information to successfully complete the application:

- Visa number (if applicable) and expiration or permanent residency status and number are required
- Social Security Number (optional, but required for financial aid)
- Current address, phone and email
- Emergency contact phone and email
- Use legal names as noted on high school transcript

Please feel free to contact us at CyFairCARE@LoneStar.edu or call the CARE Academy Advisor at 281-290-3503 for help with any of these steps.

Sincerely,

The CARE Academy Team
