

CFISD Chromebooks

CFISD did an extensive evaluation of available devices for the LTE 1:1 Learning Together Everywhere Program. The device that met the instructional needs for students was determined to be a Lenovo Chromebook. These devices are flexible and interactive and have many features that enhance the instructional setting.

1. Versatile 360-degree hinge that allows the device to transform from a laptop to a tablet.
2. 10-point touchscreen technology – allows up to 10 unique touches at the same time!
3. The Chromebook has an 11.6” anti-glare touchscreen which helps to reduce eyestrain.
4. A 720P HD camera is included to ensure that students can connect with their teachers via video-conferencing apps.
5. Up to 10 hours of battery life allows the Chromebook to last a school day without needing to recharge.
