

Title: EngineerGirl Essay Contest

Deadline: February 1, 2024

Award: \$500 - \$1,000

Program:

Every year, the EngineerGirl website hosts a contest dealing with engineering and its impact on our world. The topic and detailed instructions for the contest are posted in September with a deadline for submissions on February 1st of the following year. Winners are announced in the summer.

There are many steps in the process of transforming things from raw materials into consumer products. Many of the processes are represented by whole industries, and that means lots of people are involved every step of the way. Your submission will focus on the engineers present in this lifecycle.

In thinking about your submission, consider made objects that you've used before or that you use every day, but don't choose foods or plants.

The 2024 EngineerGirl Writing Contest asks students to write a piece exploring the lifecycle of an object that you use in your daily life.
